

Wizard 557

Chapter 557: Advancing to the Second-Circle! (3)

Not long after, Levi found the level 2 eye demon. Under the connection, the monster hiding at the bottom of the sea could not hide.

In a dark seabed, a huge meatball about five meters in diameter was floating there, surrounded by floating tentacles.

Above the tentacles were incomplete corpses. The eye demon seemed to be absorbing the nourishment of these corpses through the tentacles.

Levi noticed that there were five eyeballs on the meatball. These eyeballs were spinning around. Clearly, the eye demon was also on guard. "Five eyeballs can be refined five times. Wonderful."

However, the strength of a level 2 eye demon was close to that of a second-circle senior wizard. Even Levi had to give it his all.

The Spider Sensing made him uneasy. He had a feeling that it was not the eye demon that gave him a sense of danger, but someone else.

Levi closed his eyes. Under the Intuition state, he carefully observed every trace of this sea area.

However, he still did not find anything. "Maybe I'm being paranoid."

Levi wasn't wasting any more time.

He directly filled in the Aether Stone and let the Corpse Digger go on stage to test the eye demon's strength.

This was Levi's first time dealing with a level 2 demon.

Demons were different from ordinary demonic creatures. Demonic creatures generally referred to creatures from other planes that had been corroded by demonic aura, similar to Secondary Blood Clan.

As for demons, they were native existences born from the abyss.

It was said that all the demons, be it the high and mighty lords of the abyss or those low-level cannon fodder demons,

They were all evolved from an inconspicuous Abyss Worm on the Abyss.

In theory, every demon had the potential to evolve to a higher level as long as they killed endlessly, killing other creatures and their own kind.

This eye demon was a real demon. Even if it was only level 2, Levi had to be careful.

Before long, the Corpse Digger successfully attracted the eye demon's attention.

The eye demon's perception was especially strong. When the Corpse Digger was still very far away from him, this fellow had already sensed it. It waved its tentacles and quickly headed towards the surface of the sea.

Red light flickered in the vertical strange eyes.

An invisible mental attack formed with a bang and attacked the Corpse Digger.

Unfortunately, the Corpse Diggers were only alchemical creatures and did not have a mind. This attack was ineffective against them.

The Corpse Digger's axe landed on the eye demon's body and sank into it. The furious eye demon's eyes shone brightly with red light, and red rays shot out.

These red lights tore through the Deep Sea and directly pierced a few large holes in the Corpse Digger's body. The engine oil began to leak.

"Oh my god, it's so powerful." Levi hurriedly got the Corpse Digger to run back.

This eye demon was even more powerful than he had imagined. The Corpse Digger's defense was instantly penetrated.

It was probably difficult for his Golden Snake Scales to completely defend against it.

However, he could now barely use the second-ring spell King Kong Rock Body. These two should not be a problem.

The eye demon's powerful Perception quickly discovered Levi. It quickly rushed towards Levi and its tentacles began to lengthen. It waved them one by one, and strange rays began to accumulate in its eyeballs.

His Golden Snake Scales spread out piece by piece. The Blood Wings spun and turned into a thruster that quickly swam under the sea.

The Blood Imprisonment Awl appeared in Levi's hand. One by one, all the bullets pierced into the eye demon's body.

The strange red light that the eye demon had just lit up instantly dimmed.

"It actually worked!"

This Blood Imprisonment Awl was quite useful.

The eye demon was furious. Its eyes were its strongest attack.

At this moment, after the strange Blood Imprisonment Awl pierced into its body, it could not use all five of its eyes.

The ray attack that Levi was most fearful of was gone.

He quickly closed the distance between him and the eye demon.

Golden Cross Slash!

A golden sword beam slashed at the eye demon!

The eye demon was in pain. The power of the Golden Revolving Slash was crushing its body.

Boom!

A terrifying mental attack attacked again.

Levi was in a daze as the eye demon's tentacles tied Levi up.

In an instant, countless tentacles wrapped around Levi like a huge dumpling.

This eye demon's mental strength was much stronger than Levi's. Caught off guard, Levi was hit.

The eye demon succeeded. Its tentacles began to try to pierce through Levi's scales.

However, he realized that this scale was like King Kong. After trying for a long time, he could not eat it.

At the same time, the Moonlight Greatsword in Schinn's hand flickered with a blood-red light in the Deep Sea!

The blood-colored sword energy tore through the Deep Sea and swept over.

There was a terrifying sword energy.

It cut off half of the eye demon's body. In pain, it let go of Levi and a demonic aura surged out of the two halves of its body.

Gray Destruction Cross Slash!

The annihilating sword beam annihilated half of the eye demon's body and turned it into dust.

There were no eyeballs on this half of its body, so Levi used the Grayflame Cross Slash without worry.

Levi would not have been so restrained if he was not afraid of losing his eyeballs.

He could directly lure the eye demon to the surface of the sea and use the Big Fireball Technique and Red Lotus' flames to wash the ground.

One had to know that Hellfire dealt additional damage to Abyss Demons.

In the end, under the attack of the Corpse Digger, Schinn, and Levi, the eye demon died unwillingly.

Levi's heart skipped a beat. Just as he was about to take the eyeball, the creepy sense of danger from Spider Sensing attacked him again.

Crack!
