

Wizard 621

Chapter 621: Three Years of Hibernation, Collective

Breathing Technique Advancement, The Night Before the Storm! (1)

Holy Brilliance Calendar Year 1052, Month of Harvest.

For Levi, this was indeed a bumper month.

He counted the gains from Rex.

Not to mention other ingredients, potions, and so on.

Levi had earned four hundred thousand Aether Stones from Rex alone...

Levi had killed and robbed many people. He also had various part-time jobs. Until now, he had only saved 100,000 Aether Stones.

As for Rex, apart from the Aether Stone he had handed over to his family, he still had 400,000 yuan in his pocket.

Compared to the Thousand Faced Knight, who was also a Third -Circle Wizard, Rex's assets were ten times more than his.

"However, at the same level, the gap between the rich and poor in the Wizard World can only be considered child's play compared to my previous life." Levi suddenly thought of the rich people in his previous life.

Everyone was a mortal. Some people could be as rich as a country, while others had to worry about their livelihoods.

"Now that you mention it, the Wizard World is still the best." Levi could not help but sigh.

At least, even Rex, a Third-Circle Wizard, did not have enough assets to make Levi despair.

"Including what I saved up previously, my assets are 500,000 Aether Stones. Among the Second-Circle Wizards, I should be considered a damned rich person. I reckon that most Third-Circle Wizards in Riptide City don't have as much cash as me."

Levi's heart skipped a beat.

Of course, besides the Aether Stones, Rex's most valuable things were the prescriptions, ingredients, potions, and so on that he had accumulated over the years as a pharmacist supervisor.

There was a special one in Rex's storage bag for storing gifts from others.

"That bastard Rex doesn't even accept gifts worth less than a thousand Aether Stones. These things are all worth more than a thousand gold coins!" Levi's eyes lit up as he looked at the gifts.

"Fourth-circle medicinal herb, Snake Lantern Grass, worth 1,000 Aether Stones."

"Gemini Potion, a second-circle potion. It can be used to break through to the second environmental realm. It's worth 50,000 Aether Stones."

There were many such gifts, dozens of them.

Only the more valuable ones would be put away by Rex.

Levi estimated that it would cost 200,000 Aether Stones.

Coupled with the value of Rex's other materials,

This time, he had earned at least 800,000 yuan!

If the Mountain Giant sacrificial soldiers were included, it would be at least a million!

"It's just a third-circle, yet he can save up so much. It's obvious how much Rex has earned in Riptide City, and how much money he has accumulated for the Thunder Dragon Family.

The wool comes from sheep. In the end, this money comes from low-level wizards like me. These rich people really deserve to die.

"I, Levi, want to seek an explanation for the low-level wizards. I'll start robbing the rich and helping the poor!"

Levi swore to himself.

Levi was not surprised that Rex was rich.

A starving camel was still bigger than a horse.

It was only in the past two years that Huffman had surpassed Rex.

Before this, Rex had always been the boss.

Similarly, it could be seen that Huffman had some background and means.

Otherwise, a rich job like the pharmacist supervisor would not have landed on a halfling without a family.

"Huffman may not be as rich as Rex, but he won't be too far behind."

Back then, it was all thanks to Levi's crazy cultivation that Huffman was able to defeat Rex.

Huffman had given Levi 2,000 merit points, but Levi was still happy.

"I'm still too naive."

Levi calmed himself down.

Apart from the tangible assets above, the greatest wealth Rex gave Levi was the formulas. They were precious knowledge of pharmaceuticals and were

Priceless.

Rex had saved up these formulas over the years as a pharmacist supervisor.

There were dozens of second-circle potion formulas and dozens of third-circle potion formulas.

Among them, the most precious was a potion formula that could help spiritual force converge and compress, thereby materializing spiritual force in the form of vaporization.

The Lake Fairy's Dream.

For short, the Lake Fairy Potion.

This potion was a formula for breaking through to the third-circle realm. To a pharmacist, its value was immeasurable.

That was why Levi said that Rex's greatest wealth was the potion formulas.

This made Levi not have to worry about the potion formula before he reached the fourth- circle.

Rex had both breakthrough potions and meditation supplementary potions.

Moreover, in theory, after Levi mastered these potion formulas, he could sell them for money.

Because he hadn't signed a confidentiality contract with Rex.

However, Levi felt that there was no hurry to sell the money.

Because many of Rex's potion formulas came from the military.

Now that these potion formulas were lost, the military would definitely investigate and recover them.

If Levi sold this potion at this time, he would be suspected.

If he wanted to sell it, he had to sell it elsewhere after leaving Riptide City.

"Next, I can start preparing the ingredients for the potion the Lake Fairy's Dream. I need to prepare for advancing to the third-circle."

Levi estimated that in another ten years or so, he should be able to obtain 100 points of spiritual force.

At that time, he would have to consider vaporizing his spiritual force and advancing to the third-circle.

"Once I step into the third-circle, I'll be an Intermediate Wizard. From then on, I'll be in the middle level of the Endless Sea. I won't be a low-level wizard anymore."

There were less than a hundred Third-Circle Wizards in Riptide City.

There were nearly 10,000 official wizards registered in Riptide City.

This meant that only one Third-Circle Wizard could be born out of a hundred official wizards..
