

Wizard 508

Chapter 508: Transcendent Perception and Heavenly Wind Heart! (4)

Therefore, to the high and mighty gods, mortals should be ignorant, singing praises of God's virtue, mastering "knowledge", and mastering 'God Slaying Art' without any objections!

In the end, the result was that the kingdoms of the Seven Kingdoms Continent changed again and again. Just like chives. the dynasties changed. but the

Technology did not develop much. Perhaps it was the same now. A thousand years ago, it was still the same...

Of course, Levi did not care about this. As long as they did not provoke him, the gods could do whatever they wanted.

In Black Snake Castle, the three brothers, who were already in their later years, were sleeping.

After sensing the familiar aura on Levi's body, the three brothers stood up and looked around, letting out excited cries.

"Long time no see, little ones." Levi appeared in front of them and said emotionally.

The Giant Bear of the Northern Territory did not have a long lifespan, and it was very difficult for it to live for more than 50 years. The three brothers were already in their later years, and their blood essence power was no longer at its peak.

With Andrew guarding them, they no longer needed to fight in all directions. With no worries about food and clothing, it was not impossible for them to live longer than 50 years in their natural state.

Although Levi wanted to help the three brothers find some ways to evolve, he didn't seem to have any other choice other than the Life School of Thought's bloodline modification path.

"You're back, Master." Andrew came to Levi's side. He was alarmed by the three brothers' voices and thought that a powerful enemy had unknowingly invaded the castle.

Unexpectedly, it was Levi.

"Hmm, is Harris dead?" Levi suddenly asked. He looked at the sky where a few snow eagles were soaring.

"Yes, Harris naturally died of old age a few years after Master left. However, we found him a partner previously, so he died without regrets. These young snow eagles are already Harris' grandsons," Andrew said.

"How are Hapes and Henders?" Levi asked.

"They're fine. Let me bring you to take a look at them," Andrew said.

"Okay."

Levi followed Andrew and found Hapes and Henders in a hidden valley in the territory.

The more Levi looked at Hapes, the more he felt that this fellow looked very similar to the giant ape on the Yellow Earth Continent.

He was thinking that if he could not tame the giant ape, he would study the knowledge of the Life School of Thought and see if he could use the giant ape to evolve Hapes. That way, he could also solve the problem of Levi's secret medicine.

After visiting his old friends, Levi and Andrew returned to the castle.

"Where's Anderson?"

Levi asked.

"Anderson and the Black Knight have headed to the Secret Alliance's headquarters."

"Secret Alliance?" Levi was confused.

Andrew then gave Levi a rough introduction of the Blood Clan in the human world.

Ever since the last plane convergence, many Blood Clan members remained in the human world.

The Blood Clan in the human world were divided into two factions due to their different ideals.

Secret Alliance and Demonic Feast Alliance.

The Secret Alliance was relatively peaceful and low-key. They basically lived in seclusion. The blood they sucked was mainly from the Bloodbread Tree. Of course, they would occasionally suck the blood of humans who invaded their territory.

Although they also liked to drink human blood, this was not the Blood River Dimension after all, but the human world ruled by the Seven Gods.

Therefore, they knew that the situation was better than the situation. They knew how to keep a low profile and be Blood Clan. Under normal circumstances, they would not take the initiative to cause trouble.

The Blood Clan of the Secret Alliance were mainly Secondary Blood Clan members like Anderson. There were also some Primary Blood Clan who could restrain their desires.

The Demonic Feast Alliance was the exact opposite.

This faction believed that the Blood Clan were born noble and that humans were born to be food for blood.

Its members were mainly Primary Blood Clan and Secondary Blood Clan who had completely abandoned the bottom line of humans.

Basically, most of the Blood Clan who caused trouble were from the Demonic Feast Alliance.

This faction was led by the two most powerful Blood Clan clans, Lösenba and the Fellmocity.

As far as Andrew knew, the ancestors of these two Blood Clan families in the human world had the strength of a low-level level 2 Blood Clan.

However, the ancestors were asleep most of the time. The Blood Clan could reduce the consumption of their lifespan by sleeping. It was similar to the hibernation technique in science fiction works.

Of course, during their slumber, while their lifespan was depleted, the strength of the Blood Clan would stagnate or even decrease.

As for Anderson, he had gone to the Secret Alliance because he wanted to use the power of the Secret Alliance to exert pressure on the Demonic Feast

Alliance. He wanted to stop those busybodies who might bring calamity to the Blood Clan.

"I see."

After Levi heard this, he said, "Then let Anderson give it a try."

Levi's heart was as calm as an ancient well.

Anderson would most likely fail.

In Levi's opinion, the Blood Clan like the Secret Cultivation Alliance had kept a low profile because they were isolated in the human world. Now that the Blood River Plane was gradually approaching, they would have more support from their own clansmen.

These low-key Blood Clan might not be able to hold it in anymore.

Regardless, Anderson's idea was good. After all, other than this method, he had no other choice.

With his and the Black Knight's strength, they were too weak to change the overall situation.

Levi, on the other hand, couldn't be bothered.

As he waited for Anderson and company to return, he returned to his secret room and released Yasad from the Bug House..
