

Wizard 556

Chapter 556: Advancing to the Second -Circle! (2)

In the end, in Riptide City, Old MO became an assassin under a certain big shot and especially dealt with some obstacles for that big shot.

Old MO did this not because of money, but purely because of his passion.

He liked the despair in the eyes of the enemy before he killed them. The terrifying howls could give him a strange pleasure.

"Killing a First-Circle Wizard doesn't give me any sense of accomplishment." Old MO felt helpless.

In order to be a better assassin, Old MO cultivated shadow-type spells. He was good at stealth, tracking, and assassination. Many Second-Circle Wizards had died under his hands.

There was even one time when Old MO defeated the strong and killed a second-circle senior wizard.

Therefore, if the enemy treated Old MO as an ordinary Second-Circle Wizard, he would die without a burial place.

"Wizards pay more attention to research. Under the protection of the laws of the Pan-Plane Wizard Council, some wizards have never used spells in actual combat all year round or even their entire lives. Their actual combat ability is too weak, and their consciousness is also lacking."

This was Old Mo's evaluation of the wizards he killed.

He was different. He had been through countless assassinations in the human world.

Knights had only one method, so everything they cultivated was for combat and killing. Every great knight was not simple.

Unfortunately, it was the end for a knight to become a legendary knight.

Old MO had cultivated his ancestral breathing technique to the limit, but he still hadn't touched the threshold of the legendary knight.

"This world is only starting to get interesting now."

Old MO looked out of the window and seemed to see the flames of war that filled the Endless Sea. The faintly discernible flower of death was blooming.

This was the worst time for everyone else. This was the best time for Old Mo.

A Magus Tower that was 1,000 feet tall stood on an isolated island in the sea.

This was one of the strongholds at the front line. The wizard tower itself was set up with a powerful fourth-circle array that was enough to resist the attacks of level-four monsters.

The wizard airship slowly landed beside the wizard tower.

Levi followed the others out of the airship.

"The eye demon is 400 miles east of this stronghold. I hope I can find something."

Generally speaking, demons also had some territorial awareness. Level 2 demons could be considered elites among the demon army.

In fact, Levi only needed the eye of a level-one eye demon to refine the Eye Devil's Gaze. However, the effect of level 2 was obviously better, and the potion he made had a higher success rate.

In the wizard tower, everyone was busy preparing to clean up the monsters. Levi was already rushing towards the place where the eye demon appeared.

It was very far from the core region.

As soon as he entered this area, Levi could feel that in addition to the Aether elemental power, there was a strange energy in the world.

"Demonic aura."

Levi murmured in his heart.

Although it was very thin, it was indeed a demonic aura.

Those demon lords were all large radiation sources, and the demonic aura on their bodies could constantly spread in all directions.

Even if they killed the other party, the demonic aura of a demon lord could still turn the surrounding area into demonic soil in the human world for a long time, turning creatures who accidentally entered into demonic creatures.

This was the terror of the Abyssal Civilization.

According to Huffman, demonic aura could affect wizards' spellcasting and even pollute them into monsters.

This reminded Levi of the black fog he had encountered in the core area of the Shadow Realm.

That thing was similar to a demonic aura. It would also affect a wizard's spellcasting.

Perhaps there was a demon sealed in the core area of that Shadow Realm. However, the demon's level was not high, so the demonic aura was not contaminated.

The demonic aura of the Hundred -Eyed Demon King was extremely terrifying. If those existences with low realms were contaminated by too much at once, they would basically be instantly corroded into demonic creatures.

However, this was the border area. The demonic aura was thin, and Levi had the Iceheart Potion.

This demonic aura had no effect on him.

Here, Levi had also completely activated his Intuition state.

In his Intuition state, Levi could scan everything within a radius of dozens of kilometers from his five senses.

The accuracy of his investigation far exceeded the previous ones!

Coupled with the Black Snake's Message, his perception could only be described as godly!

The Spider Sensing still had a reaction, which meant that this place should be dangerous.

Suddenly, a pitch-black shadow descended from the sky above the sea.

Levi's expression did not change. It was a black seabird. Its eyes emitted a strange red light, and its body was wrapped in a terrifying demonic aura.

Like a small glider, its sharp claws attacked Levi.

"Black-headed sea eagle, a first-circle eagle-type transcendent creature. Unfortunately, it has already been infected by the demonic aura. Otherwise, this blood could be used to cultivate the Maya Breathing Technique."

Levi had already predicted the black-headed sea eagle's attack. He threw out a Big Fireball Technique that he had prepared long ago.

Boom!

Flames tore through the sea.

The black-headed sea eagle plunged into the fireball.

It was burned by the terrifying flames and wailed repeatedly. Another huge fireball blasted over.

The black-headed sea eagle was completely burned away.

"To these transcendent creatures below the second-circle, there's nothing that a Big Fireball Technique can't solve. If there is, let's do it again."

Levi looked at the ashes of the sea eagle's corpse and continued to rush forward.

He felt the Spider Sensing on his arm becoming stronger and stronger, but his expression did not change..
