

Wizard 602

Chapter 602: Legendary Forbidden Technique! New Mutation, Dragon Demon Breathing Technique! (7)

"Of course the wizards are fine, but some mortals who can't hide in time might suffer."

"It can't be helped. Destroying the Abyss Well is our top priority. We can only sacrifice some people for this."

The couple from Riptide City had complicated expressions.

In Middle Riptide, Levi, Algerta, and company were also looking at the terrifying pillar of light and mushroom cloud.

At this moment, all the wizards in Riptide City were admiring the wonder created by the legendary forbidden spell.

Levi was shocked.

At this moment, he finally knew why Legendary Wizards were called Legends.

"Is this really a power that humans can master?"

"Can a knight reach this level one day?"

Levi asked himself.

Not long after, a terrifying tsunami drowned the island below Riptide City. The huge wave was about to hit Riptide City.

Of course, there was an array in Riptide City, so these huge waves would not destroy it.

Levi sighed and went back to continue cultivating. The spark of becoming a Legendary Wizard had already lit up in his heart.

This was how a man should be!

A month later.

The Star Tower announced that the Abyss Well located in the ancient wizard ruins in the center of the Hundred-Eyed Demon Territory had been completely destroyed.

The passage where the Abyssal Civilization tried to invade the wizard civilization was gone.

The ancient wizard ruins were gone too.

The wizards of the Endless Sea cheered.

They cheered for the legendary and the wizard civilization.

"The Abyssal Civilization has repeatedly invaded our wizard civilization. After quelling the civil strife and the great expedition, I will follow Sauron's example and lead the legendary wizards to attack the bottomless abyss to intimidate those restless demon lords! I will let the light of the Eternal Blazing Sun melt the darkness of the abyss!"

The chairman of the Great Council, the Blazing Sun God Wizard Edmund, said.

With just one sentence, the Wizard World erupted.

Everyone seemed to be on steroids.

After Levi heard this, his heart was calm.

It was just the words of a big shot. How could the Bottomless Abyss be so easy to defeat?

Of course, these had nothing to do with small fries like Levi.

With his strength, forget about attacking the Abyss Lord.

Any demon above Level 3 on the first floor would be able to beat him.

He had a long road ahead of him.

A year later.

Holy Brilliance Calendar Year 1047, Month of Vitality.

Levi was fifty-seven years old.

He held the Klein crystal ball in his hand.

His spiritual force had reached 63 points.

He was getting closer and closer to the 70 points of a second-circle senior wizard.

From the looks of it, there was hope of advancing to a second-circle senior wizard before the age of 60.

Such a level was considered above average in the Endless Sea.

The Spider and Scorpion Song had also cultivated to its limit. Levi controlled more than ten thousand Saint Scorpions and Red-Faced Sea Ghost Spiders. Levi's idea of becoming an insect emperor in the Wizard World went one step further.

The Saint Scorpions had already iterated to version 4.0. Be it in terms of size or defense, it was much stronger than before.

Levi estimated that by version 6.0 of the Saint Scorpions, it would be about the same level as the Red-Faced Sea Ghost Spider, which was the best among the low-grade Zergs.

At that time, thousands of Saint Scorpions would swarm over and let this world experience what Old Demon Insect Levi was like!

In addition, in terms of the path of knights, the three breathing techniques Levi obtained in the human world had all reached level 11 of legendary.

Levi—

Mountain Ape Breathing Technique: Level 11 (Maximum), Special Effect: Mountain Passage Arm (Solid State)

Maya Breathing Technique: Level 11 (Maximum), Special Effect: Endless Wind (Solid State), Wind Abandonment.

Musk Bull Breathing Technique: Level 11 (Maximum), Special Effect: Shocking Hoof (Solid State), War Horn.

Among these Special Effects, the first Special Effect was similar to Levi's previous breathing technique. There was nothing to say.

However, the Maya Breathing Technique and the Musk Bull Breathing Technique also produced a second Special Effect.

Wind Abandonment was a special Effect of the wind element affinity. Its effect was slightly stronger than Son of the Wind.

With these two elemental affinity talents combined, Levi's wind element affinity should not be inferior to a double affinity.

Coupled with the proficiency panel, his speed should not be inferior to the Wind Element Child.

The only difference might be the difference in resources.

As for [War Horn], it was similar to a passive halo that increased the strength of allies.

In addition, the three breathing techniques also had legendary organs.

The mountain ape's supernatural organ was Levi's hands, which were similar to the Saint Ape's. They were superimposed and had ordinary effects. At the moment, there were no special effects.

The Musk Bull's supernatural organs were the curved horns on both sides of Levi's head.

Just as he had expected, he had become a real minotaur, or rather, the "Divine Chaos Bull Demon King" of the Wizard World.

It was all the pharmacists' fault for giving themselves nicknames. Now, he was really the Minotaur Levi!

The supernatural organ of the Maya Breathing Technique was a pair of bird wings that looked like golden eagles.

Including Blood Wings, Levi already had two pairs of wings.

Eagle wings could create violent winds and soar into the sky. They could also attack enemies. They had many functions.

To the current Levi, these level 11 legendary breathing techniques were already very difficult to increase his strength.

He studied mainly to break through the limit and mutate in the future.

Moreover, he felt that, just like the fusion of his Meditation Art, perhaps when the level of his breathing technique increased a little, the proficiency panel would be more flexible.

He could master all the breathing techniques step by step and gather them together to form a final breathing technique that was evolving towards the ultimate biological path.

However, from the looks of it, it could only be fused with the same type.

After adjusting his condition.

Levi directly mutated the Musk Bull Breathing Technique and the Ostrich Mountain Breathing Technique. The Ostrich Mountain had been stuck at the Maximum of level 11 for a long time, waiting for this day.

In the end, a new mutated breathing technique beyond legendary was born.

Levi—

Dragon Demon Breathing Technique: Level 11 (1/300,000), Special Effect: Dragon Demon Feet (Solid State), War Horn, Groundbreaking.
