

Wizard 542

Chapter 542: Survival in Chaos, Hundred-Eyed Demon King! (3)

The effect of this array was very powerful. After it was hidden, even a

Second-Circle Wizard's Spiritual Perception would not be able to detect it.

Levi stood on a medicinal field and set array flags landing in different sequences and directions.

Then, as Levi chanted an incantation, the medicinal field covered by the Shadowless Maze Array completely disappeared in front of Levi.

At the same time, the Shadowless Maze Array automatically transformed into the color of the Fire Dragon Peak's surface. It was the same as the mimicry. This made the disappearing medicinal field look no different from the surrounding red soil from a high altitude.

"Very good. This way, we can cover all traces of the Black Fire Island's residence and turn this island into a deserted island to avoid being discovered by the passing black wizards."

"Furthermore, when I cultivate in the future, I can continuously refine more arrays. In the end, I can combine these small Shadowless Maze Arrays and turn them into a super large-scale Shadowless Maze Array. I can make the entire island disappear from this sea. This place will become my secret base in this chaotic world."

Levi already had a plan in mind.

Other than that, he could also refine some other first-circle defensive arrays, warning arrays, trap arrays, and so on. He could set them all up on Black Fire Island.

He wanted Schinn, Tyrant, the transcendent creatures, and the living dead to guard the key places.

Once an enemy entered by mistake, he would definitely not be able to return. He would not even know how he died.

After refining a few more sets of Shadowless Maze Array and concealing his cave abode,

Levi continued to cultivate the Meditation Art.

Although he had cultivated many Meditation Arts,

However, he majored in the Burning Faction's Sun Meditation Art.

He now had the Dance of the Fire God and the Child of Hellfire, the two special effects of fire element affinity.

Coupled with the proficiency panel, Levi was already infinitely close to the Child of the Fire Element in terms of the speed at which he cultivated spells of the Burning Faction.

Levi's cultivation speed would not be too slow without the meditation supplementary potion.

Of course, in order to advance to the second-circle as soon as possible, he could not lack potions.

Levi had never stopped working with Grimm Walter.

For Levi today, time is money.

The increasingly chaotic situation made him feel more and more anxious.

Now that the knight realm had reached a bottleneck, the Golden Snake Breathing Technique needed a long time to enter the next realm.

During this period of time, Levi could continuously improve his breathing technique from the horizontal dimension to level 12 to strengthen his polygonal ability. For example, Levi's Blood Beast Breathing Technique now had Schinn's blood as a secret medicine. His cultivation speed was so fast that it was simply unimaginable to Levi before. He believed that it would not take long for him to advance to level 12.

On the other hand, he had to improve his wizard realm quickly. Levi's spiritual power was already at 40 points, and he was not far from reaching the Maximum of a 50-point First-Circle Wizard.

Cultivation was endless. A year later.

Holy Brilliance Calendar Year 1040, Month of Flowers.

Levi's Body of Ghost Fire had finally cultivated to the Maximum of Rank-6.

Level 6 Body of Ghost Fire had finally achieved Levi's goal of elementalization.

He could turn into a ball of green ghost fire after casting the spell and avoid some fatal attacks.

This improved Levi's life-saving ability.

This also meant that all the spells Levi had mastered had been cultivated to the extreme realm.

In addition, Levi had also cultivated the Strength Rune to level 2.

Levi—

Strength Rune: Level 2 (1/5000). Special Effect: Horned Bull Constellation Power (Level 2).

[Horned Bull Constellation Power (Level 2): The Rune Language communicates with the Horned Bull Constellation. The power of stars increases your strength.

Current Strength increases by 15%.]

In the cave abode, Levi looked at the changes in the proficiency panel.

The level 2 Horned Bull Constellation could increase its strength by 15%.

Levi felt that it was time to give it a try.

He planned to try using the Swordsman Mantis first. This way, even if it was broken, his heart would not ache.

After he succeeded in trying on the Swordsman Mantis, Levi tried on Tyrant and finally on himself.

He did as he said.

Levi randomly caught a Swordsman Mantis from the medicinal field and

Turned it off.

Levi began to meditate on the Strength Rune in his mind according to the introduction of the Book of Starforge Runes. Then, he began to solidify the

Strength Rune step by step...

The next day.

After a day, when Levi's 43 points of spiritual power were almost depleted, the Strength Rune finally solidified on the Swordsman Mantis.

He wiped the sweat off his forehead and looked at the Swordsman Mantis.

Now, on the back of the Swordsman Mantis, there was a pattern that was exactly the same as the power rune in his mind. It was shimmering and faintly discernible.

Levi activated the Swordsman Mantis and took out another Swordsman Mantis that had not solidified as a comparison experiment.

He gave the order for the two alchemical creatures to pull each other.

As the two Swordsman Mantises fought,

It did not take long for the outcome to be decided.

The Swordsman Mantis, which had solidified the Strength Rune, easily dragged the unsolidified mantis over. This 15% increase in strength was indeed real.

This made Levi ecstatic.

The Swordsman Mantis was not good at Strength, so the 15% increase might not have much effect. However, the Corpse Digger's strength was especially huge, and it was only slightly inferior to his level 12 Red Lotus.

If he added this Strength Rune, the Corpse Digger's strength would not be weaker than his, and might even surpass his..
