

Wizard 551

Chapter 551: Transcendent Perception Advancement! Domineering Vision? (2)

After obtaining the formula, Levi went to the warehouse to collect the ingredients for the Pharmacy.

Huffman looked at Levi's back and couldn't help but sigh. "Young people these days really can't understand."

After returning home, Levi quickly started researching the Iceheart Potion.

Ice Crystal Grass, Snowtail Feather...

If not for the military providing these potions, Levi would have wasted a lot of time looking for them outside.

In the following days, Levi studied the new potion formula while cultivating.

Ten days later, he began to refine the Iceheart Potion. The difficulty of this potion was about the same as Naga's Blessing. To the current Levi, it was actually not difficult. It was just a waste of time to refine it.

Levi took five sets of potion ingredients and finally succeeded in refining three Iceheart Potions. The success rate could be said to be very high.

After hesitating for a long time, he finally brought the successful potion to Huffman's room.

"Were you successful?" Huffman asked.

"Yeah." Levi nodded.

He stopped pretending. He was a pharmacist genius. He had laid his cards on the table.

In any case, other than potions, he also had arrays, alchemy, weapon-making, and knights. There was no harm in exposing one of his trump cards.

This was more beneficial to his future development in Riptide City.

Huffman was slightly shocked and said, "Bring the potion over, and let me take a look."

Levi handed over the three Iceheart Potions nervously.

When Huffman had finished his inspection, he gave a rare smile. He looked up at Levi with approval in his eyes.

"Alright, looks like you've come to your senses. There's really no need to be so secretive.

"Our Tower Master, the Green Forest Sage, developed an original first-circle potion formula when he was 40 years old and became a scholar of the Pan -Plane Wizard Council.

"After that, he was accepted by a high-level wizard organization. Now that 400 years had passed, the Tower Master was already a fifth-circle pharmacist and a level-four scholar.

"His original potion formulas had passed the certification. There were a total of twelve of them. Compared to the Green Forest Sage, both you and I could only be considered ordinary.

"There is no need to mention the two city lords of Riptide City. Lady Krysten is a Water Element Child, and Wizard Eyre is a Wind Element Child.

"This is Riptide City, not your outer sea region. Here, you might see so-called geniuses every day. Everyone is used to it, and most people won't be jealous of you or frame you because of this."

Huffman said, meaning that Levi shouldn't play tricks like this. His talent was really nothing in Riptide City.

Levi nodded. After being lectured, he returned to his room dejectedly. He heaved a sigh of relief and sighed.

"Damn it, the tides will turn. Sooner or later, I'll slowly develop into a big shot in Riptide City."

To be able to make a name for themselves in Riptide City, they basically had to make a name for themselves in the Endless Sea.

End the fantasy and return to reality. Levi opened his military merit bracelet.

“40 merit points.”

“10 bottles of health potions, 1 point of hard work per bottle. It’s better than nothing. And these three bottles of Iceheart Potion, 10 points per bottle. That’s the difference.”

According to the recruit manual, every level-one monster killed in the military’s extermination event was worth 50 merit points.

It seemed to be five times more merit points than Levi’s, but it was actually physical work.

Levi only needed to sit in the office every day and practice medicine. Although it was little, it was stable and safe.

"Only by mastering a skill can you survive in another world. After learning the three skills of wizardry, you won't be afraid even if you travel the world!"

Moreover, because the Iceheart Potion was a new potion, Levi could also obtain a lot of Proficiency when refining it.

It could be said to be killing two birds with one stone.

"Next, I have to refine 30 Iceheart Potions every month and obtain 300 merit points. That's 3,600 merit points a year. From the looks of it, it's not difficult to earn merit points."

One pill a day did not take much for Levi. With the remaining time, it would not delay Levi's cultivation. If he lacked merit points, Levi would refine more.

Levi put his hands behind his back and happily left the Tower of Pharmacists. He headed to the Tower of Merit. He could not wait to see what good things were inside.

It had to be said that the Upper Riptide was much better than the Middle Riptide. The deeper he went, the more he could feel the rich elemental power.

"Buddy, are you renting a house? You can get a small courtyard in the Upper Riptide for 1,000 Aether Stones a year." A wizard in a black robe ran to Levi and asked.

"A thousand Aether Stones? You could have just snatched the money." Levi was speechless and directly refused.

Although this was the Upper Riptide, a thousand Aether Stones a year was too expensive. Most low-level First-Circle Wizards could not earn that much in ten years.

His money was hard-earned.

Levi did not have any requirements for the place he lived in. All he wanted to do now was to save money and buy Minnie Miaomiao House for his precious transcendent creatures so they could live in a spacious house.

This way, they could always be with Levi, making it easier for Levi to bond with them at any time.

“200,000 Aether Stones! I’ve already completed one-sixth of it! Perseverance is victory!”

Tower of Merit.

There were people coming and going here. It was very lively.

As soon as he entered, the phantom image of a thick book flew up and floated in front of Levi..
