

## **Wizard 610**

Chapter 610: Second Ring Senior! Level 13 Blood Beast! (2)

"In the future, we need to install a hybrid system so that Ace and Aether Stone can activate Tyrant II together. Ace can't keep up with Tyrant II's power unless it advances to level 2 Fire Elemental Spirit." He experimented with Tyrant's power.

Levi went to the lab.

In a glass-like container.

A monkey was trembling inside. On its body, there were some feathers similar to birds.

Previously, the bloodline transplant experiment on the little mouse had failed.

Levi guessed that the little mouse was too weak and could not accept the powerful bloodline of the Black Flame Demonic Bird.

Therefore, he carried out many experiments later on, and this was the result today.

After his analysis, he found that this monkey already had a thin Black Flame Demonic Bird bloodline in its body.

The demonic bird bloodline contained an even thinner and almost nonexistent Undying Bird Bloodline.

This meant that this monkey also had the bloodline of the Undying Bird.

Even though such a thin Undying Bird Bloodline would not bring much change.

However, to the three brothers who could cultivate the breathing technique, this was an admission certificate.

"There's no problem with my bloodline transplant technique anymore. Next, I'll transplant it for the lion, tiger, and leopard brothers."

Levi began the intensive preparations.

He chose some bloodlines that he thought were more suitable from his current bloodline library and transplanted them for the three brothers.

For those, who did not have the proficiency panel, it was fine as long as everyone transplanted one bloodline. They could not bite off more than they could chew.

It would be best if the three of them each had their own specialties. This way, they could team up.

Tiga was very strong, so he directly let him unleash his Strength to the limit.

After making his choice, Levi finally decided to transplant a bloodline that was closest to him.

Sea Tiger.

This was a symbol of Levi's second-rate excellent quality breathing technique.

Sea tigers were tiger-like beasts that lived in the sea. They were huge and their limbs had evolved into fins similar to that of a Mosasaurus. They were extremely strong.

This was not Levi's strongest breathing technique, but it was definitely the most suitable for Tiga. It was basically impossible for the transplant to fail.

If Tiga could cultivate this breathing technique to the level of the Primordial Ancestor, he would be comparable to Intermediate Wizards no matter what.

In short, Levi was determined to start with these low-level breathing techniques and gradually impart those powerful breathing techniques to his subordinates.

This could also be considered holding back. He could not teach his disciples and starve his master to death.

As for Vada and Simba...

Since Vada was fast, he would impart the Lightning Leopard Breathing Technique to him.

This was a third-rate excellent breathing technique. It was also Levi's raw material that had broken the limit.

Simba was rather mediocre, so Levi let him walk the path of stacked armor and let him cultivate the Iron Crocodile Breathing Technique.

Although the bloodline span was a little large, there was nothing he could do about it. None of the furry beasts' breathing techniques were good at defense.

Tiga went out to help Levi with something. Levi planned to try using the Black Panther Vada first.

The young man from the black fur clan, Vada, looked at Levi nervously.

"Vada, do you desire Strength?" "I yearn... yearn for it."

"Do you want to know the meaning of life?"

"Master... what do you mean? I don't understand."

"Don't worry about it. I have a method here that allows you to have power that surpasses other fur clans and allows you to embark on the path of cultivation. Do you want to learn it?"

"I want to learn!"

"Are you so decisive? I can tell you clearly that this method has a certain risk.

The price is your... life."

"Yes, master. I want to learn."

"Alright, lie in the middle of that instrument. Next, prepare for the baptism of life! Your tomorrow is infinitely bright!"

Levi put on his experimental robe.

Vada was the quietest of the three brothers. He was relatively introverted. Levi did not expect him to have such guts.

After Levi finished mixing the bloodline, he injected it into the bloodline transplant instrument.

Blood-red runes and miniature arrays flickered on the instrument as he chanted and cast spells.

Vada closed his eyes.

After living as a slave for so many years, Vada knew that as an ordinary fur clan, he had no future.

If he wanted to survive, he had to be useful to the high and mighty wizards.

Female fur clans could also sell their bodies to gain some breathing space.

But for a fur clan like his, no one would want him even if he was a gigolo.

Now that there was such an opportunity, he naturally had to seize it.

After the bloodline transplant.

Vada fell into a temporary coma. Search newtype.org on google

Levi took off his robe and closed the door of the laboratory after he was done with the control measures.

"Next, let's see if Vada can succeed. If he can, let's continue the experiment."

A month later.

Vada had successfully survived a month of rejection. This meant that the bloodline transplant experiment had succeeded.

Levi extracted a bit of Vada's bloodline and placed it in the Rowling Crystal.

[Black Shadow Leopard Bloodline 67%, Purple Lightning Leopard Bloodline 27%, Lightning Leopard Bloodline 3%...]

Levi carefully analyzed these bloodline components.

The Black Shadow Leopard bloodline was the foundation of Vada's black panther clan's bloodline, and the Purple Thunder Leopard bloodline was the bloodline of the first-circle transcendent creature, the Purple Thunder Leopard, that Levi had injected into it.

The Purple Lightning Leopard Bloodline contained a trace of the Lightning Leopard Bloodline.

This was the Primordial Ancestor bloodline of the Lightning Leopard Breathing Technique.

"From the looks of it, it should have succeeded." Levi looked at Vada. On the surface, he did not seem to have changed much from before..
