

Wizard 615

Chapter 615: Raging Hellfire Burns My Lotus Body! Time for Revenge! (1)

[Blood Fog Body (Level 1): As your bloodline power increases, you will possess some of the Blood Beast's characteristics. You can turn your body's mist into a Blood Fog state.

[In the blood fog state, your movement speed will increase greatly.

[You could also be immune to most physical attacks and reduce one-third of spell damage.

[When your body is under a fatal attack, you can disperse into a certain number of Blood Demon Bats. The more there are, the less damage you will suffer. You can reconstruct your body as long as one Blood Demon Bat escapes.

[“After reconstructing your body, you will enter a weakened state for a period of time. During this period, you will not be able to use the Blood Demon Bat's ability again.

[The effect of this Special Effect can gradually increase as the bloodline power increases.

[Try to avoid using the Blood Fog Body in the sun, which will weaken your effects.

[Every Blood Clan knew very well:

[The night of the full moon, the time of slaughter!]

"Hiss, what kind of heaven-defying ability is this?" Levi could not help but gasp.

He did not have much expectations for level 13 Blood Beasts.

However, now that he saw it, it blinded him.

"Similar elementalization ability + blood escape ability + life-saving divine skill.'

This was a high -end version of the Green Smoke Escape.

Compared to the First-Ring Spell of the School of Death, it was extremely weak.

This Blood Beast was simply a quantum Blood Clan.

Levi had killed so many Blood Clan members and had seen all kinds of Blood Clan abilities.

He had never seen an ability like the Blood Beast.

He looked at the Blood Beast Seed in his heart, and traces of the power of the Blood Beast emerged.

His body began to disintegrate inch by inch. Then, he transformed.

A blood-red mist appeared in the wizard tower.

Levi's world turned blood red.

He had no eyes. He was using his pure mental strength to Perception the world from the perspective of the Blood Beast.

Or rather, he didn't need eyes.

Every tiny particle that formed this blood mist was his eye.

He could see many microscopic worlds that were usually invisible and ignored.

Blood mist floated in the wizard tower.

Levi tried to melt into the wall.

Then, the blood mist penetrated the wall and arrived at the bathroom...

Algerta was taking a shower. Her tall and proud body was faintly discernible in the fog. She hummed a song, looking especially relaxed.

She did not notice that behind the bathtub, a wisp of blood-red fog sneakily stuck its head out and shrank back.

"Not bad. It comes with a wall-piercing spell."

The wall-piercing spell was not a profound spell, but Levi's Blood Fog Body could not only pass through ordinary walls but also through the walls that covered the array.

Every wall of his wizard tower had an array, and they were all first-circle arrays.

This meant that arrays below the first-circle level would not be able to stop Levi's wall penetration.

This was much more impressive than a low-level wizard's wall-penetrating technique.

Levi came to the training room and let Tyrant II attack him.

The terrifying axe passed through Levi's body, causing only a small amount of damage.

However, the flames on it still hurt Levi's Blood Fog Body.

This Blood Fog Body was not invincible, but there was no doubt that it could be immune to a lot of damage at critical moments.

Levi didn't try the last Blood Demon Bat.

After all, there was a month of weak state after trying.

In the current situation of Riptide City, he did not dare to let himself be weak.

Levi returned to human form from his misty state.

He picked up the Rowling Crystal Ball.

[Unknown Dragon Clan Bloodline 11%, Red Lotus Dragon Bloodline 7%, Unknown Blood Clan Bloodline 10%... Human Bloodline 98%...]

"As expected, the Blood Clan bloodline has reached 10%. My previous conclusion was right."

"Human bloodline... There's actually still 98%. This is great!" Levi quickly put away Rowling's crystal ball.

98% of the human bloodline was enough for him for a long time.

He firmly believed that with his willpower and proficiency panel,

Even if he only had 1% of the human bloodline, Levi was still a genuine human heart!

As long as one's mind was human, even if one's body was a little abnormal and indescribable, what was there to fear?

It was just a body!

If he wanted to become an ultimate creature, he had to have such an awareness!

Otherwise, he would be lost in his Strength and bestial nature, unable to extricate himself.

At the dining table.

Algerta served the prepared food and Levi enjoyed it.

Algerta said with lingering fear, "Master, I feel that there might be a demon or an evil spirit in our house. When I was showering, I felt something spying on me!"

Levi coughed and said, "That's impossible. With my array, don't worry. You've been too tired from practicing the Knight Breathing Technique recently. You should adjust your state for the next few days."

"Alright, maybe I'm being paranoid. Master, I heard that a demon in Upper Riptide killed a wizard. The officials are now investigating the murderer. It's said that the mayor and his wife are furious," Algerta told Levi about the gossip she had heard recently.

"What's his name?" Levi's heart skipped a beat.

"Nyken." Algerta blinked as he cleaned up the mess.

"Why isn't it Rex?" Levi cursed in his heart.

He felt that if he had the chance in the future, he would have to learn some curse spells from the School of Death or the School of Dark Energy. Since he couldn't attack Rex directly, he would find a way to curse him to death!

How hateful. There were no seven arrows.

Otherwise, Rex would have died..
