

Wizard 601

Chapter 601: Legendary Forbidden Technique! New Mutation, Dragon Demon Breathing Technique! (6)

He knew that the Pan's Labyrinth was not simple.

Perhaps he would only be qualified to explore the Pan's Labyrinth after he became an Intermediate Wizard.

Levi did not stay on the Black Fire Island for long. He left after taking Gustav and the others away.

He had applied for a month's leave this time, and it would take more than half a month on the way.

Currently, only the Swordsman Mantis, Levi's array, and the medicinal field were left on Black Fire Island.

Coulomb and Joann had already left.

Levi did not kill them. He was quite interested in the Extreme Fire Ancestral Wizard.

He let the two of them continue to play their roles in the Tower of Dreams. Perhaps one day, they would be useful.

Levi was not a person who liked to fight and kill.

After that, Levi went to the Giant Tree Secret Realm.

He visited his companions in the Gray Tower.

Before he left, he spent 10,000 Aether Stones to obtain the basic bloodline transplant technology and props from the Lush Forest Witch.

Bloodline transplantation was not a profound technique in the Life School of Thought, so 10,000 yuan was completely enough.

After finishing his business, Levi left Area 9 in satisfaction and boarded the wizard airship to Riptide City.

Holy Brilliance Calendar Year 1046, Month of Grass.

Levi returned to Riptide City.

Mansion 81, which was next to his, was empty again.

"Sigh, I'm a little bored without Wizard Will." Levi mocked himself in his heart.

Although Wizard Will wanted to harm him, he was used to having a warm and hospitable neighbor accompany him after being his neighbor for so many years.

Maybe I'm too lonely? Levi thought to herself.

"Master, you're back!" Algerta ran out excitedly.

The three Lion Tiger Leopard brothers also went out to welcome Levi.

"Is there anything going on in the wizard tower while I'm away?" Levi asked.

"No, it's just that a wizard named Rex came to you once. He left after finding out you weren't around," Tiga said.

"Rex?" Levi was alarmed.

Why was this person, who was suspected to be the prime suspect in his assassination, looking for him?

Could it be that the assassination had failed and they wanted to negotiate peace?

"Alright. Come, show me the results of your sword practice this month," Levi said.

"Sure, I'll go first. Hehe." Algerta waved her sword excitedly. She had done well with the Golden Cross Slash and the Gray Destruction Cross Slash. If converted to the level of the proficiency panel, it should be level 2.

It had only been a month. This speed was enough.

"You've passed." Levi couldn't help but stroke Algerta's furry head.

It felt like he was touching a Shiba Inu's head.

Not bad at all.

Algerta's face turned red. She didn't dare move as she allowed her master to touch her head.

Needless to say, Master's rough hands were quite comfortable.

The three brothers also stuck their heads out, but Levi automatically ignored them.

Although he was a straight man who appreciated strength, it didn't mean that there was a problem with his sexual orientation. He swore to God that he was interested in women.

He couldn't do such a gay thing.

"Phew, I can cultivate in Riptide City in peace in the future. If I catch new transcendent creatures, I can put them into Greenfield Immortal House."

In short, most transcendent creatures, especially the Dragon Clan, were stronger and larger.

With the space in Greenfield Immortal House, Levi shouldn't need to worry about not having enough space before he reached the fourth-circle stage. He didn't need to change houses for the time being.

Gustav lazily occupied the largest area in the Greenfield Immortal House. The Crimson Fire Dragon Lizard, Bone Snake, and Red Sand Ape all circled this big guy from afar.

Leviathan was the only one spraying water in the lake. It became the fountain scenery of Greenfield Immortal House.

"Hey, why do I feel like I'm playing Pet Elves?"

"Forget it, let me collect more transcendent pets! My goal is to become the strongest pet master in the Wizard World!"

In the following days, Levi returned to his Pharmacy and cultivated.

After obtaining the secret medicine, his breathing technique began to improve again.

As for Rex who was looking for him, Levi didn't care.

It seemed that the other party did not dare to make a move near the Tower of Pharmacists.

In that case, he would try his best not to leave the city in the future.

Time passed quickly.

Half a year later, Levi, who was cultivating in Riptide City, suddenly felt a strong fluctuation.

Not only he, but even the two high-level wizards who were in seclusion in the Tower of Riptide also opened their eyes.

The Current Controller, Krysten, and the Air Current Conductor, Eyre.

They were originally cultivating together.

"What a powerful fluctuation. The Legendary Wizard has made his move..." Eyre muttered.

"Yes, the legendary forbidden spell that was used to destroy the Abyss Well has probably been released."

"A forbidden spell that a Legendary Wizard needs to cast continuously for several years. Even the gods of the astral world wouldn't dare to take it head-on. This Abyss Well should have been destroyed." The two high-level wizards left the Tower of Riptide.

At this moment, night had fallen.

In the sky above Riptide City, wizards stood in the air with shocked expressions.

They looked at the distant sea in a daze. In the distant sea area at the center of the Hundred-Eyed Demon Territory.

There seemed to be a crimson mushroom cloud that soared thousands of feet into the sky, illuminating the sea.

"I reckon that it won't be long before the biggest tsunami in the Endless Sea in a thousand years will gradually sweep through the entire territory. The power of the legendary forbidden technique is too powerful. Even if a Legendary Wizard deliberately controls it in a small area, the power released will affect the entire Endless Sea like a butterfly effect." Wizard Eyre sighed..
