

Wizard 592

Chapter 592: Knight's Origin, First Transformation of the Blood Source vs Ordinary Third-circle! (3)

In theory, every fur clan member was a little genius who cultivated the path of knights.

Unfortunately, the fur clan did not have the Knight Breathing Technique.

Other than a few individuals like Algerta, there were no other bloodlines in their bodies.

However, bloodline was not a problem. Levi planned to return home after a while.

He would head to the Lush Forest Witches to purchase some complete Life School of Thought inheritances.

He wanted to research the bloodline transplant technique. This technique was already relatively developed in the Life School of Thought.

The prerequisite for those bloodline modification wizards to modify one's bloodline was to imbue the recipient's body with the bloodline of the organ donor. This would ensure compatibility between the transplanted organs and the body.

Therefore, for bloodline modification wizards, being able to fuse more bloodlines without conflict was their talent. As for Machinery Heart, it was not decisive.

The Hundred Beast Berserk Witch of Boiling Beast Blood was a rare genius in the bloodline modification system. His body had fused with the bloodlines of hundreds of extraordinary creatures, transforming himself into a transcendent creature, and he was still alive and well.

Next, Levi personally taught Algerta some sword skills.

With Levi's guidance, Algerta was able to pick up the skills very quickly. In just half a day, she had already mastered the basics of Ripple Force!

"I picked up a treasure."

Levi was pleasantly surprised.

"By the way, have you heard of the Silver Frost Wolf?"

Levi asked as he took out the Frost Wolf Breathing Technique Inheritance Diagram.

Algerta looked at the majestic silver wolf on the inheritance diagram, which emitted a powerful aura, and was shocked. Then, she fell to the ground with a thud.

"God of White Wolf!"

Levi looked at the white wolf girl and pondered. Then, he asked, "Is this your

White wolf God?"

"Yes, Master. How do you have the Divine Portrait of our White Wolf God? This is a sacred object that only exists in our legends."

"According to the old legends, if the Divine Portrait appears, the God of White Wolf, who has disappeared for a long time, will return to the world and lead the White Wolf clan out of the sea of suffering!"

Algetra asked, her expression was filled with excitement.

Levi waved his hand, dismissing Algetra to practice her swordsmanship on her own. He stood where he was, deep in thought.

"Interesting. The totem gods of the tribes of other planes actually became the ancestral breathing technique inheritance diagram of a baron family in the

Human world."

Whether it was called the inheritance diagram or the divine portrait was not important.

More importantly, it seemed that the totem of the fur clan and the symbol of the Frost Wolf Family were the same thing.

Levi felt like he was starting to understand a small part of the truth behind the Knight's origins.

Since the Frost Wolf family could cultivate the Frostwolf Breathing Technique, they definitely had the Silver Frostwolf bloodline in their bodies, which was the bloodline of the White Wolf God.

Even though these bloodlines had become extremely thin after the passage of time, as long as they were not zero, one could cultivate the breathing technique. It was just that the speed of cultivation was different.

Previously, Levi had thought that knights were the product of bloodline experiments by the wizards. However, after coming to the Wizard World, he discovered that although wizards had mastered the technique of bloodline transplantation, there were also bloodline modification wizards.

However, it was still different from the bloodline of knights.

The first knights had appeared long ago. At the beginning of the wizard civilization, there were already some knights walking in the human world.

At present, Levi had two guesses about the birth of Knights.

The first possibility was that the knights were the creations of the Seven Gods.

This could be seen from the various creation legends left behind by the Seven Gods. For example, in the “Seven Knights of the Sky”, the knights were created from the remains of the saints.

These legends were true and false. They could not be completely believed, but they could still be used as a reference.

It was possible that the gods had sought out powerful beings from the multi-dimensional planes and passed their bloodlines to the human ancestors in ancient times. Then, the earliest knights were born to manage the human world and maintain the order of the church.

The second possibility was that it was a long time ago, so long ago that even the wizard civilization had not been born.

Many planes in this universe have experienced an unprecedented plane convergence. Countless planes overlapped, causing many powerful creatures from the multi-dimensional planes to more or less leave their bloodlines in the human body for various reasons.

Some of the wisest humans had used their efforts to develop this bloodline and created the so-called Knight’s Breathing Technique. They relied on the bloodline to learn the breathing technique and then used the breathing technique to purify the bloodline, forming a virtuous cycle.www.updqte.com

Of course, these were all Levi's guesses. If he wanted to know the true origins of the knights, he still needed to explore them step by step.

He gathered his thoughts and immediately called the other three brothers over.

"There are two human sword skills here. One is the Golden Cross Slash, and the other is the Gray Destruction Cross Slash. Take them and cultivate them. If you can master them within half a month, I will reward you." Levi said.

"Thank you, Master!"

Levi had prepared four mithril longswords for each of the four fur clan members, which was enough for them to use.

Then, he let them be in charge of some miscellaneous work in the wizard tower. After they finished their work, they would practice their swords. Levi, on the other hand, devoted himself to making medicine and cultivating.

The Lion, Tiger, and Leopard brothers also started to learn these two sword skills one after another in the following week.

This was a huge blow to Levi.

He considered himself to be a genius in the way of the sword. Back then, it took him three days to master the Golden Cross Slash.

And these three seemingly ordinary fur clan brothers were actually able to learn two Legendary sword skills within a week..
