

Wizard 509

Chapter 509: Transcendent Perception and Heavenly Wind Heart! (5)

He looked inside the Bug House. The two Blood Clan members were still sleeping.

Ace was guarding the side to prevent these two fellows from causing trouble

After waking up in the Bug House.

Yasad appeared and stood there in a daze. "What's your name?" Levi asked.

"Yasad Lösenba."

"What's with those two Blood Clan members?"

"Their true soul was injured in the battle with the Church, but they can't cultivate their true soul in the human world. They can only wait for the next plane convergence by sleeping."

"Didn't you say that the true souls of the Blood Clan would return to the Blood River Plane to be reborn after death?" Levi asked with a frown.

"It's true that you can be reborn, but after being reborn, your memories of your previous life are gone... What's the difference between this and death?" Yasad said.

Levi understood.

He suddenly realized that if that was the case, the Blood River was close to another famous river.

That was the Underworld Source River of the Underworld!

Levi then asked a lot of questions about the Blood Clan.

It was inevitable for him to interact with the Blood Clan in the human world. Only by knowing his enemy and himself could he win a hundred battles,

Then, Levi sharpened his blade and began to draw blood from Yasad's body. His Blood Beast Breathing Technique had long been unable to endure the thirst.

He wanted to see how effective the secret medicine refined by the Primary Blood Clan was.

Holy Brilliance Calendar Year 1037, Month of Harvest.

After returning to Flower City, he began to consciously ask his servants to collect information about the nobles of the seven kingdoms.

He wanted to make a compilation roster. Then, according to this roster, he would choose some nobles with relatively passable reputation and quality. Andrew would secretly send people to gradually interact with these nobles.

Then, he would rent their ancestral breathing technique with gold coins or other items that the nobles were interested in. After Levi finished using emulate, he would return it to them.

Generally speaking, anyone who could become a great noble in the human world should have an excellent breathing technique.

If he could collect all these breathing techniques, Levi would not have to worry about breaking through the breathing technique limit in the future. Of course, his plan was to interact less with people in the early stages to test the effect.

If possible, he would gradually interact with more nobles in the future.

Now was the best time for Levi to collect the breathing techniques. Due to the disaster of the blue frost and the chaos of the Blood Clan, countless nobles in the mortal world were in a constant state of panic. Many nobles had already fallen into dire straits or even gone bankrupt.

What Levi did not lack was money. He believed that many nobles would be tempted if they could get a lot of gold coins just by renting their breathing techniques out for a period of time.

Most importantly, Levi had the ability to do all this. He did not provoke the Church on his own accord. He only secretly collected some breathing techniques. There should be no party that could stop him.

Just like that, another two months passed.

Through this method, Levi successfully obtained two excellent quality breathing techniques. After successfully copying using emulate, Levi returned the breathing techniques.

Even though these breathing techniques were third-rate and second-rate power breathing techniques,

But this was undoubtedly a good start.

The price Levi had to pay was the gold coins that he had no use for now.

After that, Levi asked Andrew to stop.

He planned to stop for a while and observe the reactions of the various factions.

If the commotion was too big, it would be easy for the Church to spread the news among the nobles.

He was worried that the saints of the church would suspect something and start investigating him.

"Damn the Church. If not for them, with my strength, why would I be so restrained in the human world? When will the Dark Wave Army arrive? I can't wait for the world to be in chaos."

Heroes emerge in troubled times.

Only people like Levi would be able to benefit more from the new era if the old order was affected.

Of course, Levi did not stop cultivating his breathing technique.

He planned on staying for a few more months. After meeting Anderson and company, he would return to the Wizard World.

There was no way to cultivate the Meditation Art in the human world. Furthermore, with the Church around, they would be timid in everything they did. It was very unpleasant.

After he returned to the Wizard World, he asked Andrew to send him the new breathing technique that he had rented. After Levi completed the emulate, he would send it back.

Just like that, it formed a good cycle.

Two months later, the Month of Winter arrived.

It had been almost half a year since Levi returned to the human world.

In the past six months, Levi had collected many breathing techniques, including precious physiques and endurance. Unfortunately, he did not have any Perception-type techniques yet.

His own breathing technique cultivation had also made great progress.

Levi cultivated the Inferno Dragon Breathing Technique to level 8 in half a year and gave birth to the Transcendent Physique.

As for the Gray Destruction Cross Slash, it had cultivated to level 4. The former high-speed power of level 1 had become the high-speed power of level 4.

In the training ground.

Levi held Frostmourn in his hand.

The Gray Destruction Cross Slash was activated!

In a breath's time.

Levi had already slashed out 124 cross-shaped sword lights!

These sword lights formed a terrifying sword light storm that slashed the huge rocks in front of them into powder and turned them into quicksand!

With a single sword strike, everything was obliterated.

Although Levi could easily smash such a huge rock, it was impossible to turn it into quicksand with his strength. Without a superb sword skill like the Gray Destruction Cross Slash, it was impossible.

"This is only a level 4 High Speed Power, but I can already slash out more than a hundred times in one breath.. Doesn't that mean that I can slash out a thousand times in one breath in levels 5 and 6?"
