

## **Wizard 544**

Chapter 544: Survival in Chaos, Hundred-Eyed Demon King! (5)

"Spiritual force: 50 points."

"Spell power: 820 points."

Next, Levi still needed to slowly max out his spell power to advance to the second-circle. Then, he had to build a second-circle spell model and prepare the breakthrough potion for breaking through the second-circle, Eye Devil's

Gaze.

Among them, the most difficult was the refinement of the Eye Devil's Gaze potion. This was because up until now, Levi had yet to obtain the core main ingredient, the Eye of the Devil.

As for the second-circle spell model, according to Levi's personality, he would definitely use the second-circle defensive spell as his first model. However, Levi had not thought of which second-circle defensive spell to use yet, but there was no doubt that this spell should belong to the Earth Faction or the Ocean Faction.

After advancing to the second-circle, Levi could choose a second-circle defensive spell to build his second-circle defensive field. This would be the distinguishing characteristic of a Second-Circle Wizard compared to a First-Circle Wizard.

After possessing a second-circle defensive field, coupled with Levi's level 12 Golden Snake defense and his powerful physique, he would become a complete meat shield and buffalo. As long as he didn't encounter a powerhouse with a large realm like the Third-Circle Wizard, he wouldn't be invincible below the third-circle.

In addition to the cultivation of wizards, Levi's new breathing techniques and skills in the human world had also improved. The Inferno Dragon Breathing Technique was getting closer and closer to the maximum of level 11. He believed that it would not be long before it could fuse with the Undying Bird Breathing Technique and mutate into a new physique breathing technique.

As for Maya, Musk Bull, Jade Dragon, and Mountain Ape breathing techniques, they were all improving by leaps and bounds.

According to Levi's plan, he should be able to cultivate the Blood Beast Breathing Technique to level 12 in less than a year. This way, he would be able to increase his strength by a large margin.

Unfortunately, things did not go as planned.

Just when Levi thought that he could become a Second-Circle Wizard in such a peaceful manner, another message came from his membership card.

[Pan-Plane Wizard Council Number... Member 9527 Levi. According to the

Pan -Plane Wizard Council Military Service Plan, you are now informed to report to Bass Island in Area 9 within a month. Due to your special identity as a First-Circle Pharmacist, you will be sent to the rear of the sixth warzone in the inner sea region to refine the potions needed during the war as a military pharmacist.

[This recruitment is compulsory. The wizard civilization is facing a crisis that has not happened in thousands of years. I hope that every wizard can prioritize the safety of their civilization and consciously obey the management of the Pan-Plane Wizard Council. Violators will be listed as dark wizards and be wanted by all wizards.]

He looked at the announcement with a solemn expression.

The second round of recruitment for the war between the dark and righteous wizards of the Endless Sea began, and Levi, unfortunately, was chosen.

The good news was that Levi was only chosen as a logistics personnel to refine potions. He did not need to go to the frontlines of the battle.

"Sigh, it's a blessing, not a curse. If it's a curse, it can't be avoided. What's supposed to happen has still come." Levi sighed.

During the first Five Sector Expedition, Levi managed to avoid being recruited.

The second time, he happened to be in the human world and dodged it.

He did not expect that the third time would come so quickly.

This was destined to be unavoidable. As long as he wanted to cultivate in the Wizard World, Levi had to face all of this in the end.

"The sixth warzone in the inner sea region," Levi muttered to himself.

The sixth warzone in the inner sea region was adjacent to Area 7, but it was many times larger than the outer sea region.

The announcement told Levi to go to Bass Island within a month. There would be a Star Tower military wizard airship that would bring all the recruited wizards in Area 9 to the military camp in the sixth warzone.

The enemies Levi and the others were going to face were not regular dark wizards, but monsters that spread out from the Hundred -Eyed Demon Territory.

Levi looked at the information this time. In the end, he suddenly realized that he could actually make a trip to the sixth warzone.

Because, in this place.

He seemed to be able to find the Beholder he needed.

"Hundred-eyed Demon Lord, the demon lord of the 108th level of the Abyss. This demon lord evolved from the lowest level of eye demons and eventually became the co-ruler of all beholders in the Abyss."

Of course, with Levi's strength, he naturally wouldn't dare to have designs on the Hundred-Eyed Demon King. That was an existence that could blow Levi to death with a single breath. However, there should be ordinary Beholder soldiers under the Hundred -Eyed Demon King.

If he could kill one, the last main ingredient he needed to advance to the second-circle would be solved.

Considering that he was only in the logistics department, it should not be too dangerous.

After being recruited, Levi's wartime merit system would also be released. If he successfully refined and handed over the potions, he would be rewarded with points from the military. At that time, he could buy the spell books and other knowledge inheritances he liked from the military's exchange shop, or some rare materials.

Moreover, the materials and formulas for the refinement of the potion were provided by the military. It was equivalent to Levi being able to use the military's resources to cultivate pharmaceutical skills for free.

Thinking of this, Levi suddenly felt that this recruitment was also an opportunity for him to become stronger.

With this in mind, Levi began to prepare intensively.

Moreover, they arrived at Bass Island a month later..
