

Wizard 578

Chapter 578: Aether Stones! Nameless Thousand-faced!

(5)

"Sir Levi, you're back. It's been a long time. How's the situation in Riptide City?" Dinos asked.

"I'm doing okay over there. I took a leave of absence and came back to check on things," Levi said.

From the looks of it, Emperor Mu and Dinos had improved, but compared to Levi, it was equivalent to no improvement.

After not seeing him for so long, he was still a high-level apprentice wizard.

Due to the outbreak of the war between the dark and righteous wizards, his plan to go to the Realm of Life was ruined.

Now that Levi had almost mastered breaking through the shackles of the legendary realm, Emperor Mu did not need to go to the Realm of Life.

Moreover, the Lush Forest Witch was a third-circle powerhouse of the Life School of Thought in the secret realm of the giant tree. If Emperor Mu still wanted to join the Life School of Thought, Levi could introduce him.

Relying on the Golden Spine Bone and the two legendary breathing techniques, Emperor Mu was as strong as a senior first-circle wizard.

Dinos, on the other hand, was only one step away from the legendary realm. He had reached the level of Emperor Mu when he was in the human world.

Levi helped to clean up the mess and was invited by the Golden Lion Jostar Family to his house as a guest.

He came to the Yellow Earth Continent mainly for the Three-horned Dragon King and the Silver Frost Ice Ape.

Now, there was no way to obtain either creature. Levi felt depressed.

He went to the Golden Lion Jostar Family to find out more about the Flame King Family.

He was preparing for his revenge in the future.

Whale Song Island, Flame King Clan.

These two organizations would definitely settle scores with Levi when he advanced to the third-circle in the future.

Levi bought some materials at a low price in Lion King City before he left and returned to Area 9.

After placing Gustav and Leviathan on the Black Fire Island, Gustav would take care of the house. With Levi's array, the probability of the Black Fire Island being stolen was low.

After preparing the secret medicine, he rushed to Bass Island and took the wizard airship back to Riptide City.

He had gained a lot from this trip home.

When Huffman heard that Levi was back, he called Levi to his place alone. After some communication, Levi learned that there was a new potion that Levi needed to refine.

In the two months that Levi was not around, Huffman's performance had fallen.

This made Huffman lose his appetite. The days when Levi, an excellent employee who worked hard without complaints, was not around were too unbearable.

This new potion formula was Blood Healing Potion, a second-circle potion that could quickly heal injuries.

After Levi obtained it, he mastered it not long after and began a large number of reconnaissance missions.

With such a potion, the low-level combat wizards at the frontlines could quickly recover from non-fatal injuries.

Days passed in Riptide City.

Levi returned to Pharmacy and cultivated. Occasionally, he would go to the Tower of Merit to see if the Greenfield Immortal House had been sold.

In addition, Levi had also finished counting the spoils of war from the last dark wizard hunt.

The second-circle Wizard Tool came from the second-circle dark wizard he killed.

In addition, there were five First-Circle Wizard Tools, as well as various spell books, cultivation materials, a large number of Aether Stones, and so on.

Levi categorized these spoils of war and kept the useful ones for himself. The useless ones were quietly disposed of in Riptide City.

In the end, he obtained 30,000 Aether Stones. Including Levi's previous savings, the Aether Stones broke through the 70,000 mark.

This should be a huge sum of money many Second-Circle Wizards could not imagine.

Levi suddenly felt that Minnie Miaomiao House was not that expensive anymore.

"Murder and arson are the fastest way to earn money." Levi sighed in his heart.

However, there were not many such good opportunities.

It was impossible for him to go and reap the benefits every time there was a war. If he did, he would fail sooner or later.

As a result, time passed quickly.

Holy Brilliance Calendar Year 1044, Month of Beginning.

Year 9 of the Great Expedition.

The battle group led by Deep Blue Sage Luther also arrived at the Myriad Machine Plane.

Levi prayed for the Tower Master in his heart, hoping that he and his lover could return victorious.

After nearly ten years of traveling in Sky City, the Great Expedition had just begun. What followed was a long and endless war.

The situation of the internal war in the Wizard World was not optimistic either.

The flames of war continued to spread across many Realms of the Unbelievers, but there were no signs of stopping. Instead, it became more and more intense.

In the sixth warzone of the inner sea region, in the Hundred-Eyed Demon Territory, the ninth-circle Grand Wizard was still guarding the Abyss Well, waiting for the Legendary Wizard to destroy it.

However, as the Thousand-Eyed Demon King disappeared, the demonic aura in the Hundred-Eyed Demon Territory gradually thinned.

In addition, the demon-hunting work was carried out in an orderly manner. update by newnovel.org

He believed that as long as the Abyss Well was destroyed, without the support of the Abyss Lord, it was only a matter of time before the monsters in this area were wiped out.

As Levi's Proficiency increased bit by bit, his cultivation also changed every day.

As for knights...

With the support of the high-quality secret medicine made from Gustav's blood, the cultivation speed of the Golden Snake Breathing Technique increased significantly.

Levi felt that he could reach level 13 in two to three years.

Other than that, the other breathing techniques had also improved.

Especially those breathing techniques that he had obtained in the human world. The slowest one had also cultivated to level 9, and the fastest one was the Jade Dragon Breathing Technique. It was already not far from the maximum of level 11.

The Gray Destruction Cross Slash was directly cultivated to the maximum of level 7 by Levi, giving birth to the final Special Effect Gray Destruction Power.

This also meant that Levi had cultivated his sword skill to the extreme after the Golden Cross Slash.

However, the Gray Destruction and the gold could not be fused, which disappointed Levi..
