

Wizard 587

Chapter 587: Level 13 Golden Snake! Blood Knight! (3)

Under such a life creed, 55 -year-old Levi had finally cultivated the Golden Snake Breathing Technique to the late stage of level 12. He was getting closer and closer to level 13.

Levi's Golden Snake Scales started to itch, and he could not help but scratch it.

He had a feeling that his hands were shedding skin when they were dry.

This made him realize that he was about to... shed his skin.

After the Golden Snake Breathing Technique reached level 13, the truth was indeed similar to what Levi had imagined.

On this day, Levi realized that a crack had appeared in the middle of his body along with his scales.

He stood in front of the mirror and gently tore off the scale.

Slash!

It was like the sound of stockings being torn.

The layer of scales on Levi's surface was torn in half.

He quietly looked at the human skin with scales in his hand.

Then, he looked at his pink skin and the layer of slightly soft scales in the mirror.

"Uh, I shed my skin..."

Levi was amazed.

What does it feel like to shed your skin?

As a human, he was qualified to answer.

These new scales were still very fragile. Levi estimated that it would take some time for them to recover.

After shedding his skin, he would be in a weakened state for a period of time.

This was his instinct.

After these scales completely hardened, Levi could test the power of this level 13 Golden Snake.

Thinking of this, Levi opened the proficiency panel.

Levi—

Golden Snake breathing technique: Level 13 (1/500,000). Special Effects: Transformation Scales (Level 1), Dragon's Intimidation, Golden Snake Playing with Water.

First of all, Levi was pleasantly surprised that the level 13 Golden Snake could still continue cultivating.

From the looks of it, it should not be a problem to cultivate level 13 perfection. At that time, he did not know if he needed to break through the limit.

[Transformation Scales (Level 1): The power of the Golden Snake bloodline in your body underwent its first transformation. You shed the weak Newborn Scales. From then on, you began a long journey of transformation. After experiencing repeated transformations, your scales will become harder and stronger. You will finally be able to gain a foothold in a dangerous environment. After every transformation, you will have a period of weakness. During this weakness, the smart Golden Snake will lie dormant in the cave to avoid the hunt of its natural enemy.]

"So that's how it is. One metamorphosis is equivalent to one level, and so on. Only when I grow into a true Golden Snake will I end my metamorphosis?" Levi guessed.

If Levi was just a baby snake hatched from an egg, he should be a little snake that was starting to grow now.

This would be an incomparably long process that would require many painful transformations.

It was a pity that Levi could not test the power of his Golden Snake Scales now. He also did not know if his defense could match a third-circle defensive spell.

He was very weak now. These soft scales could not be defended at all. Even the attack of a Second-Circle Wizard could break through Levi's defense.

He checked the array formation in his house and made all kinds of reinforcements.

He could not give the enemy a chance to take advantage of his weakened state.

He planned to apply for leave from Huffman for a period of time. He would not leave the house until his scales hardened.

Other than the Transformation Scales, the Golden Snake had produced a third Special Effect at level 13.

"Golden Snake Playing with Water."

[Golden Snake Playing with Water: The Golden Snake likes water. It is the master of all water and the king of the sea. The bloodline power in your body has allowed you to possess the Golden Snake's water element affinity talent.

The speed at which you cultivate water-element-related spells and Meditation Arts will increase. The power of spells and spell-like abilities related to water-element will increase. This Special Effect cannot be upgraded, but it can slightly increase the effect as the breathing technique advances.]

"As expected, what should have come still came." Levi heaved a sigh of relief.

He no longer needed to search for Van Helsing or the Duncan family's inheritance.

The breathing technique was enough.

As a wizard from the Ocean School of Thought, Gray Tower had been in the Ocean School of Thought's territory for decades.

Levi could legitimately call himself a qualified genius wizard of the Ocean School of Thought.

He tried to meditate on the Deep Sea Meditation Art. As expected, the cultivation speed of the Deep Sea Meditation Art was much faster than before!

"I've finally gathered the four elemental affinities of Earth, Fire, Wind, and Water. I just need to wait for the Deep Sea Meditation Art and the Gale Meditation Art to advance to level 6 and see what I can finally fuse."

Levi was excited.

From then on, he was no longer an ordinary Son of Chaos. He was a rare four-element talent.

One day, as the effects of the breathing technique increased, it would become better and better.

Then he was the Child of the Elements!

Apart from these two Special Effects that had changed,

Levi's supernatural organ, the Golden Snake's Message, had also changed, but not much. It only slightly increased the range of his aura Perception and the speed at which he processed information.

The other supernatural organ came from the Golden Horn Beast's golden horn.

The feeling of stagnation and blockage finally disappeared. Levi was basically certain now.

His golden horn should contain the ray-type spell-like ability.

When he focused his mind on the golden horn, the power of the Golden Snake in his body would be instantly drained. Then, the golden horn would flicker with light, emitting a terrifying aura of destruction.

However, Levi held back..
