

Wizard 614

Chapter 614: Second-Circle Senior! Level 13 Blood Beast!

(6)

"Could it be..."

Levi was a little worried.

That night, Levi did not dare to cultivate in peace. He was ready to run at any time.

If Riptide City was also breached, there was naturally no point in serving.

The array in Riptide City lit up. Above the sky, the light screen of the array circulated. Terrifying streams of destructive light flew towards Upper Riptide.

Before long, a beautiful witch formed a huge barrier with ice, trapping the demon inside.

By combining the power of the grand array, this abyssal was killed.

Many wizards in Upper Riptide were implicated in this battle.

Levi was glad that he lived in Middle Riptide.

Three days later.

The official announcement was out.

A level 5 Formless Demon possessed a wizard in the city area and created many shocking cases during this period of time.

This Formless Demon came from the Hundred-Eyed Demon Territory.

Blue Dragon Lady personally went to the center of the Hundred -Eyed Demon Territory to investigate.

Thousands of miles away from the core of the legendary forbidden spell, at the bottom of the Bottomless Abyss, a small Abyss Well had been opened...

"The Abyss used the large Abyss Well as bait to attract the firepower of the legendary forbidden spell and convert the energy released by the legendary forbidden spell into the power to open the small Abyss Well. This was the final result of the Star Tower's investigation.

The Abyss Well was not completely destroyed.

In the sea abyss ten thousand miles away from the ancient ruins, a new well had been formed.

"During this period, countless demons escaped from it. Some who are proficient in hiding even hid beside us.

Yes, the demon was right beside him...

"The good news is that it's very difficult for demon lords to pass through the small Abyss Well. The demons that infiltrated the Wizard World should be mainly demons below level 5."

However, without a doubt, this made the wizards in Riptide City completely panic.

They thought that they could end their military service after cleaning up the remaining demon remnants.

However, from the looks of it, they would not be able to leave Riptide City for the time being.

Levi had seen the situation outside.

His merit points were increasing. He exchanged all these merit points for cultivation resources and spells to increase his strength.

If Riptide City was gone, the merit points he had saved would be meaningless.

The chaotic world was a crisis.

In times of crisis, opportunities were born. "Then why didn't the Formless Demon kill Rex? He's indeed a scourge." Levi looked at the final tally and felt indignant.

During the battle of the fifth-circle, the aftermath of the battle killed Rex's neighbor.

Rex, however, was safe and sound.

During this period of time, Huffman told Levi, Grimm, and Tommen to try their best not to go out and focus on Pharmacy at home.

He had a feeling that an even greater storm might descend on Riptide City.

The open and covert struggles between the Miracle Fruit, Abyss Demon, Blue Dragon Lady, and Thunder Spear.

This made the situation in Riptide City even more complicated.

Holy Brilliance Calendar Year 1050, Month of Northern Wind.

After Levi consumed the Meditation Potion, he entered a state of cultivation.

When he opened his eyes again, they were shining brightly.

He exhaled and looked at Klein's crystal ball.

[Spiritual force: 70] [Spell power: 2,023]

"I'm a second-circle senior now." "I, Old Man Li, have become successful!"

Levi sighed in his heart.

After advancing to a second-circle senior, he felt that his use of second-ring spells was much smoother than before.

After testing it out, his casting tempo and speed became faster.

After the 2nd ring, there was still a huge gap between seniors and ordinary people.

Levi—

Chaos Meditation Art: Level 7 (1/50,000). Special Effect: Aether Dominance.

Earth Spirit Shield: Level 7 (Maximum)

King Kong Rock Body: Level 7 (Maximum)

Five Fireballs Technique: Level 7 (Maximum)

[pider and Scorpion Song: Level 7 (Maximum), Special Effect: Spider Scorpion

Heart

Thunderbird: Level 6 (23/40000)

Crimson Copper Armor: Level 6 (3456/40000)

"Other than the Thunderbird and Crimson Copper Armor, which were learned later, the other spells have already reached the maximum."

"With my current spiritual power, mastering six second-ring spells should be enough."

Levi had learned three defensive spells.

Now that it was so chaotic, he might even encounter an attack on the way to Riptide City. He still had to stack armor.

As he cast a spell, circles of metal light spun around his body.

In the end, it turned into an armor that looked like a knight's heavy armor, protecting Levi.

The reddish-bronze armor shone with a thick luster, displaying its powerful defense.

"I'm learning this Bronze School spell much faster than the Lightning School of Thought. When my spiritual force improves, I'll learn a Sword Blade Storm.

This way, I can barely master the sword control technique."

Sword Blade Storm was a second-circle attack spell of the Bronze School. It gathered metal elements and formed a terrifying blade.

Then, relying on his powerful spiritual force, he shot out these swords and cut the enemy into pieces.

It was similar to the wizard version of “Return of Myriad Swords”.

Meanwhile, the investigation of Old Miller’s death was also released. In the end, it was confirmed that it was done by Formless Demon. Levi mourned for the Formless Demon in his heart.

"I’m sorry, Brother Demon."

Although he had advanced to a second-circle senior, Levi did not slack off at all.

His strength was far from enough!

Riptide City was no longer as safe as before.

Especially when there was Rex, who was eyeing them covetously.

He slowed down the speed of earning merit points. No matter how much he earned, Levi did not have time to digest it.

The current Levi had basically achieved the freedom of merit points as long as he did not spend them recklessly.

Furthermore, he still had more than 100,000 Aether Stones in his storage bag.

Nowadays, the third-circle was the only longer-term goal in the path of wizards.

Levi focused on the path of a knight.

Because of the difference in the level of secret medicines, the breathing technique that had the highest chance of breaking through to level 13 was not Red Lotus, but the Blood Beast.

Levi continued to cultivate in one go.

At the end of the Month of Winter.

Tiga had been released.

With Levi's help and Huffman's connections, he did not suffer much abuse in prison.

Levi knew that it was Rex who put him in jail.

Rex wanted Levi to know that he could easily send a person to prison in Riptide City.

Levi transplanted the Sea Tiger bloodline for Tiga.

From then on, the four fur clans under his command embarked on the path of knight cultivation under his guidance.

Among them, Algerta improved the fastest. Now, he was already a high-level knight. He had forcefully raised a breathing technique that was impossible to cultivate to this realm.

The Silver Frost Wolf Bloodline in her body was too rich. Levi estimated that it was at least enough for her to cultivate to the grand knight realm. After that, she would probably need the Blood Limit Potion.

However, Levi had no time to study this potion.

Holy Brilliance Calendar Year 1051, Month of Beginning.

With the end of the election.

To Levi's surprise, the commander-in-chief was not the Thunder Spear that everyone had high hopes for.

Instead, it was the Blue Dragon Lady.

Levi heaved a sigh of relief.

At the same time, he cultivated day and night.

Levi's Blood Beast Breathing Technique had finally been cultivated to level 13.

Levi—

Blood Beast Breathing Technique: Level 13 (1/500,000). Special Effects: Blood Fog Body (Level 1), Blood Contract, Thousand Faces, Boiling Blood.
