

Wizard 565

Chapter 565: Change in the Interface! Meditation Art Fusion! (6)

The level 1 Red-Faced Sea Ghost Spider Control could only control one Red-Faced Sea Ghost Spider. Therefore, if he wanted to control more than a thousand Red-Faced Sea Ghost Spiders, he had to continue cultivating.

In the following days, Levi basically devoted himself to cultivating the three new second-ring spells he had mastered: Five Fireballs Technique, King Kong Rock Body, and Red-Faced Sea Ghost Spider Control.

With his current spiritual power level, he didn't have enough memory in his brain, so he couldn't learn more second-ring spells.

Holy Brilliance Calendar Year 1043, Month of Vitality.

The eighth year of the Great Expedition.

It was said that Sky City had already arrived at the nearest five federations.

Under the command of a Legendary Wizard, the expeditionary army officially began a vigorous war with the enemy.

The wizard civilization officially began the first wave of confrontation with the evil forces under the Lord of Chaos.

On the Endless Sea's side, the Star Tower finally invited a Ninth-Circle Grand Wizard who was originally in charge of the council headquarters.

This Grand Wizard headed to the core of the Hundred -Eyed Demon Territory, determined to completely destroy the Hundred-Eyed Demon King.

Although the Hundred-Eyed Demon King would definitely be reborn, it was much better than staying in the Endless Sea as a scourge.

The wizards of Riptide City were extremely excited when they heard the good news.

Especially for a wizard like Levi who had been recruited.

If he destroyed the Hundred-Eyed Demon King, it would only be a matter of time before the Hundred-Eyed Demon Territory disappeared.

When the war here ended, they could also leave Riptide City and return home.

In the end, this battle seemed to shake the entire Hundred-Eyed Demon Territory.

According to the battle wizards at the frontline, after a few days, the aftermath of the battle spread to the edge of the Hundred-Eyed Demon Territory. It was enough to shatter the defensive spells of First-Circle Wizards. It also brought about a terrifying tsunami that drowned some islands.

Everyone also indirectly felt the terror of a ninth-circle Grand Wizard. That might that was comparable to a demigod's was indeed shocking.

And how powerful were the Legendary wizards above Grand Wizards?

However, the final result was beyond everyone's expectations.

The Hundred-Eyed Demon King didn't die. Not long before the war, this fellow obtained some benefits and advanced to become the new demon lord: Lord of the Thousand-Eyed Demon King!

This was the strongest eye demon that had never appeared in the history of the Abyss.

In the end, the Grand Wizard had no choice but to use his Divine Soul Artifact to severely injure the Thousand-Eyed Demon King, but he was unable to kill it.

The Thousand-Eyed Demon King, who was severely injured, escaped into the ancient ruins that had sealed it.

The Grand Wizard chased after him, only to discover something that made the Wizard World even more desperate.

In this ancient ruin, there was actually an unfinished Abyss Well!

The Thousand-Eyed Demon King used a secret technique to escape into this Abyss Well.

This made the Grand Wizard rather afraid and did not dare to go deeper.

The so-called Abyss Well referred to the passage that the Abyss opened to the other dimensions.

Basically, for some weaker dimensions, opening an Abyss Well would mean the destruction of this dimension.

This made the wizard civilization feel helpless.

Unknowingly, the power from the Abyss had already invaded this plane.

Be it the Wizard World or the human world, they might encounter an invasion from the Abyss.

As for the Grand Wizard, he was guarding the Abyss Well. At the same time, he contacted the Legendary wizards who were guarding the Wizard World and waited for the next move.

The Abyss Well had to be destroyed. The current Wizard World no longer had the strength to deal with the invasion of the Abyss civilization.

Only after settling the internal strife and pacifying the five federations would the wizard civilization be able to fight the Abyssal Civilization.

The situation became more and more chaotic. The giants of the Wizard World were in a terrible fix.

On the other hand, Levi, who was at the bottom, was no longer afraid.

In any case, if the Abyss really invaded, it would be useless for him to hide anywhere. Levi could not resist such a complete force.

Since he was going to die anyway, he might as well relax and continue cultivating his experience.

The abyss was not a small matter like the Blood River and blue frost.

These planes only dared to cause trouble in the human world and bully mortals and the representatives of the gods trapped in the astral world. They did not dare to come to the Wizard World at all.

The ancient and powerful Abyssal Civilization was an existence that even the gods of the astral world feared.

In history, every war with the Abyssal Civilization was a painful experience that the wizard civilization did not want to recall.

It was a real... bloody battle.

It could last for hundreds or even thousands of years. This was the so-called Millennium Battle.

It was said that there were 666 levels in the Abyss. However, it was unknown if there were only 666 levels in the Abyss.

The reason why the Wizard World said that the Abyss was the 666th level was because Sauron, the ancestor of wizards, had only fought to the 666th level at most during the Civil War. After fighting a draw with the demon lord on the 666th level, he retreated to the Wizard World.

In fact, the Abyss might be even more terrifying than the wizards had imagined.

The outside world was in a constant state of panic. For a moment, all kinds of discussions about the end of the world, the end of civilization, and the extinction of wizards were everywhere.

Ever since the Wizard World had developed to this day, the wizard civilization had indeed never experienced such serious internal and external troubles.

Hence, Levi could understand why many wizards were pessimistic.

In comparison, Levi was still fine. He continued to cultivate step by step.

If the world did not explode, Levi would not take a break!

Not long after, Levi's Red-Faced Sea Ghost Spider Control had already cultivated to level 3 and could control about a thousand spiders..
