

Wizard 528

Chapter 528: Disappearing Weak Human Bodies, Embrace the Red Beast! (1)

Levi stood on the spot for a long time before asking helplessly, "Senior, how long will it take to repair it?"

The old face closed his eyes and said, "The shortest is a month, the longest is half a year. Of course... the worst-case scenario is that the teleportation portal over there can't be repaired. If this sub-dimensional portal node is abandoned, I'll lose my job."

At this point in time, this old man was still thinking about losing his job.

"Isn't it easy for an expert like you to look for a job in the Wizard World?" Levi thought. 1-1e was speechless.

"Senior, did something big happen in the Wizard World?" Levi asked worriedly.

When he left, other than the Great Expedition, everything was normal in the Wizard World.

Occasionally, dark wizards would cause trouble, but this kind of direct destruction of the core teleportation portal in the Star Sea was usually only possible in large-scale wars between dark and righteous wizards.

"With the four high-level dark wizard organizations, the Black Sun Steeple, the

Boiling Beast Blood, the Immersed Ancient Castle, and the City of Unrighteousness, the dark wizard faction, as well as the dark wizards from all over the Endless Sea, launched a long-planned dark wizard riot. Within a year, it swept through the Endless Sea. Now, the Azure Sea is already covered in flames of war."

The old man calmly told Levi about a big event that shocked him.

"The Great Expedition has just begun, and these dark wizards are already starting a riot. It must be Chaos City's scheme," Levi said.

"So what if we know it's a scheme? The five federations are important resource sources in the Wizard World. If we give up on the five federations, with the current resource state of the Realm of the Unbelievers, it's impossible to support so many wizards," the old man said.

"Yes, this is an open conspiracy. These dark wizards are really despicable!" Levi could not help but curse.

"Kid, it's actually a blessing in disguise. Because you happened to be in the human world, you avoided the Star Tower's mandatory recruitment. Otherwise, you would already be on the frontline battlefield," the old man said with a smile.

"What? Another mandatory recruitment?" Levi couldn't help but think of Marlene and the others.

"That's right. This mandatory recruitment is carried out by the wizard organizations. All wizard organizations have to contribute their manpower to the front line of the war between the dark and righteous wizards. Otherwise, they will be deserters!"

"Can't service be replaced by military spending?" Levi asked.

"Looks like you don't know how chaotic it is inside," the old man said.

"Where are the legendary wizards? If they show up, they should be able to deal with these dark wizards, right?" Levi was curious about what the legendary wizards were doing at this time.

"In the current Wizard World, there are a total of 12 Legendary Wizards. Five of them went to the front line of the expedition, and the remaining Legendary Wizards also had their own missions. Otherwise, how do you think wizards suppressed the 50 Federation Planes for so many years?" The old man said angrily.

"Alright... I didn't expect the situation to be so serious."

Levi did not know if this was considered good luck. Not long after he returned to the human world, such a large-scale civil strife erupted in the Wizard World.

To the wizards, as long as they worked together, even the gods were nothing to be afraid of.

However, if they were to fight among themselves, the situation would not be good.

"Then I'll come back to take a look after some time. Thank you for telling me, Senior."

Levi bade farewell to the old man and found an uninhabited deserted island overseas to temporarily stay.

He planned to wait here for a month.

If he couldn't repair it in a short period of time, he would return to Flower City to play chess with Anderson.

On the deserted island, Levi set up his alarm array and dug a shelter to live in.

Although the elemental power in the human world was thin, with Levi's current Aether Stone reserves, it was not a problem for him to operate a few zero-circle arrays.

Safety was an issue that could not be taken lightly.

"Sigh, I was born at the wrong time. I can't catch up with the good times. I just want to cultivate in peace."

Levi sighed in the shelter.

He took this opportunity to organize his gains in the human world.

He used a storage bag to store all kinds of knight breathing techniques.

In this storage bag, the breathing techniques of strength, speed, physique, defense, endurance, and perception were placed in their respective corners. Strength had already accumulated like a small mountain, and there were only a few books on Perception.

To the current Levi, those shallow and excellent breathing techniques were basically used as raw materials to break the limit.

He took out the Dragon Breathing Technique he had obtained from the treasure vault.

This breathing technique was passed down from the royal family's ancestors. In fact, it was originally called the Jade Dragon Breathing Technique. However, the royal family felt that the Dragon Breathing Technique was more domineering and was enough to showcase their status as a king.

Therefore, he changed his name privately.

The Jade Dragon Breathing Technique was a speed-type legendary breathing technique.

Legend had it that the Jade Dragon was a green dragon that was as green as jade. It was extremely fast and was also known as the “Multi-element Green Light”.

Moreover, the Jade Dragon could spit out a terrifying poisonous dragon breath. Wherever the dragon breath passed, everything withered and miasma grew.

Therefore, this incomparably beautiful green dragon was a genuine Poison Dragon.

Since the initial level of the breathing technique was perfect-grade, the Jade Dragon’s main body should be at least a legendary existence.

The secret medicine needed for the Jade Dragon Breathing Technique was ambergris from mixed-blood Dragon Clan creatures, as well as the venom of various poisonous creatures. There were no requirements for the types of venom. In short, the more types of venom there were, the better the effect of cultivation..
