Chapter 570: Legendary Physique Breaks the Limit, Death Ember Breathing Technique! (4)

With his current strength, it shouldn't be difficult to take down the other party.

Unexpectedly, this sea dragon crocodile was even more ferocious than what was described in the information. It definitely had the strength of a second-circle senior wizard.

He could only slightly injure this guy with his slightly mastered Five Fireball Technique.

One had to know that although his Five Fireball Technique was only at level 6, with the support of the Underground Fire Dominator, its power should be at the Grade B level.

Levi broke through the sea dragon crocodile's defense on the spot.

He had just become a Second-Circle Wizard and lost his first battle.

He immediately used his knight ability and used the Great Black Sky Curtain to wrap around it. He wanted to exhaust this guy's stamina and capture it alive.

Moreover, it seemed that this sea dragon crocodile had just reached adulthood and had not entered the true prime of life.

For this kind of mixed-blood Dragon Clan, there was no problem of the so-called decline in strength in old age.

The Dragon Clan was the same as wizards. The longer they lived, the stronger they were, and the larger they were.

In Levi's opinion, this guy's true maximum was not the second-circle. It was very likely that he would advance to the third-circle or even the fourth-circle in the future...

Although this would take a long time, it was still a good thing.

As long as he could subdue this big guy, Levi would be able to gain the blood of the Dragon Clan with water element affinity for a long time.

The silver-haired witch stared blankly at the violent scene below.

"Is... Is this a bloodline modification wizard? Why does it feel different from the bloodline modification wizards under the Lush Forest Witch?"

She was shocked. She was actually starting to worry about the violent sea dragon crocodile.

As the king of this sea region, it had never been humiliated like this.

In the end, Levi's golden scales wrapped around his body and Hellfire burned his body, pressing the exhausted sea dragon crocodile to the ground.

The sea dragon crocodile was already exhausted.

Its fatal mouth was completely wrapped by Levi's Great Black Sky Curtain.

Levi had seen farms catch crocodiles with this kind of cover over their mouths.

Although the Sea Dragon Crocodile also had powerful spell-like abilities, it was unable to break through Levi's defense and was even sealed by Levi's Blood Imprisonment Awl.

The only thing that could pose a fatal threat to Levi was the gaping mouth.

Now, it was at its wit's end.

Pressed down by Levi, it gave up struggling.

Levi could see that the crocodile's eyes were shining with wisdom.

"Submit to me, or you will face death!"

Levi exuded a powerful aura as he activated the Golden Snake Special Effect, Dragon's Intimidation.

First, he would use his martial strength and Dragon's Intimidation to subdue it. Then, he would use Dragon Affinity and Nature's Heart to slowly tame it.

One day, Levi would make the sea dragon crocodile as obedient as Leviathan. As a second-circle transcendent creature and a mixed-blood Dragon Clan

Member, the Sea Dragon Crocodile could naturally sense the suppression of Levi's bloodline.

It had been in this sea area for so many years, but it had never seen such a pure Dragon Clan's majestic aura. That was the Dragon's Might that could only be born from sub-dragons and above.

As for the sub-dragons, they were all high-level transcendent creatures, from the sixth-circle to the eighth-circle.

As for the pure-blooded Dragon Clan, they were at the beginning of the ninth-circle, which was the Legendary Creature.

Actually, Gustav's bloodline was already considered above average among the mixed-blood Dragons. However, he had met Levi.

He had cultivated the breathing techniques of the Dragon Clan, such as the Golden Snake, Red Lotus, Silver Mountain Dragon, Jade Dragon, Ash Dragon, and so on. The Primordial Ancestors' level was far higher than Gustav's.

Although the bloodline in Levi's body was very thin now, the suppression of this origin level still made Gustav feel fear in his heart. He actually wanted to submit.

It struggled with all its might, but Levi remained motionless. Tyrant landed on the ground and pressed Gustav to the ground with him.

After another round of beating, Gustav lowered his noble head and stopped resisting.

Levi did not let go of the big guy for the time being. He took some blood from the big guy and placed it into the Rowling Crystal.

"As expected, the density of the Dragon Clan is much higher than Leviathan and the others. They are on a completely different level. Even the density of Jorman's Dragon Clan bloodline is not comparable to this thing.

"The secret medicine created by this big guy's blood will definitely allow my Golden Snake Breathing Technique to cultivate faster," Levi thought to himself.

He took out a slate. This was the Dragon Clan's General Education Slate. It was a book jointly published by some niche wizards from the Dragon School of Thought and the Life School of Thought. Levi had exchanged it in the Tower of

"If this sea dragon crocodile was in the ancient times of my previous life, it would have been an evil flood dragon that stirred up trouble and summoned the wind and rain."

Levi was very satisfied.

The Sea Dragon Crocodile lay on the ground weakly.

Just like that, Levi and the sea dragon crocodile were wasting time on this island.

Levi enjoyed the food happily and replenished his strength. After eating all the food in a small storage bag, he licked his mouth with his snake tongue.

On the other side, the Great Black Sky Curtain, Tyrant, and Schinn controlled
