

Wizard 563

Chapter 563: Change in the Interface! Meditation Art Fusion! (4)

This made him instantly feel that his 1,000 merit points were not good enough.

This made Levi even more certain that he had accidentally been involved in the open and covert battle between the five supervisors.

The person who attacked him must be one of the four supervisors.

Without a doubt, the person with the most motive to kill was the supervisor who had been the number one all year round before Huffman's rise.

"Healing Hands Rex."

This supervisor was a third-circle pharmacist. It was said that he came from a Fifth-Circle Wizard family in the inner sea region.

One of the fifth-circle members of the Fifth-Circle Wizard family was the commander-in-chief in the Upper Riptide.

In the entire Riptide City, there were only three commander-in-chiefs. One was a proper commander, and the other two were deputies. They were all Fifth -Circle Wizards.

This was an absolute big shot second only to the two city lords.

If it was the big shot behind Rex who attacked him, then Levi would have no hope of revenge.

The further he progressed, the slower and more difficult it was to advance his realm.

After the intermediate level, the difficulty of each advancement of the first-circle would multiply. The failure rate of the breakthrough would also begin to increase greatly. Moreover, if the breakthrough failed, one's life might even be in danger.

Even if Levi had the proficiency panel and his elemental affinity, he estimated that it would be good enough if he could advance to the fifth-circle within 200 years.

The average lifespan of a Fifth-Circle Wizard was almost a thousand years.

When he broke through to the fifth-circle, those big shots might also break through to the high level.

At the thought of this, Levi felt despair.

From the looks of it, Rex had the highest probability because Huffman's first place had touched Rex's interests.

Due to the rules of the Tower of Pharmacists, Rex was unable to bypass the Green Forest Sage and poach him. Based on the principle of destroying if she could not get him, she directly killed him!

Rex's interests represented their family's interests.

In other words, the fifth -circle commander-in-chief of their family might have tacitly approved of Rex's actions.

Killing the supervisor of the Tower of Pharmacists, Huffman, was obviously a little difficult. It would easily alert the military or even the city lord to investigate.

A Third-Circle Pharmacist was as important as a Fourth-Circle Wizard.

However, it was much easier to kill his competitor's top employee.

Although Levi was a Second-Circle Pharmacist, with the power of the interest groups behind her,

Without alerting the authorities, killing him without anyone noticing was as easy as flipping his hand.

"Damn it, I, Minotaur Levi, will never admit defeat. Should honest people be bullied? Don't provoke those who sell medicine."

Levi planned to test it out with his Spider Sensing when he had the chance to get close to Rex.

If Rex was hostile to him, Spider Sensing would definitely discover something at close range.

Now, this high and mighty executive must be enjoying his mansion at Upper Riptide. He didn't know where Levi lived.

He didn't dare to go to the Upper Riptide for fear of angering the other powerhouses.

He st0DDed thinking about these things. In anv case. he had already advanced to the second-circle. He shouldn't need to leave the city for a long time.

He did not believe that this mastermind would dare to attack him in Riptide City.

If that was the case, it would be too lawless.

After all, there were two high-level wizards guarding Riptide City all year round. If they wanted to, their Spiritual Perception could cover the streets and alleys of the entire city.

No criminal activity could escape the couple's eyes.

Of course, these two high-level wizards were researching in seclusion most of the time, so they would not spend all their time Perception.

However, the guarding wizards in the city patrolled the city at high intensity all day long to maintain order.

Generally speaking, there should be no problem with the security here.

"But we still have to be careful in the city. With Rex and the rest's status, they might have other dirty tricks up their sleeves. There are too many ways to get rid of me. After this failure, they will be even more careful."

Levi's expression was gloomy. He came to the Tower of Merit to see if the Greenfield Immortal House had been sold.

Generally speaking, it was unlikely that such an expensive Wizard Tool from the School of Insects would be sold.

This was because the School of Insects could be said to be the weakest school among all the wizard schools. There were not many people who cultivated in the entire Wizard World.

In the world of Xianxia, it was purely a side door.

In the end, Levi left the Tower of Merit in satisfaction. The Greenfield Immortal House was still there.

Levi originally wanted to change to a second-circle Bronze School active defensive spell Crimson Copper Armor. This way, he could further strengthen his defense.

In the end, he was dissuaded by the price of 5,000 merit points.

It was not that he could not afford it. He had more than 10,000 merit points on him now, but he felt that it was not worth it.

"The Golden Snake Scales and King Kong's Rock Body are enough. I'll exchange for them when I have more merit points in the future. I'd better practice my Five Fireballs Technique."

Levi shook his head.

However, practicing the Five Fireball Technique would cause too much of a commotion. His staff dormitory would definitely not work.

Levi wanted to rent a separate residence near the Tower of Pharmacists in Middle Riptide, the kind with a special training room. He would move out of the Tower of Pharmacists in the future.

Now that he had advanced to the second-circle, he had some money. It was more than enough to rent a house in Middle Riptide.

All the houses in Riptide City were sold and managed by the officials.

However, after some wizards bought it, they would rent it out through special third -party organizations because they did not stay often or moved to a new home..
