

Wizard 507

Chapter 507: Transcendent Perception and Heavenly Wind Heart! (3)

"In that case, I should be able to cultivate the Storm Faction's spells and Meditation Arts in the future. Among the four elements—Earth, Fire, Wind, and Water—I've already given birth to Earth Pulse, Dance of the Fire God, and the Heavenly Wind Heart. Now, I only have the talent of water element affinity. This is really a pleasant surprise. I originally wanted to find clues in the inheritance of Duncan or the Van Helsing family, but I don't need them now."

This also gave Levi an inspiration. Perhaps he did not have to risk his life to go to Heavenly Mountain to search for the Van Helsing family's inheritance.

As long as he cultivated some breathing techniques that might be related to this element, it was also possible to give birth to dual elements.

For example, the Frost Giant Breathing Technique gave birth to the Frost Heart Special Effect, allowing Levi to have the frost element affinity.

"This trip to the human world was worth it. Not only did I solve the problem of breaking through the Legendary Physique, but I also cultivated Transcendent Perception and accidentally obtained a wind element affinity."

Levi was overjoyed. The ticket to the sub- dimensional portal was not wasted.

As for the Storm Faction's Meditation Art and spells, Levi had them in his storage bag.

He planned to return to the Wizard World and cultivate along the way.

For some reason, with the appearance of the Heavenly Wind Heart, Levi had a vague feeling.

If he could gather the Special Effects of the four elements and learn the Meditation Arts of the four traditional factions, Earth, Fire, Wind, and Water, the four elements that constituted the Aether Power, would all be gathered in Levi's body.

What would happen then?

Levi had also heard that in ancient times, there were other wizards who cultivated the four major factions and advanced together. However, other than mastering more spells and being more comprehensive, there was nothing special.

Whether it was the upper limit of spiritual force or the upper limit of spell power, they were no different from ordinary wizards.

Therefore, as time passed, no wizards did this anymore because it was a complete waste of time.

A wizard who could learn the four Meditation Arts, Earth, Fire, Wind, and

Water, at the same time, must be a wizard with the talent of the Children of Chaos. Their cultivation was much slower than the Children of the Elements, to begin with, and they had to take care of the four major factions at the same time.

Since ancient times, only a few children of Chaos had become official wizards, let alone have great achievements.

Levi only did this because he had the proficiency panel.

His intuition told him that Brother Pan might give him a big surprise.

Levi finally arrived at Flower City on a peaceful afternoon.

He enveloped the entire city with Transcendent Perception, excluding the Church, of course.

Although there shouldn't be any strong people in the church of Flower City,

However, now that the saints of the major churches had basically arrived, Levi felt that it was better to be safe. He did not know how strong the saints were, but as the spokesperson of the astral world, they should not be too bad.

"Everything is normal. Other than Andrew, there are no Blood Clan, no evil spirits, nothing. I don't know where that old man Anderson went."

Levi arrived at Black Snake Castle.

Andrew was practicing the Blood Beast Breathing Technique.

This was also one of Levi's missions.

On one hand, cultivating this could slightly increase Andrew's strength. On the other hand, Levi wanted to see if the Blood Clan would have any special effects when cultivating the Blood Beast Breathing Technique.

Previously, Anderson had cultivated the Blood Beast Breathing Technique, and he had quickly cultivated it to its limit. After that, there was no more activity. Therefore, Levi wanted Andrew to give it a try and increase the number of experimental subjects.

Blood Beasts could be considered Blood Clan in essence, but they were only high-level existences.

In the Primary Blood Clan system, there was also a classification similar to the Abyss's upper, middle, and lower nine levels. Level 9 was the highest, and level 1 was the lowest.

For example, the three Primary Blood Clan members that Levi had just captured were all low-level Level 1 Blood Clan. They only had the strength of First-Circle Wizards.

Levi estimated that the Blood Beast was at least a level 6 upper-level Blood Clan, comparable to a primordial soul wizard.

Above this nine-level system was the source of all the Blood Clan, the supreme Blood River Will!

If Andrew could use the Blood Beast Breathing Technique to break through the bloodline shackles of his Secondary Blood Clan, it would be a good thing for

Levi.

Andrew was very strong, barely half a legendary knight.

However, in this era where the Dark Wave was becoming more and more intense, such strength would one day not be able to keep up with the times.

At that time, he might not be able to keep his base in the human world.

He did not disturb Andrew's cultivation. He changed his appearance and wandered around Flower City as an ordinary person.

After leaving the human world for twenty years, when he looked back... the changes didn't seem to be that great.

According to the wizards' research on the Multidimensional Plane, the development of mortal civilization in any plane ruled by the gods was basically very slow. This was because the gods needed some fixed believers, and the religion was essentially a manifestation of ignorance.

If the strength of mortals developed too quickly, be it on the path of wizards or in other technological directions, one day, the mortals who advanced at high speed would gradually abandon their faith in the gods and believe in the knowledge and technology in their hands.

Some of the braver ones might even try to... slay gods! It was said that the reason why the gods were more afraid of Legendary Wizards was because Sauron had once developed a Legendary spell that specialized in targeting gods..
