

Wizard 545

Chapter 545: Blood Beast Breakthrough, Fourth Special Effect! (1)

Before leaving Black Fire Island, Levi harvested another wave of secret medicine from his cute pets.

These secret medicines should be enough for Levi to use for about a year.

He did not have a storage bag that could store living creatures in a large space. Otherwise, he could bring them with him to join the army.

This way, it would not delay his cultivation of the breathing technique. Of course, Levi felt that with the military's reserve of resources, he should be able to exchange the resources needed for these secret medicines with Aether Stones or points.

In addition, he also brought the Corpse Digger, Ace, Schinn, the living dead, and Levi.

The sixth warzone was the inner sea region. His cultivation as a First-Circle Wizard could not be said to be not worth mentioning. It could only be said to be ordinary.

With these helpers, Levi's chances of survival were higher.

As for the Black Fire Island and the transcendent creatures that could not be taken away, Levi could only leave it to fate.

He had already used the Shadowless Maze Array that he had refined for the past two years to cover up his cave abode and medicinal field.

If Levi was given more time, he could hide the entire Black Fire Island and disappear into this sea. This way, Levi would not have to worry about the Black Fire Island being stolen every day when he went out in the future.

Holy Brilliance Calendar Year 1041, Month of Grass.

Bass Island.

Levi's figure slowly arrived.

There were a lot more wizards in the port now than the last time Levi came.

There were nearly 20 First-Circle Wizards and two Second-Circle Wizards. Levi had seen one of them before. He was Emperor Mu's former boss, the Island Master of the Sighing Sea Breeze, and the senior second-circle wizard, Sage Mason.

Sage Mason didn't look too good. His wrinkled face was expressionless, and he exuded a sense of dejection.

This Second-Circle Wizard was even older than Herman, and the lifespan of a Second-Circle Wizard was only about 300 years. In addition, he had been severely injured by Morpheus some time ago, which made Sage Mason, who was already at the end of his lifespan, even older.

If he couldn't break through to the third-circle, then Sage Mason would most likely stay in Area 6 forever...

Levi looked at the wizards. Many of them were the remnants of the exterminated wizard organizations in Area 9.

After the organization was destroyed, they had no fixed residence and wandered around, becoming nomadic wizards.

From the looks of it, he had also been recruited into the army like him.

"It's a pity that there's no one from the Gray Tower. Where did Ms. Marlene and the others go... Were they called away too?" Levi sighed.

Levi's arrival did not cause any waves among these people. He found a place to stay and waited for the arrival of the military airship.

After three years of war, the wizards were even more vigilant and cold than before.

After all, no one knew if your former companion would one day become a black wizard who had turned against you.

While waiting for the military to arrive, Levi quickly increased his strength.

During this period of time, First-Circle Wizards and apprentice wizards came to Bass Island one after another.

Levi estimated that other than the wizards who needed to guard the Monsoon Tower and fight against Whale Song Island, the other wizards who tried to bluff their way through like him had all been recruited.

Moreover, Levi also learned from the conversation of the other wizards that the passage from the Endless Sea to the human world had been completely sealed!

This was because some wizards used this loophole to try to go to the human world to avoid being recruited.

'This time, I'm really serious,' Levi muttered to himself.

In fact, when Levi came to the Wizard World from the human world, he had already thought that the Pan-Plane Wizard Council might do this.

But he still came.

If he stayed in the human world, with his strength, as long as he did not cause trouble, he could definitely die peacefully.

But then his life would be meaningless.

He liked to hide, but it did not mean that he was idle and waiting for death. Only in the Wizard World could Levi improve and have a chance to reach the peak step by step to see more scenery and live a long life.

Levi had no regrets about that.

During the Month of Flowers.

The rumbling wizard airship landed on Bass Island.

All the enlisted wizards and apprentice wizards looked up at the huge airship that was a thousand meters long.

This was the military airship that the Seven Waters Steeple had customized for the Star Tower, the Cloud Whale.

It was said that even Intermediate Wizards could not break through the defense of this wizard airship. It was even equipped with alchemy cannons comparable to intermediate spells.

The Cloud Whale slowly descended and floated on the sea.

The cabin door of the airship opened, and rows of official wizards in army robes lined up on both sides.

Then, a middle-aged wizard with a powerful aura and wearing a capable outfit alighted from the ship.

This was a Fourth-Circle Wizard, who was also a powerhouse in the inner sea.

"My name is Guerdo, and I'm a commander of the Star Tower's Sixth Legion. I'm in charge of this recruitment, and I'll be in charge of you in the future.

"Time is of the essence, so let's not waste any more time. The wizards who were called to report immediately. In three days, we will rush to the sixth warzone."

The Fourth-Circle Wizard named Guerdo said.

Levi could feel the tension on the front line from the words and actions of these officials.

Soon, Levi was called over. He hurriedly ran to a Second-Circle Wizard with a solemn expression.

"Levi from the Gray Tower, right?" the wizard asked.

"Yes, My Lord."

"Yes, a first-circle pharmacist. Not bad. This is the recruit manual. Take a look at it during the journey. This bracelet is a military merit bracelet. You can check your current military merit quota through the bracelet. This will also be a settlement tool for you to exchange for resources at the Tower of Merit. Take good care of it.."
