

Wizard 521

Chapter 521: Level 12! Dragon Body Born, Red Lotus Hellfire! (6)

Of course, the strongest thing about Mythical Creatures like the Red Lotus Dragon is that they can hide in underground magma and rely on thermal radiation to grow. As long as there's sufficient time and radiation, the future achievements of the Red Lotus Dragon baby will be limitless without dying prematurely."

Levi was envious.

Although he also possessed a portion of the Red Lotus Dragon's youngling abilities, he did not have this core ability that could continuously become stronger by relying on radiation.

Of course, even if Levi had this ability, it was impossible for him to have the long lifespan of the real Red Lotus Dragon. Relying on radiation to grow might take tens of thousands of years.

No matter what, Levi's overall strength had increased by a lot after having a newborn dragon body.

The level 12 Golden Snake and Red Lotus' defense and Strength surpassed the legendary level 2. With one attack and one defense in hand, Levi basically stabilized his level 2 strength.

He would not have to risk his life to fight against level 2 wizards like before.

Apart from the Newborn Dragon Body, there was also a Special Effect after the level 12 Red Lotus Breathing Technique.

[Child of Hellfire: Red Lotus Hellfire, burns all darkness! The Red Lotus bloodline in your body has allowed you to obtain the unique Hellfire characteristic of the Red Lotus. Your talent in fire element affinity has increased significantly. Moreover, the fire element spells or spell-like abilities you release will be given the "Hellfire characteristic". Under the Hellfire characteristic, dark races that mainly use dark elements, death, slaughter, and destruction will receive a 10% increase in damage. This Special Effect cannot be upgraded.]

"There's such an ability? Could it be that the Red Lotus Clan has a feud with the Abyss or Hell? I wonder if this Special Effect has any effect on the Blood Clan.

On the surface, the Blood Clan is also biased towards negative energy." "All darkness will be brought to justice in front of the Red Lotus Hellfire!"

This Special Effect was not very useful to Levi at the moment, but he believed that it would definitely be useful in the future.

After studying his new ability, Levi walked out of his seclusion. He was getting closer and closer to the blood sacrifice ceremony. There was only a month left.

With a traitor like Yasad, Levi roughly knew some of the plans of the Blood Clan, but Yasad was only a Level 1 Blood Clan, so he did not know the more detailed plan.

Levi observed all of this as a bystander. He believed that the Church must have a foundation to stand tall in the world for countless years. He did not believe the Blood Clan could succeed in this blood sacrifice.

Deep down, Levi did not want the Blood Clan to succeed either. After all, although the Church was also bad, at least it was not to the extent of wiping out a city and causing misery and suffering.

However, Levi still hoped that the Blood Clan could bring some big trouble to the Church. This way, he would have a chance to reap the benefits.

Holy Brilliance Calendar Year 1038, Month of Grass.

Levi's Perception covered most places in the capital besides the Church, but he did not sense any aura of the Blood Clan.

This took some effort on his part.

"Could it be that the Blood Clan are actually deliberately releasing smoke bombs? Pretending to perform a blood sacrifice in the Emerald King City to make the other factions lower their guard before launching a sudden attack?" Otherwise, Levi felt that with his perception, it was not impossible for him to detect nothing.

At the same time, thousands of feet underground in the Emerald King City.

A bloody blood-colored sphere floated in the air. Its surface was covered in dense veins. From the looks of it, it should be the heart of some existence.

This heart was actually trembling slightly at this moment. A layer of gray blood light enveloped this area, isolating all aura and Perception.

In the blood light, many powerful figures were waiting with excited expressions.

"Let's begin.. Blood Sacrifice to the Blood God and the Blood River!"
