

## **Wizard 607**

Chapter 607: Earth, Fire, Wind, and Water—Four Elements Combined! Great Fusion! (5)

The Myriad Machine Plane was the birthplace of the School of Alchemy. There were many mechanical lifeforms there, equivalent to high-level alchemy creatures.

It was said that the Father of Plagues had spread a “mechanical plague” that had never appeared before on the Myriad Machine Plane.

This caused many mechanical lifeforms that were originally loyal to wizards to defect and cause an intelligent mechanical crisis!

Before the war began, the wizards firmly believed that the Myriad Machine Plane was the most unlikely place to rebel. However, the truth was that the enemy was also becoming stronger and stronger.

The Father of Plagues said, “What era is it now? Are you still playing with traditional plagues?”

Levi was worried about the Tower Masters safety.

The enemy was aggressive and his attacks were strange and bizarre. It was a headache.

At the same time.

This year, Levi was 59 years old. He was getting closer and closer to the 60-year-old year in his previous life. Of course, he was getting further and further away from the retirement age in his previous life...

"According to the standards of the human world, I'm already an old man, but I feel that I'll always be 18 and forever young. This must be the charm of cultivation."

Levi finished cultivating and felt his spiritual power growing stronger. He muttered to himself.

The Klein Crystal displayed Levi's current level of mental strength.

"Spiritual force: 68 points."

"Spell power: 1,998 points."

He was only two points away from becoming a second-circle senior wizard.

"He stepped into the second-circle senior realm at the age of 60. That's for sure."

However, compared to his spiritual force, Levi was more excited that his Gale Meditation Art and Deep Sea Meditation Art were also level 6.

Levi—

Deep Sea Meditation Art: Level 6 (1/40,000, can be fused)

Gale Meditation Art: Level 6 (1/40,000, can be fused)

"Sure enough, I can fuse them again."

The last time Levi fused the Earth Meditation Art with the Sun Meditation Art, it gave birth to the Underground Fire Meditation Art.

This time, he did not hesitate to fuse the Gale Meditation Art with the Deep Sea Meditation Art.

After a while.

On the proficiency panel, a new Meditation Art was born.

Levi—

Sea Gale Meditation Art: Level 6 (1/40,000, can be fused). Special Effect: King of Sea Breeze.

Underground Fire Meditation Art: Level 6 (30,001/40,000, can be fused). Special Effect: Underground Fire Dominator

After the birth of the Sea Gale Meditation Art, it was exactly as Levi had guessed. The sea gale and underground fire could also be fused.

"Hahaha, the exciting moment has arrived."

After resting, Levi immediately began the fusion.

This fusion lasted for a full three days, almost exhausting Levi's mental strength.

During this period, he kept taking mana potions to replenish his spiritual force. He had to drink a few bottles a day.

Finally, a brand new Meditation Art appeared on the proficiency panel.

Levi—

Aether Meditation Art: Level 6 (30,001/40,000). Special Effect: Aether Dominance.

[Aether Dominance: When Chaos was first created, the four elements, Earth, Fire, Wind, and Water, combined into one. This is called Aether. You can cultivate any Meditation Art of the Elementalist School. The power of the spells you cultivate in any Elementalist School has increased significantly. The spell power in your body is not divided into Elementalist Schools because you are Aether!]

It was a simple introduction, but it had an extremely powerful effect.

This meant that from now on, those factions were just decorations to Levi.

He no longer needed to learn so many Meditation Arts for the sake of comprehensive development.

In the future, he would just use the Aether Meditation Art.

"I've achieved my goal of learning whatever I want to learn. Moreover, the proficiency panel has been simplified." Levi was satisfied.

In his mind, in the sea of spiritual force.

The spell power that represented the different colors of the four elements was fused into a pure white spell power.

This was the power of Aether!

The amalgamation of the four elemental powers.

Relying on the different combinations of the four elements, lightning, ice, metal, dark energy, and various other Elementalist Schools were born.

Levi could be used to learn in the future.

There was no need to worry about the spell power of this school. They could not use the spells of another school, or the power of the spell power would weaken because of the difference in factions.

In short, it was universal!

"Perfect."

Levi then experimented with the spells he had mastered in the training room.

In the end, he found that the cantrips, First-Ring Spells, and second-ring spells all had different levels of improvement.

This was the effect of the Aether Dominance.

This Special Effect broke the division of schools and the traditional structure of the Wizard World.

Fortunately, only Levi had it. Otherwise, the Wizard World would have changed.

All sects had no meaning in dividing them in an instant.

"At the beginning of the chaos, the four elements of Earth, Fire, Wind, and Water combined into one is Aether."

Levi muttered to himself.

"I wonder if this Chaos has anything to do with the Lord of Chaos?" Levi suddenly thought of the boss of the four evil gods, the god who occupied the chaotic wilderness of the astral world.

As far as he knew, among the seven orthodox gods, the Mother of Earth's elemental authority was Earth.

The elemental authority of the Heavenly Father and the Eternal Fire was the sun and fire.

The elemental authority of the Snow Goddess was ice.

As for the Lord of Storm, it was lightning and storm.

As for the remaining Lord of the Stars and King of Ten Thousand Dragons, their authority was the mysterious stars and dragons.

According to this deduction, the Lord of Chaos, a powerful god, was very likely to have the authority of four elements!

That was why it was qualified to be called Chaos.

"Among the gods of the astral world that we know of, other than the Shadow

Lord, Lady Silence, and the God of War, the strongest might be the Lord of Chaos, who is always causing trouble."

The four evil gods under "His" command were enough to make the legendary wizards anxious. There was no doubt about "His" strength..
