

Wizard 616

Chapter 616: Raging Hellfire Burns My Lotus Body! Time for Revenge! (2)

"How's your cultivation of the Knight Breathing Technique recently?" Levi asked.

"Master, I feel like I'm very close to becoming a grand knight, but there's a membrane that I can't pierce through," Algerta said.

"Next, you need to condense the Silver Frost Wolf Bloodline in your body into a Bloodline Seed. Only then can you break through to become a grand knight," Levi said.

"Alright, Master. I'll give it a try." Algerta wagged her tail and left.

After Levi enjoyed the perfect meal, he touched his stomach.

"After level 13, be it the Blood Beasts or the Golden Snakes, their cultivation speed has visibly slowed down. The path of knights also takes a lot of time." "Moreover, the quality of the level 2 secret medicine can't keep up. However, there's no good solution now.

"Transcendent creatures above the third-circle are rare, to begin with, let alone what I need. I can't catch new transcendent creatures every time I level up. It's unrealistic not to have so many contract slots.

"Perhaps I should think of a way to let the transcendent creatures in my hands advance.

"As for Gustav, there is no need to worry. With his bloodline, he would definitely be able to advance to the third-circle in the future. It is just that his speed needs to be increased.

"The formula for the medicine used by the School of Spiritualism to promote the growth of Spiritual Beasts should be able to solve my problem."

Levi muttered to himself.

As for the Blood Clan, Schinn, a level 2 Blood Clan, could barely cultivate as a level 13 Blood Beast. It could only be said that his speed was not as fast as when he was at level 12.

However, as a member of the William family, Schinn should have room for growth in the future.

After all, there had been a level 3 Blood Clan among their ancestors.

After Levi studied more about the Blood Clan, he might be able to find a solution.

In terms of the Red Lotus Breathing Technique, Levi still used the Crimson Fire Dragon Lizard bloodline. This was also the reason why his cultivation speed after level 12 was lagging behind that of the Blood Beasts.

The first-circle Dragon Clan bloodline of the Crimson Fire Dragon Lizard was too impressive.

Other breathing techniques also faced these problems.

"The Silver Frost Ice Ape in the Yellow Earth Continent will be mine after I advance to the third-circle and destroy the Al Hidd Family."

Levi calculated and then left the wizard tower.

After becoming a level 13 Blood Beast, he was no longer afraid of ordinary

Third -circle wizards.

His mind was also starting to become active, and he wanted to find an opportunity to teach Rex a lesson.

"After being fooled by Rex for so long, it's time for me to make a move." Now, the demons were so fierce in the city.

It was reasonable for Rex to die in the hands of demons one day.

However, before he dealt with Rex...

Levi still had to increase his overall strength.

Levi had already mastered all the first-circle arrays in the Book of Cypher.

His current array skills had long cultivated to the maximum of level 4.

As long as he successfully refined a second-circle array, he would be able to advance to a second -circle array wizard.

There were four types of second-circle arrays in the Book of Cypher: Sea Demon Cage, Misty Forest, Lightless Shield, and Swarm Shark Dance.

The Swarm Shark Dance was an offensive array. With Levi's current strength, he no longer cared about the attack power of the second-circle array.

He wanted to refine an array that was suitable for his assassination so that he could deal with Rex.

Lightless Shield.

After the array was formed, it would form a lightless area within the array. It could block Perception and prevent the energy from attacking from dissipating.

After preparing the materials needed to refine the array, Levi started refining at home.

With Ace around, there was no need to go to a specialized alchemy workshop to refine arrays. The array items themselves were not big. Cultivation was timeless. Half a year passed in a hurry.

In the past six months.

Levi basically did not contact Grimm and Tommen much.

Due to the recent tense situation, everyone was in danger. Other than the wizards who were forced to carry out demon-hunting missions, everyone stayed at home and did not dare to go out.

In the wizard tower, the final array item was successfully refined.

Levi chanted an incantation as his hand seals changed.

In front of him, array flags spun one after another.

Then, these array flags were sent to every corner of the wizard tower.

In an instant.

Inside the wizard tower, it turned dark.

Not only that, the fur clansmen who were training on the third floor felt as if they had fallen into a bottomless abyss. Their various Perceptions were blocked. "What's the situation?" "Demons?"

"It's fine. Master is here."

The fur clansmen were extremely nervous, they did not even dare to breathe loudly.

The strange darkness disappeared.

The light returned to the wizard tower.

His Perception seemed to have returned.

The feeling just now was not good. After losing almost all of their Perception, the fur clansmen seemed to have fallen into a state of 'ghosts pressing on their beds'.

"From the looks of it, it's just Master's experiment." Algerta smiled bitterly.

"Continue training!" Tiga said.

On the third floor.

Levi looked at the current proficiency panel.

Levi—

Array: Level 5 (23/30000)

"He's a second-circle array wizard."

Levi played with the Lightless Shield array flag in his hand.

"If this array is used well, it will be a killing weapon. Low-level wizards who are trapped in the array are like headless flies that are at the mercy of others.

Even Third-Circle Wizards will be at a disadvantage.”

"Now, I have level 13 Golden Snakes and Blood Beasts, the spells of a second-circle senior wizard, the arrays of a second-circle array wizard, and Tyrant II. Ordinary Third-Circle Wizards should not be my match." Levi calculated..
