

Wizard 530

Chapter 530: Disappearing Weak Human Bodies, Embrace the Red Beast! (3)

"Wait a little longer. Come over in half a year. If you still can't repair it in half a year, then you don't have to wait anymore." The elder asked.

Levi's heart skipped a beat. He did not want to be trapped in the human world forever.

"Senior, I wonder if there are other sub-dimensional portals in this world?" Levi asked.

"Yes, but the Endless Sea is in a hurry to repair it. Those who can still use it are not going to the Realm of Azure Cloud. They are going to other Realms of the Unbelievers. You can go to other places first and then teleport to the Endless Sea from there. It will cost you more money," the old man glanced at Levi and said.

"Alright, I understand. Senior, do you have the coordinates of this sub-dimensional portal? I'm willing to pay a certain price to obtain it," Levi said respectfully.

"Of course. I have three coordinates here. They are to the Realm of Crimson, the Realm of Divine Wind, and the Realm of Hell. If you need them, one coordinate is 1,000 Aether Stones," the old man suddenly said with a smile.

Levi cursed the profiteer in his heart.

He spent 3,000 Aether Stones to buy the coordinates of three Realm of the Unbelievers after signing the contract with the old man.

The old man did a buy-one-get-one-free deal for him. He also gave Levi the coordinates of the other teleportation portals in the Realm of Azure Cloud.

Levi would not go to these places immediately, but with such coordinates, it was better to be prepared.

If he really couldn't enter the Realm of Azure Cloud, he would go to other Realms of the Unbelievers to cultivate. Anyway, it didn't matter where he cultivated.

Strictly speaking, the most unsuitable place for Levi to cultivate was the Realm of Azure Cloud.

This was because Levi had all three elemental affinities except for the water element affinity.

However, he already had a certain foundation in the Realm of Azure Cloud. He did not want to abandon it and start all over again.

Therefore, it was best to return to the Endless Sea. As for the water element affinity, Levi felt that he would be able to obtain it sooner or later.

Since the teleportation portal could not be repaired in a short period of time, Levi naturally left the overseas land and headed for Flower City.

Flower City.

Seeing Levi return, the Blood Knight and the Black Knight were stunned.

"You didn't succeed?" Anderson asked.

"Yes, the Wizard World has been a little chaotic recently. I'll go back after some time," Levi said helplessly.

"That's great. Since you're still here, why don't you choose a stronghold for the Twilight Knights with us? It's not convenient to stay in Flower City all the time," the Blood Knight said.

"We do need a stronghold." The Black Knight nodded.

"Let me think about it. First of all, the location of the stronghold has to be hidden. From this point of view, the overseas area is not bad. It's far away from the secular world, so it's convenient for everyone to cultivate in peace," Levi said.

"Overseas? Not bad, but how do we get there and take a boat?" Blood Knight asked.

"It's not secretive enough to take the ship. I'll arrange a sea beast for you. If there are new reserve members of the grand knights joining in the future, you can bring them to the training camp of the Twilight Knights. Those who become legendary knights can truly join the Twilight Knights." Levi voiced out his thoughts.

He had Nature's Heart, so it was easy for him to tame the sea beasts in the human world.

"Then let's choose an overseas place, we can find an uninhabited island." The Blood Knight felt that it was feasible.

"I'll find a suitable island during this period of time. Then, you can find some trustworthy craftsmen to forge the temple of our knights."

"Okay, go ahead and choose a location. We'll look for manpower," the Black Knight said energetically.

Levi returned to the overseas area and chose a circle there. In the end, he found an isolated island in the sea where Storm City was located on the coast of the Emerald Kingdom.

The isolated island was not big, only about 10 miles in circumference.

However, as a secret stronghold of the knights, it was more than enough.

Moreover, the weather in this sea area was ever-changing. There was fog, storms, and so on. It was also known as the Devil's Sea.

Therefore, there were very few people here. Very few ships came here.

Levi's eyes flickered as he soared into the sky. Soon, he found a Narwhal playing in the sea.

This Giant Whale was not much smaller than the Dragon King Whale. It was more than enough to be used as a transportation tool.

He descended from the sky.

After a round of cleaning up.

The Narwhal was tamed by Levi. He only needed to use Nature's Heart for a period of time and slowly nurture it into a docile and obedient mount.

As he cultivated in the human world, the preparations for the Dusk Holy Temple were also in full swing.

The first batch of craftsmen was transported here. As for the building materials, Levi had her own storage items. It was not easy to transport them.

In fact, if he was given some time, he would be able to complete the construction of the Twilight Temple.

However, it was better to let others do this kind of work.

However, with the help of all kinds of knights, the foundation of the Dusk Temple was built in a few months. It was a square in the middle of the majestic valley of the island.

Hundreds of craftsmen were busy here. The Black Knight and the Blood Knight were in charge of supervising the work, Yasad was in charge of Flower City, and Andrew was in charge of Storm City.

In this way, if they needed to transport supplies in the future, they could directly transport them from Storm City.

In addition, Levi had arranged for the three godly swords to be given to Anderson. After signing a non-disclosure agreement and changing his appearance, he joined the reserve forces of the Twilight Knights.

They would receive special training from the Blood Knight and the Black Knight. Those who could become divine swords had good breathing techniques..
