

Wizard 609

Chapter 609: Second-Ring Senior! Level 13 Blood Beast!

(1)

Night.

Riptide City.

The door of the alchemy workshop slowly closed.

Levi put away Tyrant II and flew home.

He flew very fast and cautiously.

In Riptide City, Levi did not dare to use Intuition Perception on a large scale, afraid that those powerful wizards would sense it.

Therefore, he could not control the entire situation. This made Levi feel very insecure.

Especially in Upper Riptide, Rex was always thinking about how to deal with him.

However, thanks to this year's commander-in-chief election, the security in all aspects was rather strict. Therefore, Levi could feel that Rex's targeting of him had slowed down recently.

From Huffman, he learned that the Thunder Spear was one of the two candidates for this election. The other was the deputy commander of Riptide City, Blue Dragon Lady.

Her real name was Madam Elsie.

Blue Dragon Lady was a Fifth-Circle Witch from the School of Ice. At the same time, she was also a true... dragon descendant.

The Dragon Clan was a very magical existence. They did not seem to have any reproductive isolation and could always leave behind bloodlines that belonged to the Dragon Clan in the various planes.

Transcendent creatures were one of them. The other was dragon descendants.

Dragon descendants were essentially no different from mixed-blood Dragon Clans. However, mixed-blood Dragon Clans were transcendent creatures, while dragon descendants were humans.

It was said that the birth of dragon descendants dated back to ancient times. At that time, the wizard civilization had just been born, and it was difficult for it to be born between God's authority and the other powerful Multidimensional Planes.

Some evil dragons with strange sexual habits would kidnap some young and beautiful witches to their nests.

Only God knew how the mountainous dragons were connected to the witches by forcing them to have sex with them.

In short, these witches were pregnant, which gave birth to the earliest dragon descendants.

In the beginning, dragon descendant was a derogatory term. People would scold a dragon descendant for being a “fire lizard bastard”.

However, the power of the dragon descendant gradually revealed itself later.

The wizards immediately smelled their prowess.

Most Dragon Clans were born with elemental affinity.

This meant that every dragon descendant’s talent in wizardry far exceeded that of ordinary people.

Among the dragon descendants born from pure-blooded dragons, there was even a small chance that there would be descendants comparable to the Children of the Elements.

Later on, in the Wizard World, a noble and powerful but rare group appeared.

"Dragon descendant wizard."

Dragon-born wizards were born Spell Casters. Some nobles even mastered Dragon Language spells.

Most importantly, they were natural body-tempering wizards and were born with the powerful physique and talent of the Dragon Clan.

And now, dragon-descendant wizards even formed their faction, called the Dragon School of Thought.

They huddled together for warmth and were members of the dragon descendant priory.

There was no doubt that there were very few dragon-descendant wizards.

However, all of them were elites. In the current wizard civilization, they were in various industries and shone brightly.

Some of the crooked witches were already thinking about how to seduce a dragon.

This way, they could at least nurture a talented descendant.

However, after the wizard civilization became stronger, the Dragon Clan, especially sub-dragons and pure-blooded Dragons, rarely appeared.

In fact, to a certain extent, Levi could be considered a dragon descendant.

The Dragon Clan bloodlines in his body were all genuine pure-blooded Dragons.

Moreover, because of these bloodlines, he gave birth to the Special Effect of elemental affinity, which was similar to that of a dragon descendant. However, other dragon descendants only had one bloodline at most.

Inside Levi's body, flowers bloomed.

He returned to the wizard tower.

In the training room.

Levi took out Tyrant II.

He had specially strengthened the protective array.

He planned to test Tyrant II's strength.

"Ace!"

As soon as Levi shouted, Ace, who was acting as a gas stove in the kitchen, immediately turned into a beam of fire and rushed in. Behind him was Algerta, who was jogging.

Her furry white wolf tail swung back and forth.

"Hey, Master, dinner isn't ready yet." The white wolf girl was wearing a maid-style robe.

She even wore an apron like a mortal and held a spatula in her hand.

Levi did not need to eat at all now, but in order to enjoy the delicious food, he still maintained his mortal habits.

"Wait a moment." Levi sent Algerta away as Ace injected into Tyrant II's body.

Raging flames appeared from Tyrant II's body, and Ace burned with all his might.

He realized that he seemed to be unable to control Tyrant II.

It was not that Ace had become weaker, but Tyrant II's energy consumption had exceeded Ace's energy output level.

In the end, Ace, who had completely erupted, successfully activated Tyrant II.

The alchemy monster attacked Levi.

Levi was in a great mood. His muscles bulged, and his vitality soared. His level 12 Red Lotus erupted, and the Strength rune flickered as a copious amount of strength filled his entire body.

Boom!

Levi and Tyrant II began to wrestle in the training room.

Rumble!

The engine in Tyrant II's body roared, and the flames almost reached the top of the wizard tower.

Levi's body was retreating continuously.

"My strength in my normal state can no longer compare to Tyrant II. I have to superimpose other forms. That's right. When this power gets close, even a

Third-Circle Wizard has to be careful."

In the end, the exhausted Ace ran out, and the Fire Elemental Spirit shrank. "It's a pity that there's no Black Fire Island. Otherwise, Ace would be able to recharge much faster."

Currently, Ace could only rely on the trace of fire elemental power that was wandering in the world to recharge. It was relatively slow..
