

Wizard 62

Chapter 62: Medicine Production and Giant Bear

"Ordinary people would not be able to withstand just a sniff of the Man-Faced

Spider's breath, but this guy consumed quite a bit and could still fight."

Levi had already taken the antidote for the Man-Faced Spider Breath. Once he took the antidote, he would be immune to it for life. Levi would not have to worry about this poison in the future.

After crippling the man's limbs, Levi had the doctor bandage his wounds and had the soldiers tie him up with layers of iron chains and even put shackles on him. He would not let him die so quickly.

He was still burning in anger. Levi did not care who had entrusted this organization to kill him. He only wanted to destroy it.

This person was strong and had a high status in the organization. Levi felt that he could make a fuss about him.

After returning to the territory, Levi ordered the soldiers to take the assassin into the castle's prison.

He first went to the doctor to visit Sir Fred.

Sir Fred's abdomen had been pierced through. With the medical standards of this world, he was in danger.

Levi looked at Fred, who was on the verge of death. He reached out and touched him. He was still breathing.

"Can he be saved?" Levi asked.

The doctor responded with difficulty, "I'll try my best, my Lord. In this case, it's more dependent on Sir Fred's physique."

"Okay, just tell me if you need anything. Money is not a problem if you can save Fred's life. I will also try to contact the doctors in the big cities."

Then, Levi turned around and left.

He heard that some priests in big cities' churches had mastered superb medical skills.

Although the medical standards in this world were low, some medicines were refined from precious medicinal herbs. These herbs were similar to the heavenly treasures in Wuxia novels in his previous life.

In a sense, ambergris was a natural treasure. After all, it could increase the speed of cultivation.

However, the church firmly controlled these medicines' knowledge, formulas, and raw materials. They called these medicines "sacred medicines" bestowed by the saints. The church used them to amass wealth and earn much money.

Although Levi did not like to deal with people from the church, he had to ask someone from the church in the Icewind City branch for Fred's sake. It might just cost a lot of money.

Levi naturally refused to go to Old Abraham.

He knew that the old man was obsessed with power and money and did not know much about medicine.

In the year 1007 of the Holy Brilliance Calendar, Month of the Furnace, after a month of recovery and rest, with Levi's powerful physique and some medicine, his body had almost recovered.

"I still have to wear armor. Even if I have a defensive breathing technique, isn't it nice to have an extra layer of defense?"

Levi could not help but rejoice. He might have been seriously injured if it wasn't for the armor.

In short, just like playing games, the Stacked Armor Style would always have a place no matter which genre of game.

Although he was injured this month, he slowly cultivated his breathing

Techniques. The day the Black Snake Breathing Technique broke through to the fifth level was getting closer.

He had also mastered the Giant Bear Breathing Technique and reached the third level. The difficulty of this breathing technique was lower than the Siren Breathing Technique and the Man -Faced Spider Breathing Technique. It was of similar difficulty as the Frost Wolf Breathing Technique. To Levi, it was not difficult to cultivate. The secret medicine of the Giant Bear Breathing

Technique was also as simple and crude as the Frost Wolf Breathing Technique, which was bear blood. The stronger the bear, the better it was.

This was not a problem for Levi.

He had three Giant Bears of the Northern Territory waiting to be fed.

They were massive and ate a lot.

Naturally, they did not mind that Levi took turns drawing some blood from them every day.

Levi's current speed of gaining experience was much faster than before.

With the Giant Bear Breathing Technique reaching level 3, Levi felt that his strength, which was not small, to begin with, had increased significantly. A breathing technique focused on strength was indeed worthy.

The next step was to reach level 4 slowly.

"It's a piece of cake for me to cultivate the shallow level of the breathing technique with the secret medicine and full power. I can reach level 4 in three months."

Besides the Giant Bear Breathing Technique, Levi's other breathing techniques improved significantly.

It would not take long for the Black Snake Breathing Technique to advance to the fifth level. Levi's primary breathing technique, the Black Serpent Breathing Technique, was the foundation of his strength. An excellent breathing technique was equivalent to stacking many shallow breathing techniques. Most importantly, the upper limit of the excellent level breathing technique was even higher. A shallow-level breathing technique would not be able to break through to the grand knight level.

On the other hand, Levi was also impressed by the usefulness of the Man-Faced Spider Breath. During this period, he refined several dosages as backup, allowing his Pharmacy skill to reach level 3 quickly. Level 3 was not the limit of this skill. It seemed it was also a skill with an extreme growth limit, just like forging.

"Now that I'm already at level 3, I can start trying to make Man-Faced Spider Tears and Man-Faced Spider's Kiss."

Because the materials for these two poisons were rare, Levi did not dare to refine them before, afraid of wasting them.

With his Pharmacy skills, he could be considered an expert and was no weaker than the Red Spider Knight. Refining the other two more powerful poisons was also on the agenda.

Levi went to the doctor. After a month of treatment, Fred barely managed to keep his life. He spent 400 gold coins buying medicine that could heal such severe injuries from the Church of Holy Light in the Ice Wind City. The ingredients of this medicine were precious, and their effects were also excellent.

Fred's injuries had stabilized, and with his mid-level knight physique, it should not be a problem for him to stay alive.

However, whether or not he could recover would depend on the kindness of the Heavenly Father.

If Levi became a wizard one day, there was a high chance he could use magic to heal Fred. However, he did not know if Fred could last until the day Levi became a wizard.

Levi's face was gloomy after visiting Fred. Alone, he went to the underground prison of the Black Snake Castle, which was used to imprison criminals. It had not been used in the past as the territory's residents were still decent and kind.

Only one criminal was imprisoned here.

The Bird of Death's Voice assassin.

That guy had been poisoned and had his limbs crippled, but he was still alive.

Levi could not help but admire his powerful body.

His face was pale and covered in wounds. He was chained and nailed to the wall.. Seeing Levi arrive, he said hoarsely, "Why didn't you kill me?"
