

Wizard 499

Chapter 499: Saint Ape Fusion Giant, Levi's Fourth Form!(5)

Of course, it might also be because the other Special Effects had not been activated yet and could not fully show the strength of the Saint Ape.

So far, the Red Lotus Breathing Technique was the most powerful among the power breathing techniques that Levi had obtained. There was no doubt about it.

"Next, I'll let the Saint Ape fuse with the giant and see what can mutate."

Levi found a safe place and added some cushion breathing techniques before fusing the two breathing techniques.

At Levi's heart, the golden Saint Ape pounded its chest and stomped its feet. It began a fist-to-fist battle with the towering ice-blue frost giant.

These two were humanoid transcendent creatures. Their fighting was similar to human combat. Their every move seemed to have some patterns.

With the previous experience of the Black Snake and Golden Horn mutating, the fusion this time was very smooth.

Two days later.

The fusion was successful.

Levi opened the proficiency panel.

Levi—

King Kong Breathing Technique: Level 11 (1/300,000). Special Effect: Heavenly Cold Arms (Solid State), Frost Heart, King Kong's Wrath.

[Heavenly Cold Arms: An ability born from the fusion of the characteristics of the Saint Ape and the Frost Giant. The King Kong Power is injected into your arms, giving you terrifying strength comparable to King Kong. Your arms can be lengthened to twice the length of your body. Your palms can obtain a trace of Strength from the Earth, slightly increasing your endurance and explosive power. You can also release extraordinary Frost Power through your palms. This Special Effect can increase the effect as your breathing technique levels up.]

Inside Levi's body, the power of the King Kong Seed was infused into his arms. His arms began to thicken and lengthen strangely. In the end, he could use his arms to support himself off the ground and his feet off the ground...

His exaggerated long arms were covered in layers of frost, and under the frost were firm muscles that were like rocks.

Wisps of cold air emanated from Levi's Heavenly Cold Arms, freezing the ground around him.

The world was in summer, and Levi was in winter.

Boom, boom, boom!

Levi ran through the wilderness with his arms. His speed was even faster than his legs. He was like an ape as he galloped through the wilderness.

He spread his arms and destroyed all the trees in his path. Everything in his way was crushed by Levi.

Finally, Levi stopped and lay on the ground, panting slightly.

"This Heavenly Cold Arms is a little ugly, but it's really powerful. I feel like I can kill a Second -Circle Wizard with a single slap. Moreover, I can actually obtain

Strength from the Earth. This seems to be the ability of an earth-element Saint

Ape."

In addition to the Heavenly Cold Arms, the King Kong Breathing Technique also had a Special Effect that was newly born after the mutation.

[King Kong's Wrath: Your strength will increase as your anger increases. When your anger reaches 100%, your strength will also double! However, it's not good to enter the state of King Kong's Wrath for too long. Otherwise, I will lose my mind and completely lose my rationality. This Special Effect can't be increased!]

"Rage points? So, the angrier I am, the stronger I'll be? Interesting."

Levi tried his best to recall what had angered him, but he realized that... there was nothing at all.

He recalled the days when he had been bullied by the Duke of Montenegro, but he did not feel angry at all. He had long felt relieved that he had taken revenge and wiped out the entire Montenegro Mountain.

"It's over. I've become a robot. I don't have any emotions."

Levi realized that he did not seem to be very angry anymore. The things that he had once hated seemed to be unable to anger him as time passed.

"What should I do to make me angry? No one has provoked me now, so I can't get angry." Levi was extremely vexed.

Suddenly, he had an idea. Then, he began to think about some things in his previous life. In the end... he thought of the damn house price.

"House prices are so damn expensive."

Memories surfaced in his mind, memories of his previous life before he transmigrated.

Levi's cold arm hammered his chest, echoing through the forest like a war drum, startling countless birds!

"If it weren't for this lousy house, why would I have to work so hard and write novels every day in my previous life? Without any entertainment time, I would have to be urged to update every day! I would be scolded by the haters who read books!"

"Damn it!"

Levi was furious.

The sound of war drums named Wrath grew louder and louder.

The blood of anger in his chest was burning.

It was not just his arms. Frost-colored hair began to grow all over Levi's body, turning him into an ominous blue-haired old monster!

Levi's rage points were at 30%!

Under such anger, Levi was like an enraged ape. Terrifying power spread throughout his body. He leaped high into the air and smashed his fists down, as if he wanted to crush everything in front of him.

"Die!"

Boom!

The place where Levi's fists landed was filled with cracks. It was a hundred feet wide. The deep pit collapsed, and the trees were reduced to dust by the shock wave.

The cold Frost Blood flowed and the coldness surged into Levi's mind, forcing him to stop the anger that he had yet to vent. His blue hair faded and he returned to normal. He looked at everything that he had destroyed. "Another form that greatly increases Strength. It can be called my fourth form."

"First form, Nine Swords Form, Second form, Red Lotus Form, Third form,

Giant Whale Form, Fourth form, King Kong Form!"

In addition, the Favored By The Night could only take effect at night.

Levi's strength had once again been greatly enhanced.

"Furthermore, the Frost Blood seems to have the hidden effect of a tranquilizer. In this way, it forms a perfect combination with King Kong's Wrath."

Levi left the wilderness and headed towards Myriad Dragon City..
