

Wizard 567

Chapter 567: Legendary Physique Breaks the Limit, Death Ember Breathing Technique! (1)

The difference between a Third-Circle Wizard and a Second-Circle Wizard was even greater than that between a second-circle and a first-circle Wizard.

After spiritual force liquefaction, the quality of the spiritual force would directly crush the Second-Circle Wizard.

The power of a third-circle spell was also much higher than that of a Second -Circle Wizard.

Moreover, after the spiritual force liquefied, wizards could solidify an innate spell. It was an instinctive spell that did not require any spellcasting or chanting.

Therefore, it was said that above the third-circle, wizards were the ones who truly embarked on the path of Dao. Only then could the power of wizards truly be displayed.

Levi felt that if his path as a knight reached level 13, coupled with the standard of a second -circle senior wizard, the Great Black Sky Curtain, the Blood Imprisonment Awl, and other trump cards, he should probably... be able to compete with the third-circle?

The reason why Levi was not sure was because he did not know if his realm could match that of a Third-Circle Wizard after level 13 of the breathing technique.

After all, the second-circle to the third-circle was a huge threshold.

If he was certain that the level 13 Golden Snake could match a Third-Circle Wizard, he would have no pressure dealing with ordinary Third-Circle Wizards.

However, if he could not match it, he believed that with the Golden Snake's defense and the superposition of multiple forms, he was also invincible against third-circles.

Of course, no matter what, these were all Levi's guesses.

He was not stupid enough to fight a Third-Circle Wizard. The safest way was to wait until his wizard had advanced to the Third-Circle Wizard level, and then use the strength of a knight to crush the enemy.

He didn't like to fight evenly. He liked to beat his enemies.

He took out the Great Black Sky Curtain from his storage bag.

This Wizard Tool had been in Levi's storage bag for a long time.

This was an extremely practical third-circle Wizard Tool.

Levi had already appraised this Wizard Tool from Wizard Newt. Now, he had also grasped the usage method of the Wizard Tool.

After taking drugs during this period of time, Levi's spell power upper limit was about to catch up.

If he wanted to become a third-circle Wizard Tool, he had to solidify a precious third-circle spell. The third-circle spell of the Great Black Sky Curtain was Iron Curtain Protection.

The black curtain formed an indestructible Iron Curtain Force Field that was enough to withstand a third-circle spell.

Over the past few days, Levi had been trying to get used to this third-circle Wizard Tool.

It was not easy to master such a high-quality Wizard Tool.

Seven days later.

In Levi's secret room, a black ribbon danced around Levi's body. It spun like an Armillary Sash and wrapped around Levi's arms.

"It can be powerful and small. It can attack and defend. It can fly into the sky and enter the sea. It's omnipotent. This Wizard Tool is not bad. It can be called the ultimate weaker version of the Wizard World's Armillary Sash. Now, I'm still lacking the Heaven and Earth Ring and the Wind Fire Wheel. I can cosplay as Nezha."

Levi had the Fire-Pointed Spear, which was the Poseidon Trident. As long as he attached the Red Lotus Hellfire to it, it would be the Fire-Pointed Spear.

After these few days of coordination, Levi had completely grasped the usage method of the Great Black Sky Curtain.

Without using the third-circle defensive spell, Iron Curtain Protection, the spell power consumption of the Great Black Sky Curtain was still within Levi's tolerance range. It was not a big problem to use it in normal battles.

However, if he wanted to use the Iron Curtain Protection, it would require a total of 500 spell power. The spell power in Levi's body was only enough to be used three times.

This was the terrifying aspect of third-circle spells. It required a massive amount of spell power and spiritual force to support it.

If one's spiritual force reached 70 points and mastered more than five second-ring spells, one could be called a second -circle senior wizard.

In the second circle, the upper limit of a wizard's spiritual power was 100 points, and the upper limit of spell power was 3,000 points.

Putting the Wizard Tool into his storage bag, Levi stood up.

"Right now, I'm still lacking a second-circle active defensive spell as my second-circle defensive field. However, once the active defensive spell is chosen, it can't be changed. This is not urgent. At the very least, it has to be a Grade A defensive second-ring spell to qualify as my defensive field."

After this period of dormancy,

Levi's strength was much stronger than before. After all, the methods of a

Knight were too shocking. Most of the time, he still had to rely on the methods of a wizard to fight his enemies.

He had already informed Huffman that Levi's leave had been approved by the Tower Master.

Levi had completed the Pharmacy mission for the past two years with high standards. It was naturally not a problem to take a three-month leave.

Three months would require 300 Merit Points to be deducted, which was not a lot for Levi.

Hearing that Levi was going to leave for a while, Grimm was a little puzzled.

"It's so chaotic outside now. To be honest, the safest place in the Endless Sea now is a military fortress, just like Riptide City," Grimm said helplessly.

"It's mainly because there are some things that I still have to do. By the way, do you have any second-circle meditation supplementary potion formulas? If you do, I can buy it. As usual, it's only for my personal use," Levi asked.

Grimm shrugged and smiled bitterly. "This is a second-circle meditation supplementary potion. You think too highly of our family. However, I see that there are potion formulas in the merit shop. You should have accumulated a lot of merit points since you worked so hard."

"It's all hard-earned money. How much can I earn? The Meditation Potion formula over there is worth at least 30,000 merit points. I'll wait for Huffman to give it to me."

Levi told Grimm and Tommen to inform him, then said goodbye to Grimm and turned to leave.

Recently, Tommen had been busy breaking through to become a Second-Circle

Pharmacist. He had been in seclusion to concoct Pharmacy and had not seen

Him for a long time..
