

Wizard 598

Chapter 598: Legendary Forbidden Technique! New Mutation, Dragon Demon Breathing Technique! (3)

Therefore, a Ruin Hunter Wizard with low EQ was a tomb raider from the Wizard World.

Joann happened to pass by Levi's Black Fire Island.

Using the concealment spells and some knowledge of arrays that he had mastered, he quietly headed to the Black Fire Island to investigate. He realized that there seemed to be some arrays on it. Under the arrays, there was a universe hidden.

In the end, after waiting for a while, he was sure that this was an abandoned wizard's cave abode.

He sensed the aura of many different transcendent creatures inside, but there was no aura of a wizard.

The aura of these transcendent creatures was very powerful. With his ability as a First-Circle Wizard, it was difficult to deal with them.

Therefore, he went back and invited his boss.

Second-circle wizard, Heart Burning Fire Coulomb.

With the strength of a Second -Circle Wizard, it should not be a problem for him to forcefully break the array and defeat the transcendent creature inside.

At that time, Coulomb would be able to take a share of the treasures in this hidden wizard cave abode.

Coulomb had just advanced to the second-circle and was also a Number One in Area 9. He was currently in high spirits.

Especially a few years ago, his teacher, Phelps, had also advanced to the third -circle in this chaotic world.

He became a Third-Circle Wizard that was as rare as a phoenix's feather in Area 9. He established himself as a king, established his own sect, and became an ancestor. He called himself "Extreme Fire Ancestral Wizard".

Speaking of which, his teacher was also a little special. He was once considered an anomaly among the nomadic wizards in Area 9.

At 250 years old, with the talent of the Children of Chaos, Phelps advanced to a second-circle ordinary wizard at this age, which was almost impossible to break through to the second-circle.

Such a situation was very rare and was considered a legend in Area 9 at that time.

Some people even realized that Phelps, who had advanced to the second-circle, had broken the record of Area 9 in the past thousand years. He could be said to be the oldest person who achieved this.

After all, breaking through didn't mean that the older one was, the better. The fact that Phelps had broken through so late meant that his talent was average among the Children of Chaos.

The success rate of such a person advancing to the second-circle was very low.

Most people thought that it was even more impossible for Phelps to advance to the third-circle in this life.

Coulomb felt the same way.

However, 50 years ago, his teacher had actually found an ancient ruin with the help of Ruin Hunter Joann.

In order to find a chance to break through to the third-circle, the teacher, who refused to admit defeat, stepped into the ruins. After that, there was no news of him.

This disappearance lasted for fifty years.

Just as Coulomb thought that his cheap teacher had already died in the wizard ruins, his teacher had actually returned a few years ago.

Moreover, 50 years later, he had jumped from a second-circle ordinary wizard to the Third-Circle Wizard realm.

It had to be known that with Phelps's talent, advancing to the second-circle at 250 years old was already his limit.

It was almost impossible to advance to the third-circle in his lifetime. Second-Circle Wizards only had a lifespan of 300 years.

Coulomb didn't know what his teacher had experienced in the ruins.

In short, his teacher had successfully broken through to the third -circle.

In the past two years in Area 9, the Extreme Fire Ancestral Wizard had been in the limelight. Even Morpheus of Whale Song Island did not dare to provoke him casually.

The Extreme Fire Ancestral Wizard had gathered some wandering wizards who had not been organized because of the war.

In just two years, this organization had grown rapidly and established an organization called the Tower of Dreams.

Just like that, Area 9 formed the three-way structure of Whale Song Island, the Tower of Dreams, and the Tower of Ocean Currents.

Among them, the dark wizard camp's Whale Song Island and the righteous wizard camp's Tower of Ocean Currents were fighting fiercely. The Tower of Dreams was still considered neutral.

As a member of the Third-Circle Wizard organization, even Coulomb's breathing became heavy.

He looked determinedly at the island in front of him.

"I'll go in and challenge the array later," Coulomb said.

"Boss Coulomb, what about me?" Joann asked.

"You're in charge of waving the flag and shouting." Coulomb was confident and powerful.

"Alright, Boss, be careful. There should be a second-circle transcendent creature inside," Joann reminded.

Coulomb, on the other hand, stood straight with his hands behind his back, looking like an otherworldly expert.

Then, he began to cast a spell and chanted.

He raised his palm high above him, holding up five huge fireballs that emitted a terrifying might.

"There's nothing that a Five Fireball Technique can't destroy. If there is, then let's do it again." Coulomb revealed the smile of an expert.

"Is this the power of a second-ring spell?"

Joann yearned to become a Second-Circle Wizard.

He had the ability to search for ruins, but he did not have the strength to explore them.

Every time, he could only cooperate with the strong and be a tool for the strong.

In the end, after the experts finished exploring the ruins, he took a sip of soup.

The Five Fireball Technique struck the defensive array set up by Levi, and circles of ripples began to appear in the air.

Levi's array was only a first-circle array. It was difficult to defend against a second-ring spell like the Five Fireball Technique. In just a moment, the array began to fluctuate.

Coulomb cast another Five Fireball Technique.

The outer layer of the defensive array was completely shattered.

It revealed the fog array inside. This was the strongest first-circle maze array set up by Levi. It could mess up directions and block Perception.

This array covered an extremely large area. Unless one had the strength of a Third-Circle Wizard, it was impossible to break it by force. They had to find the array core and destroy it..
