

Wizard 594

Chapter 594: Knight's Origin, First Transformation of the Blood Source vs Ordinary Third-circle! (5)

"Come, it's time for a new home," Levi said.

The Saint Scorpions and the Red-Faced Sea Ghost Spiders entered their new home. The Saint Scorpions settled down in the forest, while the Red-Faced Sea Ghost Spiders, which loved water, settled down by the lake.

"You guys stay at home and cultivate well. I'll be out for a few days and will be back soon. Tiga, look after the house," Levi warned.

"Yes, Master!" As the strongest person here, Tiga's prestige was naturally the highest. Moreover, he handled things calmly, so Levi was more at ease with him in charge.

As such, Levi requested one last month off from Huffman.

He would be heading out with Wizard Will to hunt demons.

After dealing with Will, he would then make a trip back to Area 9.

Outside the Hundred-Eyed Demon Territory.

Currently, the demonic aura in this area was a little thinner than before.

The Hundred-Eyed Demon King entered the Abyss Well, which the Grand Wizard guarded.

It was said that a Legendary Wizard was already preparing a corresponding spell. Once the spell was ready, it would be enough to destroy the Abyss Well. After getting off the airship, Levi was on guard. He could feel Wizard Will's increasing hostility and sneered in his heart.

Wizard Will enthusiastically introduced Levi to the things to note when hunting Horned Demons.

It was as if there was an injured Horned Demon.

After the two of them left the stronghold, Wizard Will stopped in the center of the outer area of the Hundred-Eyes Demon Territory.

"What's wrong? Are the Horned Demons here?" Levi asked despite knowing the answer.

Wizard Will shook his head and smiled, "There were...however, I already killed them.'

A pitch-black horn had appeared in his hand at some point in time, emitting traces of demonic aura.

Judging from the aura left behind by the horn, this horned demon was a level 3 demon, which was comparable to a Third-Circle Wizard when it was alive.

The horn of a level 3 Horned Demon was extremely precious.

After the demonic aura was purified, it could be used to refine potions above the third-circle.

The horn itself could also be used to make a third-circle Wizard Tool.

In short, it had endless uses.

Although there were many demons in the Hundred-Eyed Demon Territory, there were not many true Abyss Demons.

Otherwise, the eye demons and the Horned Demons wouldn't be so precious.

"What do you mean?" Levi's expression changed, "Sir Will, what do you mean? Didn't you say that we would hunt together? Since you've already killed it? Why did you bother calling me out?"

Levi was acting.

In the next moment, he sensed danger from his Spider Sensing.

A black shadow appeared behind Levi. This shadow held a short dagger in its hand and slashed through the air, stabbing towards Levi's back.

"Die!"

Thousand Faced Knight sneered.

He had used his second-ring spell, Shadow Clone, to hide in Levi's shadow.

This was the most difficult second-ring spell of the Shadow School of Thought. After mastering it, one could have a powerful shadow clone.

The shadow clone could hide unknowingly in the enemy's shadow and then appear to launch an attack!

Levi had no idea when his shadow had been attacked by the shadow clone.

The Shadow School of Thought's spells were tricky and unpredictable.

Moreover, Thousand Faced Knight was a descendant of the Dark Elves, so his understanding of shadow magic was different from ordinary people. Therefore, the power of this spell in his hands was astonishing.

He, who was under the third-circle, was ambushed!

Even if he didn't die, he would be heavily injured!

Crack!

Following the sound of something breaking.

Thousand Faced Knight suddenly looked over.

Levi was safe and sound.

The shadow clone's dagger stabbed into Levi's back as if it had stabbed into a Pure Luminant gold armor that had been tempered for thousands of years.

After the indestructible dagger pierced through the defensive field of Levi's second-circle Earth Spirit Shield, it did not even manage to break a single layer of Levi's scales.

Not only that but the dagger was also shattered by some kind of backlash.

Levi's golden hand grabbed the shadow clone's arm.

He pulled it out from the shadow behind him.

Then, the terrifying Red Lotus Hellfire burned the shadow clone into nothingness.

At the same time, Thousand Faced Knight, who saw that his shadow clone had failed, could not help but ask in surprise, "You're not a Second-Circle Wizard?" What answered him was Levi's berserk Five Fireballs Technique!

With the special effects of the Underground Fire Dominator and fire element affinity...

The Five Fireballs swept out with terrifying power!

Boom!

Flames soared into the sky.

The three-circle defensive field around Thousand Faced Knight flickered and blocked the attack.

"Interesting. It seems like you have long discovered my identity, which is why you are so guarded. Sir Levi, you have hidden yourself well..."

Thousand Faced Knight did not panic. Although his attack had missed, the situation was still within his control.

With his three-circle defensive field and innate spells, he was naturally invincible.

Levi's seemingly terrifying second-ring spell could not even shatter his defensive field.

This was the difference between an Intermediate Wizard and a low-level wizard. It was like the difference between an adult and a child.

This Levi was a little special since he could defend himself from the attack of his second-circle shadow clone.

However, it was impossible for Levi to fight against a Third-Circle Wizard.

Therefore, the current situation was nothing more than just spending a little more time hunting Levi.

Innate spell, Shadow Burst!

Thousand Faced Knight thought.

Black blades shot out.

In an instant, countless sharp blades tore through the air like raindrops hitting banana leaves.

Thousand Faced Knight relied on his speed advantage to continuously attack Levi with his innate spells.

Levi's defensive field was fully activated. Ashes wrapped around him and golden scales attached to his body!

He was like a golden God of War..
