

## **Wizard 624**

Chapter 624: Three Years of Hibernation, Collective

Breathing Technique Advancement, The Night Before the Storm! (4)

After all, the couple had long been dissatisfied with the Thunder Dragon Family interfering too much in the affairs of Riptide City.

If not for the fact that the Thunder Dragon Family had connections in the Star Tower's headquarters, Thunder Spear might not even be the deputy commander.

As Thunder Spear watched Tyrrell leave, he felt gloomy.

"Trash. "

"However, since they dared to kill our Thunder Dragon Family, they must be taught a good lesson. It just so happens that I can't be the commander-in-chief anymore. Next, let the storm come more violently."

Holy Brilliance Calendar Year 1053, Month of Flowers.

Levi could sense that Riptide City seemed to be getting more and more chaotic.

Every few days, rumors of demons causing trouble would appear. He did not know if it was true or not.

However, there was no safe place in this world.

In comparison, Riptide City, which high-level wizards guarded, was still Levi's first choice for development.

During this period of time, he had secretly gone to the place where the Mountain Giant sacrificial soldier was.

He was surprised to find that the Mountain Giant was still there.

If the Thunder Dragon Family had a tracking mark on the Mountain Giant, they should have discovered it long ago.

This basically proved that the Thunder Dragon Family did not plant a mark on the Mountain Giant.

What Levi didn't know was that Rex had erased the mark himself.

The reason why Rex erased it was simple. He wanted to take the family's sacrificial soldier for himself.

He could feel that everyone in the family, including his father, was becoming more and more disappointed in him.

In order to prevent himself from being abandoned by the family, he made such a decision. He wanted to try to grow up independently from the family.

Although the Mountain Giant was still around, Levi still had no intention of taking it away.

He only drew some blood before returning to Riptide City.

The Mountain Giant's earth element affinity and blood were very beneficial to Levi's cultivation of the King Kong Breathing Technique!

The secret medicine of the King Kong Breathing Technique required two types of blood, one for frost elemental apes or giants, and one for earth elements.

Rex had directly dealt with the earth element for Levi.

The remaining frost was in the hands of the Al Hidd Family.

At the same time, the Red Sand Ape was gloriously dismissed.

He avoided the fate of Levi continuing to fleece him.

This monkey dug a hole in Greenfield Immortal House and lived a life of retirement facing the sea in advance.

With the blood of the Mountain Giant, the cultivation speed of the King Kong Breathing Technique increased with a whoosh.

Not long after, it directly rose to level 12.

After Level 12, Levi's Strength in his arms had increased a lot. However, to Levi, who already had Level 13 Red Lotus, this change was not very big.

His current goal was to cultivate to the Third-Circle Wizard realm as soon as possible.

The second was to make up for the other lagging breathing techniques as soon as possible and advance the fusion and mutation of the breathing technique.

The current breathing technique system was a little too complicated.

Some legendary organs or Special Effects of the breathing technique were actually rarely used.

Those were the ones that were commonly used.

Levi wanted to try and integrate the breathing technique system.

In theory, this could be done.

That was because the proficiency panel was also constantly changing and adjusting as Levi's strength increased.

Levi had already discovered this.

Although the proficiency panel did not have life, Levi felt that the panel seemed to be a part of his body, growing with Levi's growth.

Time passed day by day.

Feeling the gradually surging undercurrents in Riptide City, Levi would not

Have any merit points left.

He was worried that Riptide City would be gone one day, and the merit points he had saved would be invalid.

Other than exchanging for necessary resources, his merit points were exchanged for spells during this period of time.

After Levi's experiment, he used three Zero-Ring Cantrip spells—Ice Needle, Ice Spike, and Small Icicle—which had high similarities, to create a First-Ring Spell, Ice Finger.

Ice Finger had Grade A attack power. In the School of Ice, it was considered a high-grade spell among first-circle spells.

After Levi's comparison experiment, he discovered that in the First-Ring Spell Library of the School of Ice, the spell models of Icicle, Ice Arrow, and Ice Finger were more similar in structure and could be fused by the proficiency panel.

Therefore, he cultivated these two spells again.

In the end, after fusing with Levi like a doll, he created a second-ring spell that belonged to him.

Levi—

Glacial Finger: Level 5 (1/30,000)

This second-ring spell created by Levi had an attack strength that had already surpassed Grade A and had an S-grade attack strength.

In the Wizard World, S-grade spells were also known as top-grade spells. They referred to the top-grade spells in the same realm.

Such spells were extremely rare.

If a top-grade spell was cultivated to perfection, its power would not be much weaker than the first-circle spell.

With Levi's Aether Dominance Special Effect, his Ice Finger was comparable to an ordinary third-circle spell.

This was a breakthrough feat.

This meant that Levi's Second-Circle Wizard body, without mastering a Third-Circle spell, had the magical attack power of a Third -Circle Wizard.

"The quality of original spells is not bad. In the future, I have to use more top-grade spells."

Levi was excited.

The biggest difficulty in synthesizing top-grade spells was that Levi had to find spells with high similarities as raw materials..
