

Wizard 588

Chapter 588: Level 13 Golden Snake! Blood Knight! (4)

He did not shoot out this terrifying attack.

If he used this horn now, the wizard tower might be pierced. At that time, it might cause some unnecessary trouble.

In the end, he named his golden horn the Annihilation Horn.

Although there was no test, the energy contained in it was definitely at the attack level of a third-circle spell.

It had the ability to injure or even kill Third-Circle Wizards.

Of course, the prerequisite was to hit the other party.

Moreover, Levi's current Golden Snake power was only enough to use this attack once.

If his attack missed, the power of the Golden Snake would be drained in a short period of time. His Golden Snake Scales' defense would also be affected.

Therefore, this was an absolute killing move.

It was fine if he did not come out, but once he came out, he would definitely hit!

After attaining level 13 of the Golden Snake Breathing Technique, Levi also gained some confidence.

When his Golden Snake Scales completely hardened, he believed that even if his current strength was not comparable to the third-circle, it would not be too far off. At the very least, he would definitely be able to fight.

The wizard on the other side should be unable to pose a threat to his life.

Of course, he could not let his guard down. He had to be careful.

"Now that Golden Snake is at level 13, it can be considered to have stepped into a new stage. I should give it a new realm name."

"After level 13, it's the stage of blood metamorphosis from youngling to adult. I might as well call it blood molting... Forget it, it doesn't sound good. Why don't I call it blood metamorphosis? No, it's a little too rash."

After thinking about it, Levi decided that it was better to give it an ordinary name.

"Then let's call it a Blood Knight. The bloodline goes back to its origin and finally advances to the original."

Levi finally decided on the name of the new realm.

Using the Golden Snake Breathing Technique as an example, the first level of the Transformation Scales was the First Transformation of the Blood Source Realm.

After that, he would undergo the second transformation. The level 2 transformation of Scales was the Second Transformation of the Blood Source Realm.

And so on, until the next major realm arrived.

"I'll continue to hide for a while. After I complete my transformation, I'll test the defense of the snake scales. I'll delay Will as much as I can. There's no hurry to attack. I'll delay until that person can't wait anymore." Levi had a plan in mind.

In the following days, he applied for two months of leave from Huffman. During these two months of leave, he waited for his scales to harden while improving his strength in the path of wizardry.

A month later, Levi's scales had completely hardened.

At the same time, his power rune also cultivated to level 3.

Levi—

Strength (Rune Language) Rune: Level 3 (1/10,000), Special Effect: Horned Bull Constellation Power (Level 3)

[Horned Bull Constellation Power (level 3): The Rune Language communicates with the Horned Bull Constellation. The power of stars increases your strength.

Current Strength (Rune Language) increases by 20%.]

After level 3, Levi also upgraded the power runes solidified on Tyrant's body.

This increased Tyrant's strength greatly.

He had no other combat targets and could only continue to let Tyrant attack him.

The current Tyrant had a level 3 Strength rune. If it attacked with all its might, it was enough to break through the defense of most Second-Circle Wizards.

The huge axe slashed at Levi's shining dark golden scales.

Bang!

The huge axe in Tyrant's hand trembled and even had a crack.

On the other hand, Levi was only sent flying by the force and hit the wall of the training room.

There were only some fine cracks on its scales, but they were not damaged.

Then, these cracks recovered in an instant.

"It's not enough. Tyrant's attack is not enough. I can't test my limit yet!" Levi made up his mind and slashed at his other arm with Frostmourne and the Gray Destruction Power.

He could only use this method to test his limits.

Crack.

This was also the first time the Gray Destruction Power had encountered an enemy.

The powerful scales resisted the Gray Destruction Power tenaciously. In the end, the scales cracked layer by layer and surfaced again. Although one layer of scales could not be defended, Levi's golden snake power could instantly cover the second layer of scales when the first layer shattered. Search new level. Org on google

In this way, Levi's full-powered Gray Destruction Cross Slash did not shatter Levi's scales.

"I can't even break my own defense. With my current attack power, even if I can't compare to a Third-Circle Wizard, I'm not too far off. From the looks of it, my scales can be considered to have the defense of a Third-Circle spell. It's about the strength of a Grade C defense."

He looked at the power runes on Tyrant's body and had a thought.

"Right, I can try to solidify my Strength rune now."

With a thought, the Strength rune on Tyrant's body slowly floated up and entered Levi's body.

At the same time, the power runes representing the Horned Bull Constellation Power flickered on Levi's arms.

Levi was pleasantly surprised to feel that his strength had clearly swelled.

"From the looks of it, the Rune Language can be solidified on the body, just like those passive defensive spells."

Levi was already a level 12 Red Lotus, and with the enhancement of the Strength rune, his strength in his normal state had increased greatly.

With the enhancement of Red Lotus, Giant Whale, Night, King Kong, and Nine Swords, Levi's strength would reach an extremely terrifying level.

"It shouldn't be a problem to shatter an ordinary third-circle defensive field." The wound on Levi's arm quickly healed, and not long after, it was as good as new.

He dripped his blood into the Rowling Crystal..
