

Wizard 543

Chapter 543: Survival in Chaos, Hundred-Eyed Demon King! (4)

The Strength Rune was different from other solidification spells. It could be disassembled.

Levi drank the potion and meditated to recover his spiritual force.

Then, he chanted an incantation. The pattern of the Strength Rune on the back of the Swordsman Mantis slowly left the Swordsman Mantis and floated in the void. It was very dreamy.

Then, under Levi's control, this rune arrived on the Corpse Digger.

After solidifying the Strength Rune, Ace entered the Corpse Digger's body. The Corpse Digger stood up while burning with flames.

With a bang, it smashed towards Levi.

Levi laughed loudly and suddenly collided with the Corpse Digger.

The cave seemed to tremble as the two muscular monsters collided. Levi and the Corpse Digger both took a few steps back.

"Not bad, not bad. This 15% increase is very effective. I'll try solidification on myself in the future."

Levi felt that if he used it well, the Rune Language would be very useful.

However, Levi still did not dare to try to solidify the Strength Rune on himself. After all, it was not written in the book at all. It would not be worth it if he went berserk.

He planned to try again after his breathing technique advanced to level 13.

During this period of time, apart from cultivation,

Levi was also asking about Marlene and the others, but there was still no news.

Levi felt that with Ms. Marlene's personality, she would probably leave some information for him to prevent him from worrying when he returned to the Wizard World.

From the looks of it, Marlene and company might not be out of danger, so they didn't have the time to contact him. Or rather... they didn't want to contact him for fear of implicating him.

Levi had also contacted Dinos in Area 9. Levi learned from Dinos that before the war between the dark and righteous wizards, Emperor Mu had become the guardian of the Golden Lion Jostar Family as Teacher Dinos. After that, he basically stayed in the Golden Lion Jostar Family.

Therefore, Emperor Mu's own safety was still fine. After all, with the Golden Lion Jostar Family's strength and background, there was no force in the outer sea region that could be shaken for the time being.

Of course, this did not mean that the Golden Lion Jostar Family could rest easy.

In fact, on the Yellow Earth Continent, the Flame King Al Hidd Family and Whale Song Island attacked almost at the same time. They joined the dark wizard camp and began to sweep through the small wizard organizations on the Yellow Earth Continent.

The Wham Family, which had always been relatively neutral, judged the situation and immediately formed an alliance with the Golden Lion Family to receive the first wave of attacks from Flame Prince Lehman Al Hidd.

Levi also asked Dinos to use his family's power to help Levi investigate the whereabouts of Marlene and the others.

At this moment, the benefits of having a wizard family were obvious. Levi, who was alone, was not as efficient in many things as a wizard family.

In this tense atmosphere, another year passed.

The fourth year of the Great Expedition.

Holy Brilliance Calendar Year 1041, Month of Vitality.

Levi had already returned to the Wizard World for the second year.

In the past two years, the entire Endless Sea had been in chaos.

More and more evil gods appeared. Under the high-pressure rule of the Pan-Plane Wizard Council, some wizards with ulterior motives wanted the world to be in chaos and used various methods to add fuel to the fire.

In the past two years, the Star Tower had been in a terrible fix. They had repeatedly requested the headquarters of the Pan -Plane Wizard Council to send Grand Wizards or Legendary Wizards to suppress the rebellion.

However, the Wizard Council was also suffering. The expedition had taken away nearly half of the Legend Wizards. Now that they were halfway there, there was no way they could turn back.

As for the other planes, there were also signs of chaos. The Wizard Council had to take care of the overall situation.

At this moment, they realized that after conquering one plane after another smoothly in the past, everyone seemed to be used to the power of wizards and had forgotten the simple principle.

It was easy to fight, but difficult to defend.

The current wizard civilization was like a severely incongruous train that pulled the Federation planes forward. The carriages were already in chaos.

At this moment, the rulers of the Wizard Council also realized that the entire wizard civilization, from the Wizard World itself to the subsidiary civilizations below.

All of them needed to be cleansed thoroughly!

Of course, even if the sky collapsed, the tall one would hold it up.

These things were not for a small fry like Levi to worry about.

However, from the battle reports sent from the front line, he realized that the next hundred years or even a thousand years would pass.

The Magus Council, which had been stable for too long, would face a huge test. The peaceful and peaceful years of cultivation would never return. Order began to gradually collapse. In the future, breaking the law and committing crimes would become a norm. The Vmzara Council also not have the energy to protect the safety of Levi, a low-level member.

Levi could only rely on himself!

In the past year, Levi had been continuously refining more and more Shadowless Maze Arrays, trying to completely hide the entire Black Fire Island in the vast sea and live a life of seclusion.

On the other hand, his cultivation did not fall behind. He had completely given up on sleeping and rest activities. He relied on meditation and potions to circulate at full capacity.

After this period of hard work, Levi's Sun Meditation Art had reached the Maximum of level 5.

This also meant that Levi's current spiritual power had reached the limit of a First-Circle Wizard, 50 points..
