

Wizard 574

Chapter 574: Aether Stones! Nameless Thousand-faced!

(1)

Giant Tree Secret Realm.

This was the secret realm where the Lush Forest Tower was located.

Similar to the secret realm of the Colin family that Levi had been to before, this was also a small secret realm.

However, even if it was a small secret realm, it was more than enough to serve as the base of the Lush Forest Tower.

Compared to the secret realm of the Colin Family, this place seemed much more normal.

The plains, the mountains, and the forest of giant trees that covered the mountains and plains could be seen everywhere.

This secret realm did not belong to the Lush Forest Tower. Instead, it was the private secret realm of Area 8 Supervisor Riemann.

However, since the Lush Forest Witch was now Riemann's partner, she naturally moved the entire Lush Forest Tower into the Gray Tower.

The Lush Forest Witch had learned about this situation from Riemann before the dark wizards on Whale Song Island started the war.

She wanted to develop the Lush Forest Tower and had a good relationship with Marlene, so she brought all the members of the Gray Tower who were not guarded by the third-circle to the mystic realm in advance.

Marlene also became a member of the Lush Forest Tower. Due to her character and her noble status as a Second-Circle Pharmacist, she soon became the Deputy Tower Master.

The Lush Forest Tower was hidden among the towering trees.

In a small room.

"Levi, do you want to join the Lush Forest Tower?" Marlene asked as she drank her tea.

Levi shook his head. "Teacher, I'm not joining for the time being. I'm serving in the military now. Joining the organization won't bring any benefits to the organization."

Levi was relieved to see that Ms. Marlene and the others were doing well.

Next, he could stay in Riptide City without any worries.

Although the Gray Tower had become a thing of the past, his former companion and teacher had always been in his heart.

"Yes, we won't force you to do that. Back then, we evacuated in a hurry. We thought that you wouldn't return for a short period of time in the human world. Later, we heard that the teleportation portal in the human world was closed. We originally thought that you could escape the calamity in the human world, but we didn't expect you to still come." Marlene sighed.

"Staying in the human world isn't a solution. We have to come back and face it," Levi said.

"Congratulations on becoming a Second-Circle Wizard. As Herman said, I don't know what kind of fortuitous encounter you have, but your future will definitely not be defined by the talent of the Children of Chaos."

Marlene sighed. They were both Children of Chaos. She had only stepped into the second-circle a hundred years later, while Levi had stepped into the second-circle in his fifties.

"I'm a pharmacist in Riptide City. I usually take a lot of potions before I can step into the second-circle after the age of 50." Levi smiled helplessly.

"Good luck, Deep Blue Sage Luther, a Legendary wizard of the Ocean School of

Thought. He's also a Child of Chaos, but he still stepped into the Legendary Wizard realm. You're still young. You can still continue to advance to the third-circle or even the fourth-circle in the future," Marlene encouraged. Talent was not the only condition that determined the achievement of a wizard. Talent was just a minimum limit for wizards.

Individual hard work, determination, opportunity, luck, and so on would all affect the upper limit of a wizard.

Moreover, other than Earth, Fire, Wind, and Water, there were other unknown special talents. These were all uncontrollable variables.

However, compared to these complicated and variable factors, the Earth, Fire, Wind, and Water element talents were the easiest to determine and were also the most important.

Therefore, as time passed, it became a fixed standard to measure talent in the Wizard World.

After catching up with Marlene and the others, Levi prepared to leave.

He had too many things to do and could not live a life of paradise in this mystic realm.

Moreover, the mystic realm was not absolutely safe.

As long as he contacted the outside world, there would be a day when he would be exposed. It was just a matter of time.

In short, the Lush Forest Witch and Riemann, the powerful fourth-circle supervisor, were in charge.

For a long period of time, the safety of this secret realm was still guaranteed.

Levi was also very relieved that Marlene and the others were there.

Before leaving, Levi especially went to the Lush Forest Witch to thank her.

After all, no matter what, this witch saved Marlene and the others and was Levi's benefactor.

The beautiful green elf looked at Levi and asked, "Are you really not planning to stay here?"

Levi nodded. "Thank you for your kindness, Senior."

"Then I'll have to trouble you to sign a confidentiality agreement. Although you're Marlene's disciple, I have to consider the entire Lush Forest Tower," said the Lush Forest Witch.

"Of course. I don't want Ms. Marlene's peaceful life to be broken."

Levi checked the non-disclosure agreement and signed it after there were no problems.

He turned around and looked at the Gray Tower's companions who were waving at him. Then, he stepped out of the secret realm alone.

After coming out, he found Gustav and Leviathan sleeping at the bottom of the sea in the nearby sea.

"Let's go to the Yellow Earth Continent. There seems to be a Three-horned Dragon King in the ancient forest there. Also, I don't know if that giant ape is still there."

In addition, Levi also wanted to visit his old friends, Emperor Mu and Dinos, in Lion King City.

This time, Levi rode Gustav directly into the sea. With this sea overlord as a mount, ordinary sea beasts did not dare to approach at all.

Seven days later, Levi arrived at the Yellow Earth Continent and settled

Leviathan and Gustav down.

He searched the ancient forest for a long time, but he didn't even see the Three-horned Dragon King.

Moreover, in the center of the ancient forest, there was a faint aura of a

Third -circle transcendent creature..
