

Wizard 538

Chapter 538: Returning to the Wizard World, Gray Incident! (4)

Levi followed the waitress to a room on the second floor of the Celestial Circle Shop.

Here, a thin wizard with freckles and a strange monocle was studying a Wizard Tool.

"This is Newt, a fourth-circle appraiser and also a Third -Circle Wizard. Newt is the best appraiser in our shop. He can appraise any Wizard Tool below the fourth-circle. The accuracy is as high as 99%!"

The waitress said and looked at the thin wizard who looked a little old-fashioned and wooden with admiration.

After she left, only Levi and Newt were left in the house. Newt was silent and was still studying his things.

Levi coughed and hurriedly said, "Senior, please help me appraise these two

Wizard Tools."

He took out the longsword-shaped Wizard Tool and the black cloth-like Wizard Tool and placed them on the table in front of Wizard Newt.

Although Wizard Newt looked ordinary and was even a little stiff and not good at talking, he was a genuine Third-Circle Wizard. He was an existence that Levi needed to look up to.

Even in the Star Sea, Third-Circle Wizards had a good status. They did not have to run around like First-Circle Wizards.

Newt looked at the two Wizard Tools and carefully observed the first Longsword Wizard Tool with his monocle.

Before long, he did not even check the relevant information and seemed to have an answer.

“998 Aether Stones.”

Levi understood and thought that the appraisal fee was really expensive.

However, knowledge was money. This was normal.

He quickly handed the money to the wizard.

Newt accepted the money and said, “This is an Ardelia Flame Sword, a standard Second-Circle Wizard Tool of the Burning Faction. The materials are mithril, fire gilding, black crystal...”

Newt explained the details of this Flame Sword to Levi in detail, including the use of incantations.

Levi had to admire his erudition.

"The material of this magic sword is not bad. If you don't need it, you can sell it to the Celestial Circle Shop," said the wizard.

"I wonder how much this Wizard Tool costs?" Levi asked.

"The production standard of this Wizard Tool is considered inferior among the Second-Circle Wizard Tool. The spells solidified on it are relatively mediocre, but the material is good.

"Moreover, this is the Burning Faction's Wizard Tool. Since there are fewer buyers, if you want to sell it to the Celestial Circle Shop, our purchase price is 8,000 Aether Stones," Newt said.

"Sure."

This Second-Circle Wizard Tool was not very useful to Levi. He only liked defensive Wizard Tools.

Moreover, with the powerful Blood Artifact, the Moonlight Greatsword, Levi was not interested in this standard Second-Circle Wizard Tool.

"I need three days to appraise the second Wizard Tool. Come back in three days. If you're worried, you can also wait in the Celestial Circle Shop for three days." After Newt finished speaking, he closed the door.

"Looks like this Black Wings Birdman's third-circle Wizard Tool isn't simple. Even a four-circle appraiser needs three days to successfully appraise it," Levi thought to himself.

He was also very interested in this Wizard Tool itself, because this Wizard Tool was a combination of escape, defense, and attack. It was very practical.

He was not worried that the Celestial Circle Shop would steal his Wizard Tool, so he walked around outside for the past three days and bought some other herbs along the way. He also inquired about the recent war between the dark and righteous wizards through some taverns in the Star Sea.

So far, the core area of the war between the dark and righteous wizards was mainly divided into two battlefields.

One was the Aether Sea located in the inner sea region.

The Aether Sea was the most important Aether Stone mining base in the Endless Sea. Most of the Aether Stones in circulation were mined here.

Therefore, this place could be said to be the richest and most important area in the entire Endless Sea.

After the war between the dark and righteous wizards, this was also the place where the conflict was the most intense.

The dark sorcerers also wanted to seize control of the sea of Aether and take this money tree for themselves.

The dark wizards and the Star Tower sent their subordinates to fight in this sea area.

It was said that some time ago, there were even high-level wizards who fought in the Sea of Aether, but in the end, both sides were evenly matched and retreated.

The higher one's cultivation level was, the more they cherished their lives.

Most of the time, these high-level wizards would let those low-level wizards fight. They would stay behind the scenes and never attack unless it was a critical moment.

In addition to the Aether Sea, the Underwater Prisons such as Abyss City, where dark wizards were imprisoned, were also core war zones.

These places were all places that had to be fought for. Both sides had invested a lot of troops in them.

The other small-scale war zones for dark and righteous wizards scattered in the inner sea region were the inner sea war zones.

And so on, there was naturally a large-scale war zone in the outer sea war zones.

"I hope Area 9 is fine."

Three days later, Levi came to the Celestial Circle Shop with a heavy heart. Newt's wizard had already appraised the second Wizard Tool.

"3,600 Aether Stones."

Newt said expressionlessly.

Levi gritted his teeth and handed over the Aether Stone.

The higher the appraisal fee, the better the quality of the Wizard Tool.

Obviously, this black cloth Wizard Tool was definitely something good!

"This Wizard Tool isn't a standard Wizard Tool. I'm not sure of its exact name, but that's not important. This Wizard Tool is made of the spider silk of the rare third-circle transcendent creature, the Iron Thread

Spider Matriarch. It's made of extremely sturdy material. Coupled with the solidification defensive spell on it, it can resist third-circle spell attacks for a period of time...."
