

Wizard 596

Chapter 596: Legendary Forbidden Technique! New Mutation, Dragon Demon Breathing Technique! (1)

If possible, Levi did not want to kill a legendary knight.

In this era, legendary knights were extremely rare. They were scattered in the Wizard World or the human world.

He had always thought that a weak group like legendary knights should stick together for warmth.

However, this Thousand Faced Knight had to be killed.

This person had a strange personality and was difficult to befriend. Moreover, he was an assassin and was powerful. He also had the intention to harm Levi.

If he kept it, it would definitely backfire on him.

Therefore, it was better to kill him.

He found a place to rest quietly.

His injuries began to heal quickly. After replenishing his potions and food, his stamina began to recover.

"The power of the Annihilation Horn is indeed terrifying. It can instantly shatter the third-circle defensive field." Levi recalled his last attack.

The terrifying Annihilation Beam destroyed the Thousand Faced Knight's head.

"With my current defense, I can basically barely withstand the attacks of a Third-Circle Wizard. At the very least, with my powerful physique, I won't be instantly killed.

However, the disadvantage was that his spells were not powerful enough. He had no choice. He was only an ordinary second-circle wizard now, and the gap between him and a third-circle wizard was too great.

"His speed is also much slower than a Third -Circle Wizard. I have to quickly cultivate the Blood Beast Breathing Technique to level 13."

Levi quietly summarized his gains from this battle.

In short, he now had the power to contend with a Third-Circle Wizard.

Of course, for a third-circle like the Thousand Faced Knight, although he was proficient in assassination and was very dangerous, his true strength in a head-on battle was only at the level of a beginner third-circle.

Compared to the Lush Forest Witch, Huffman was still far behind.

"Let's see what the Thousand Faced Knight has. Just that Horned Demon Horn alone is worth it.'

When Levi opened the Thousand Faced Knight's storage bag and saw the pile of Aether Stones, he held his breath.

"So many..."

Levi counted. There were a total of 80,000 Aether Stones.

"So rich? And he still wants to be an assassin? Is a Third-Circle Wizard that in-depth?" Levi couldn't help but complain.

He had worked hard on all kinds of part-time jobs, killing people and snatching treasures. Even though he did not spend much, he had only saved up 70,000 Aether Stones.

This Thousand Faced Knight was indeed a Third-Circle Wizard. He had 80,000 Aether Stones on him.

Levi's Aether Stone reserves.

It had actually reached 150,000!

"I'm rich, I'm rich."

Other than the Aether Stone, the Thousand Faced Knight also had many good things in his storage space.

A Horned Demon's horn was very valuable, especially for a pharmacist like Levi.

Then, there were some spell books and spell crystal balls.

Spell books were low-level spell inheritance items. They were usually used to record cantrips, First-Ring Spells, and second-ring spells' spell models.

After the third-circle, as the spell model became more and more complicated and multidimensional, the spell books were not enough.

The spell crystal ball was the thing that recorded the third-circle spell model.

At the Tower of Merit, a third-circle spell crystal ball cost 30,000 merit points. It was very expensive.

In the Thousand Faced Knight bag, Levi saw four crystal balls.

From the looks of it, the Thousand Faced Knight did not master many third-circle spells, only four.

He was still far from being a third-circle senior wizard.

These four third-circle spells were Shadow Explosion, Shadow Walk, Shadow Stream Shield, and Shadow Demon Descent.

Levi had seen the Thousand Faced Knight use the Shadow Explosion and Shadow Walk before.

The Thousand Faced Knight even used the black shadow explosion as its innate spell. Its attack was very fierce and lasted for a long time, causing Levi to suffer a lot.

Shadow Walk, on the other hand, could allow one to escape into the shadows. This was a divine skill for assassination and stealth.

Shadow Stream Shield was a third -circle defensive spell with average defense. Shadow Stream's defensive spells were not good to begin with. This was a school that specialized in stealth and instant kills.

However, the Thousand Faced Knight had no choice but to use this defensive spell as his third-circle defensive field.

On this point, Levi was different. He could combine the strengths of a hundred schools of thought and combine them with the strongest offensive and defensive combination spell.

The last was Shadow Demon Descent. It summoned a shadow demon comparable to a Third -Circle Wizard to attack the enemy.

However, this spell had just been exchanged from the Tower of Merit by the Thousand Faced Knight, and he had yet to construct the spell model.

Apart from third-circle spells, there were also many other second-ring spells.

To Levi, there was no value in learning.

Levi currently did not have the talent of the Shadow Faction, so he had no intention of cultivating these spells for the time being.

He didn't want to be an assassin, nor did he like assassination and stealth.

To him, if he could win, it would be a crushing defeat.

If he couldn't win, he would obediently hide and never cause trouble, let alone assassinate others.

After fusing the four Meditation Arts—Earth, Fire, Wind, and Water—he might be able to learn Shadow Walk. This spell was not bad for saving his life.

All that was left were some casting materials and the Shadow Meditation Art.

Of course, there was also a third-circle Wizard Tool that looked like a dagger. “This thing is only used by sissies.” Levi looked at the short dagger and could not help but complain.

This third-circle Wizard Tool was a little damaged. It looked like it had been broken a long time ago, so the Thousand Faced Knight did not use it.

Moreover, he did not buy himself a new third-circle Wizard Tool. He saved up 80,000 Aether Stones and could not bear to spend it. He did not know what he wanted to do.

Now that he had died, these Aether Stones had all benefited Levi.

Levi suddenly came to a realization.

With so many Aether Stones, he had to hurry up and increase his combat strength in the future..
