

Wizard 552

Chapter 552: Transcendent Perception Advancement! Domineering Vision? (3)

At the same time, pages of the book unfolded, and all kinds of dazzling things flew in front of Levi.

In short, the items that could be exchanged in the Tower of Merit were mainly divided into five categories: Wizard Tool, Potion, Array, Knowledge, and Materials.

Levi did not lack potions and arrays. He could make them himself, so he naturally would not waste money to buy them.

As for the Wizard Tool, Levi could also make it. However, considering that he urgently needed a Wizard Tool similar to Minnie Miaomiao House, he patiently checked the Wizard Tool section.

Unexpectedly, he had really gained something.

"Third-circle Wizard Tool— Greenfield Immortal House, 100,000 merit points. "

The Greenfield Immortal House was once the Bug House of a dark wizard from the School of Insects. It contained a subdimensional space with a circumference of ten acres and a height of about ten meters.

There was even grassland, a small forest, and a mini lake.

Although the sparrow was small, it had everything. It felt like a small grotto heaven.

"Although it's a little crowded, it's barely enough. After all, by the time I save enough money, Minnie Miaomiao House might have already been sold. I can't hang myself on a tree."

Levi pondered.

The benefit of the Greenfield Immortal House was that he did not need to spend Aether Stones. For 200,000 Aether Stones, Levi would have to save up for years even if he did not eat or drink.

As for the 100,000 merit points, if Levi worked a little harder and worked overtime, he would be able to save them within ten years.

It might not even take so long. After all, after Levi became a Second-Circle Pharmacist, he could refine more valuable second-circle potions.

Moreover, other than refining potions, Levi could also go out of the city to carry out demon-hunting missions and earn more merit points. However, it was a little dangerous and inefficient. Levi was just unwilling to do this.

"The first item on the shopping list is Greenfield Immortal House. I hope no one will snatch it from me."

After looking at the Wizard Tool, Levi looked at the knowledge category.

In the general knowledge category, there were also spell books, Meditation Arts, potion formulas, Wizard Tool blueprints, alchemy blueprints, array blueprints... breathing techniques.

"Wait, breathing technique?"

Levi was surprised to find that there was a breathing technique in the last column of the knowledge list.

"Interesting. There's actually a breathing technique that can be exchanged for in a wizard's place? Who would exchange for this thing? This is something that requires a bloodline to cultivate. When cultivated to the extreme, it will only be at the level of a First-Circle Wizard. It can't be that all of them are

Non-bloodline Breathing Techniques, right?"

Then, out of curiosity, Levi opened the breathing technique column.

He was stunned. It was actually a Non-bloodline Breathing Technique...

"Mud Turtle Breathing Technique, Wondrous Frog Breathing Technique, Fire

Snake Breathing Technique, Wild Boar Breathing Technique, Fog Tiger

Breathing Technique...”

Levi finished reading all of them. There were nearly a hundred breathing techniques in total. Without exception, they were all Non-bloodline Breathing Techniques!

Moreover, they were all shallow breathing techniques. There was not even a single excellent one.

The names of these breathing techniques looked very unassuming. The symbol behind them must be ordinary.

Perhaps even if he could break through the limit to the end and cultivate to the realm of the Primordial Ancestor, he would only be about the same as the middle-level and high-level transcendent creatures in the Wizard World.

According to his experience in the human world, the Non-bloodline Breathing Technique was basically shallow in quality. Furthermore, it was rare. He had been in the human world for so many years and had not gathered much.

He suspected that the reason why it was rare was that these wizards had consciously collected it into the Wizard World. Although the wizards in the Wizard World did not need this thing, many people without wizard talent could use it to cultivate.

"Perhaps the officials also have the Bloodline Breathing Technique, but they didn't put it up for the public to exchange."

Thinking about it, it made sense. In the long history of the Wizard World, there should be thousands of knights who entered. In the end, after all kinds of circulation, there should be many breathing techniques flowing into the government.

Although wizards did not like breathing techniques, they would not destroy them. They must have kept them.

"No matter what, this is also an opportunity for me. These Non-bloodline

Breathing Techniques can be used as raw materials for my breakthrough in the future. In particular, there are a few Perception-type breathing techniques. It should be enough for my Heavenly Owl Breathing Technique to break through to level 9. When that time comes, my Transcendent Perception will improve further."

Levi checked the price of these breathing techniques. They could be said to be very cheap.

On average, the exchange price for a breathing technique was 5 merit points.

From the looks of it, these breathing techniques were most likely prepared for some mortals in Riptide City who did not have wizard talent. Otherwise, they would not be sold so cheaply.

Of course, if a wizard was interested, they could also spend some money to learn a breathing technique and experience the feeling of being a knight.

Levi tried to spend 5 merit points in exchange for a Wondrous Frog Breathing Technique.

This was a Perception-type breathing technique that could be cultivated to the Maximum of level 6, similar to the Man-Faced Spider Breathing Technique.

After exchanging, a memory slate immediately appeared out of nowhere and landed in Levi's palm.

"It looks like the breathing technique inheritance diagram is engraved on the memory slate. Although it's not the original, with the level of a wizard, there's definitely no mistake."

Levi examined the slate with his spirit. It was exactly as he had imagined. Furthermore, with his current realm, he could naturally tell that this inheritance diagram could be cultivated and was not deliberately faked..
