

Wizard 546

Chapter 546: Blood Beast Breakthrough, Fourth Special Effect! (2)

The wizard handed a slate and a bracelet to Levi. After receiving them respectfully, Levi came to the interior of the Cloud Whale Airship.

Currently, there were already more than a hundred apprentice wizards and wizards from Area 9 sitting here.

Unlike the great expedition, only official wizards were qualified to be recruited. In this kind of civil war, apprentice wizards and even some special mortals would usually be brought to the battlefield.

After all, although apprentice wizards were weak, they could do some basic and unskilled work in the logistics department.

Levi opened the recruit manual and browsed through the contents. Not long after, a voice sounded.

"Sir Levi? You're here too." A familiar figure came up to Levi and said with a bitter smile.

It was the Second-Circle Pharmacist, Grimm Walter.

"Grimm, we meet again." Levi smiled helplessly.

"Sigh, I have no choice. A big shot from the military wants me to go and provide support. How can I not go?" Grimm sighed.

As a Second-Circle Pharmacist, his connections and background were much stronger than Levi's. If he knew a big shot there, his safety would be guaranteed in the future.

"Sir Levi, your cultivation level has improved even more than before. On the other hand, I'm still in the senior first-circle wizard realm and have yet to break through to the second-circle." Grimm said enviously, sensing that Levi's mental fluctuation was much stronger than before.

"I just happened to gain something recently. It's easier said than done to advance to the second-circle." Levi sighed.

Speaking of which, he was over 50 years old and had entered the age of Knowing Destiny.

Now, he was about to advance to the second-circle.

This speed was similar to what he had estimated back then.

It was not enough to compare to the top, but it was more than enough to compare to the bottom.

According to the information he had obtained some time ago, Jagri, who had entered the Wizard World with him, had the talent of a dual-elemental affinity and was personally guided and nurtured by the Third-Circle Wizard Morpheus. He had just advanced to the first-circle not long ago.

Wizard talent was only one aspect. The cultivation of wizards also affected perseverance, luck, willpower, and other aspects.

Someone like Grimm could definitely advance to the second-circle, but his achievements in this life would most likely stop here. Not long after, another familiar person arrived on the airship.

Wind-Chasing Arrow, Kankur.

The black wizard hunter who lived in the Blacksail Wizard Market.

Levi thought that he had died in the war some time ago. He did not expect that he was still alive and had been recruited.

However, Kankur did not recognize Levi. When Levi met him back then, he did not use his original appearance. Coupled with the fact that they had only met once and did not contact each other after that, it was normal that he did not recognize him.

Three days later.

The Cloud Whale Airship slowly floated into the air. Levi looked out the porthole at the waters of Area 9.

"I'm alive."

Levi muttered to himself.

This was the only goal he had set for himself in the following period of time.

He believed that as long as he was alive, after experiencing this wave of tempering, he would definitely be able to advance to the second-circle, or even the third-circle, and walk further on the path of a wizard.

Of course, he also hoped that his Black Fire Island would be safe and that those transcendent creatures would be fine.

After spending more time with them, Levi didn't just treat them as chives. She still had some feelings for them.

According to the recruit manual, there was no duration for this military service until the situation in the sixth theater stabilized.

Therefore, Levi felt that he might have to spend a long time in the sixth war zone.

Of course, Levi would have a three-month break every three years as long as he completed the military's mission. He had to exchange it with merit points.

All in all, it was quite humane.

The Cloud Whale was very fast.

It only took less than ten days.

Levi and the others crossed thousands of mountains and rivers to reach the sixth warzone.

Then, it stopped in front of a huge island.

Above this huge island, there was a huge city floating there quietly.

Seeing this floating city, the bumpkin wizards from Area 9 and the other Outer Circle Areas gasped.

"Is this Sky City?" a wizard asked in surprise.

Sage Mason said, "This isn't Sky City. It's just a floating city. The difference is like a thousand miles.

"Sky City was a war fortress that only Legendary Wizards could control. It represented the most advanced technology of the wizard civilization. You can see Sky City as a huge Wizard Tool.

"Floating City, on the other hand, is a city built using some islands that contain special magnetic forces and magnetic repulsion characteristics."

"Thank you for clarifying my doubts, Senior." The wizard scratched his head in embarrassment.

"It's alright. I'm just an old man who knows a little more," Sage Mason said.

No matter what, Floating City was enough to shock Levi and the others.

From time to time, military wizard airships would fly in and out of the floating city. There were also some wizards flying around.

"This is Riptide City, one of the military fortresses directly managed by the Star Tower. It will also be your camp in the future. In the future, you will all live in this city during non-mission periods.

"The two city lords of Riptide City are two high-level wizards of the Star Tower.

"The Current Controller, Lady Krysten, and the Air Current Conductor, Wizard Eyre.

"Lady Krysten and Wizard Eyre were a famous wizard couple in the Endless

Sea. They were both sixth-circle primordial soul wizards.."
