

Wizard 560

Chapter 560: Change in the Interface! Meditation Art Fusion! (1)

After advancing to the second-circle, every point of spiritual force represented the upper limit of 30 spell power.

In other words, Levi's current 51 points of spiritual force should theoretically have a maximum of 1,530 points of spell power.

He couldn't help but smile bitterly. His talent in spell power was really average.

Fortunately, his spell power talent did not affect him much. As a pharmacist, he could just take pills.

He had already obtained the free second-circle green potion formula from Huffman, Green King Potion.

This potion could increase the upper limit of spell power by 10 points per bottle.

Although the price was relatively expensive, Levi would falsely report the success rate every once in a while and secretly keep one as his hard work fee. After all, pharmacists had a loss rate when refining potions.

For example, after Levi registered in the warehouse, he could take ten portions of green potion ingredients. If he could guarantee that he would hand in seven, it would be enough.

However, he had actually successfully refined eight of them. He would use the extra one himself.

This was already an unspoken rule in the Tower of Pharmacists. The military also knew about it, but they turned a blind eye.

Otherwise, these pharmacists would be dissatisfied if they only used this bit of merit as a hard work fee and had to concoct potions every day to delay their cultivation. Everyone was not enthusiastic.

However, this could not be too much. He could just do it once in a while.

Otherwise, if the success rate was not up to standard, the Second-Circle Pharmacist would not be in a good position if the military investigated.

Therefore, Levi did not force spell power. He just needed to slowly spend time to make up for it.

Currently, the second-ring spell he had mastered was only the King Kong Rock Body. He did not need that much spell power, as long as it was enough.

At the same time, Levi spent 500 merit points to exchange for the second-circle content of the Earth Meditation Art in the merit shop after advancing to the second-circle.

This Basic Meditation Art was not very expensive.

This was because Meditation Arts were only the basics, and most of them were public Meditation Arts. They should not be charged.

However, as the era progressed, later generations made some adjustments and improvements to these Meditation Arts. These fees were actually paid to these sorcerers who perfected the Meditation Art.

When Soran established the Pan-Plane Wizard Council,

One of its goals was to make basic knowledge like Meditation Art more popular so that more talented people could become wizards.

Therefore, there were often some Meditation Arts that landed in the human world.

Meditation Arts like the Sun, Earth, and Deep Sea were passed down from ancient times. They had been tested and could be cultivated to the Legendary Wizard realm.

Although this kind of Meditation Art did not have some special effects like the Black Sun Meditation Art, it was safe, stable, and easy to obtain. It might not be excellent, but it would definitely not make mistakes.

Therefore, Levi's path was to persevere in cultivating these Basic Meditation Arts to the end.

The value of spells was much higher, and spells could reflect the originality of every wizard. Therefore, the Pan-Plane Wizard Council was especially protective of the intellectual property rights of original spells.

As for Pharmacy, weapon-making, arrays, and other knowledge, there was naturally no need to mention them. This kind of knowledge was the most valuable and rare.

A few days later, Levi's Earth Meditation Art also broke through to level 6.

After the Earth Meditation Art broke through to level 6, Levi suddenly realized that there were some changes after the Meditation Art.

Levi—

Sun Meditation Art: Level 6 (12/40000) (Can be fused)

Earth Meditation Art: Level 6 (2/40,000) (Can be fused)

Furnace Meditation Art: Level 5 (13,256/30,000)

Night Crow Meditation Art: Level 5 (367/30,000)

Deep Sea Meditation Art: Level 4 (13,478/20,000)

Gale Meditation Art: Level 3 (7,890/10,000)

After level 6.

Behind Levi's Earth Meditation Art and Sun Meditation Art, a fusion option suddenly appeared.

"Oh? I can fuse Meditation Arts too?"

Levi's heart fluttered.

He had previously guessed that the Meditation Art could be fused.

However, he thought that he would only succeed after he gathered the four elemental affinities.

However, he did not expect to be able to fuse the Meditation Art after level 6.

This was undoubtedly a pleasant surprise.

Levi did not hesitate. From the looks of it, there were no disadvantages to skill fusion. There were only benefits.

He immediately began the fusion.

Merging the Meditation Art required a large amount of spiritual force.

Half a day later.

As Levi's face was pale and exhausted, his mental strength was almost exhausted.

The fusion was finally successful.

He drank the mana potion, meditated, and rested for a while.

[Underground Fire Meditation Art: Level 6 (7/40,000). Special Effect:

Underground Fire Dominator.]

"It's a Special Effect?"

Levi quickly opened the Special Effect.

[Underground Fire Dominator: You can cultivate spells related to fire elements at the same time, as well as spells of special elements mutated from the combination of earth and fire. In addition, the power of spells related to earth and fire has slightly increased. This Special Effect cannot be upgraded.]

"The Underground Fire Dominator sounds very powerful," Levi muttered to himself.

The original Sun Meditation Art and Earth Meditation Art had disappeared.

The King Kong Rock Body appeared on Levi's body, and golden runes flickered.

He stabbed his arm with the Blood Imprisonment Awl.

The runes flickered crazily. The King Kong Rock tenaciously resisted the Blood Imprisonment Awl's attack, but in the end, under Levi's strength, the King Kong Rock's defense was still broken by the Blood Imprisonment Awl.

Slash!
