

Wizard 572

Chapter 572: Legendary Physique Breaks the Limit, Death Ember Breathing Technique! (6)

Now that he had finally found some clues, he naturally could not give up so

Easily.

The other party was just a First-Circle Wizard. It was impossible for him to disappear into thin air under his nose.

Seven days later.

Levi opened his eyes.

"The Inferno Dragon Breathing Technique is also at the maximum of level 11," he muttered to himself.

The current him was already indifferent to such things.

Levi—

Inferno Dragon Breathing Technique: Level 11 (Maximum), Special Effect: Scale Ember (Solid State), Ashen Entanglement.

[Scale Ember: The flames from the Ash Dragon can heal injuries and restrain the enemy's self-healing ability. This Special Effect can be improved as the breathing technique is upgraded.]

"As expected, it's similar to what I imagined." Levi had long guessed the effect of this Special Effect.

In short, the self-healing effect of the Scale Ember was much worse than the Undying Bird's Blood Ember. The strength of the Scale Ember was that it could stop others from self-healing.

If he encountered an unkillable cockroach like the Blood Clan, Scale Ember would be a godly skill.

The fact that Hogg, a mere grand knight, could injure the Primary Blood Clan with this Special Effect was proof.

The other Special Effect was much more interesting.

[Ashen Entanglement: The power of ashes in your body forms an ashen force field around your body, forming an effective defense. This Special Effect cannot be upgraded, but it can be upgraded as the breathing technique is upgraded.]

Levi activated the Inferno Dragon Breathing Technique, and the Ash Dragon seed in his body erupted with endless ashes.

These ashes kept spewing out from Levi's limbs and bones. They surrounded Levi's body and danced as if they would never stop.

Levi let Tyrant slash at him with its huge axe.

The power of the axe slash, which was comparable to an ordinary second-ring spell, entered the residual force field around Levi and was wrapped in it.

However, the ashen force field didn't last long before it shattered.

After all, the Inferno Dragon Breathing Technique was only at level 11. This effect was already beyond Levi's expectations.

"This defense is surprisingly not bad. It's basically equivalent to a first-circle defensive field. It can temporarily make up for the lack of a defensive field. When the Inferno Dragon Breathing Technique reaches level 12, the level of the second-circle defensive field should be at the level of being covered in ashes."

The legendary organs of the Inferno Dragon Breathing Technique were also somewhat different from other breathing techniques.

The legendary part was Levi's left eye.

Levi called this legendary organ Ashen Eye.

Levi's pupils turned gray and there was no light.

Levi's world turned gray and extremely dim.

Ashes would always fall from the sky like snowflakes and land on the sea.

Endless ashes floated on the surface of the sea.

This was the world in the eyes of the Ash Dragon, a lifeless world of ashes.

In the world of ashes, there were no colors, only different shades of gray and specks of fiery red.

On the other hand, Gustav and the others were bonfires burning with embers.

Levi looked at the school of fish in front of him, like burning sparks.

With a thought, as he looked, the sparks began to dim and finally turned into ashes.

From Schinn's perspective, Levi only glanced at the passing fish.

The school of fish died inexplicably and floated on the surface of the sea without any vitality.

Levi closed his eyes. When he opened them again, the world was back to normal.

In the blue sky and white clouds, the vibrant colorful world had returned.

A faint ember flame appeared in his hand, emitting a gentle vitality.

This vitality came from the school of fish just now.

"What kind of ability is this? It's so strange."

Levi looked at the dead fish floating on the surface of the sea.

They looked unscathed, but Levi blew casually and the dead fish really turned into ashes and scattered on the sea.

"These ordinary fish can't withstand the gaze of the Ashen Eye..."

This was some kind of strange eye-bloodline technique that could deprive the weak of their life force by looking at them.

These opportunities appeared in Levi's palm in the form of some kind of Ashen Fire.

These embers seemed to be able to heal Levi's injuries.

However, the true use of Ashen Fire was definitely not like this. It was just that Levi had yet to unearth it.

That world of ashes was so real that it didn't seem like an illusion brought about by an eye technique.

Perhaps, in the eyes of the Ash Dragon, the colorful world where Levi was in was merely an illusion.

And the world of ashes just now was real.

It was just like a fleeting dream.

After some thought, Levi found a safe place and asked Schinn to keep an eye on the sea where the silver-haired witch disappeared.

Levi wanted to fuse and mutate the Inferno Dragon Breathing Technique and the Undying Bird Breathing Technique. The Vortex Beast Breathing Technique that he had obtained the earliest was also integrated as a raw material.

Not long after, a brand new breathing technique was born.

Levi—Search new novel. 0 rg on google

Death Ember Breathing Technique: Level 11 (1/300,000). Special Effect: Ember Feathers (Solid State), Resurrection, Ashen Entanglement, Ember Call.

Judging from the appearance of the Dead Ember Seed, the Death Ember should be some kind of dragon-type creature with black feathers.

It had bird wings, bird feet, a dragon head, and a dragon tail. It emitted an ominous aura and had a strange beauty.

Just like Golden Snake and King Kong, Death Ember was an existence created by Levi.

There was nothing much to say about the Ember Feathers Special Effect. It was equivalent to combining the advantages of the Undying Bird and the Ash Dragon. Not only did it have powerful self-healing abilities, but it could also stop the enemy's self-healing. This move was too despicable.

Levi was more concerned about the new Special Effect that had appeared after the mutation..
