

## **Wizard 547**

Chapter 547: Blood Beast Breakthrough, Fourth Special Effect! (3)

"If the couple joins forces, they can fight a seven-circle primordial soul wizard.

"With their protection, you rookies will be very safe in this city."

Guerdo said.

Levi heaved a sigh of relief when he heard that.

It seemed that his future workplace would be in Riptide City.

After all, he was a pharmacist. There was no need for him to fight at the front line.

From the looks of it, as long as Riptide City was not breached, his life was basically not in danger.

And the most dangerous enemy in the sixth warzone was none other than the Hundred-Eyed Demon King himself. If he came personally, the couple would naturally deal with him.

The entire Riptide City was divided into four areas, the Riptide Steeple, the Upper Riptide, the Middle Riptide, and the Lower Riptide.

The Riptide Steeple was where the city lord and the other high-level officials lived. Those who could be called high-level officials in this place were all experts above the Intermediate Wizards. They were usually the commanders of various armies, such as Guerdo.

They were enough to establish a Third-Circle Wizard organization in the outer ring. This place was the core decision area. These higher-ups needed to plan military operations every day and deal with powerful enemies that might come.

As for the upper, middle, and lower Riptide areas, they were divided into different functional areas.

For example, the Tower of Merit was in Upper Riptide. The Tower of Pharmacists, the Tower of Array Wizards, and the Tower of Weapon Craftsmen were all in the middle city area. As for the various military camps where the combat wizards were, they were all in Lower Riptide, responsible for protecting the safety of the entire city.

Generally speaking, the stronger one was, the higher one's status was, and the closer one lived to the inside.

The deeper they went, the safer it was, and the more beneficial it was for cultivation.

After all, the entire Riptide City was a large array that gathered elemental power. The closer it was to the center, the richer the elemental power.

Following that, under Guerdo's lead, Levi and the rest were brought to a military camp in the city area below Riptide City. The new recruits were going to be divided into shifts here.

A fierce-looking witch in an army robe held a notebook and said, "The pharmacists among the new recruits, and the high-level pharmacy apprentices, step forward."

Upon hearing this, Levi, Grimm, and nearly fifty pharmacists and Pharmacy apprentices from the nearby districts all stood up, feeling uneasy.

"Ten First-Circle Pharmacists and three Second-Circle Pharmacists. This batch of recruits is not bad. Next, follow me."

Levi and Grimm looked at each other and followed.

Before long, the witch brought Levi and the others to a wizard tower in the middle city area.

"This is the tower of pharmacists. All the pharmacists in charge of logistics and pharmacy in Riptide City are here.

"This is also where you will work in the future. The daily assessment targets for pharmacists of different levels are different.

"As long as you complete your quota that day, the rest of the time, whether you cultivate on your own or accept missions to earn merit points will be up to you.

"You are precious pharmacists, so the Star Tower won't make too many excessive demands on you and won't let you carry out dangerous missions. I hope you cherish your life.

"At the same time, you have to complete the daily assessment target!

"This is a hard rule. If the battle wizards at the front line can't fight in peace because of your laziness, it will be your negligence! You will be severely punished by the military of Riptide City!

"Of course, every time you refine a bottle of qualified potion, you can obtain the corresponding merit points. The more you work, the more you earn. It's absolutely fair.

"If you lack money or knowledge, this is a good opportunity for you to turn things around. I hope you can make good use of it!

"For the rest, you can read the manual's introduction yourselves. We will give you recruits three days to adapt.

"If you can't complete the most basic assessment during these three days of adaptation, you will be sent to Lower Riptide to join the ranks of combat wizards."

After this swift and decisive witch finished speaking, she left a group of dumbfounded wizards in a daze and left alone.

Then, an energetic White Robe Wizard with a completely white beard and hair appeared here with a staff.

This was the Tower Master of the Tower of Pharmacists, the fifth-circle pharmacist, the Green Forest Sage, Clement.

This Wizard Clement was also a Fifth-Circle Wizard. He would be Levi's boss in the future.

Of course, most of the time, nobodies like Levi would not be able to meet this big shot.

However, today was the day of the welcoming ceremony. This big shot took some time out of his busy schedule to brush off Levi and the others.

After a round of empty talk and stimulation, the Green Forest Sage returned to the top floor of the pharmacist's tower.

A short Gray-Robed Wizard, who seemed to be only 1.5 meters tall, came to Levi's side.

"I'm Huffman. There are a total of five third-circle pharmacists in the Tower of Pharmacists. I'm one of them. From now on, I'll be in charge of assigning you pharmaceuticals missions and assessing the results of your missions.

"Those who know me know that I have an extremely high requirement for the quality of the potion. Therefore, I hope that you will be more careful when you refine the potion. Otherwise, don't blame me for being heartless if you can't pass the assessment."

This short wizard's voice was sharp. He was not tall, but he had a lot of style.

The newcomers were displeased with his show of strength, but they did not dare to say anything.

After all, their future fates were in the hands of this shorty. If they angered him and he made things difficult for them, they would definitely not have a good time in Riptide City..
