

Wizard 626

Chapter 626: Three Years of Hibernation, Collective

Breathing Technique Advancement, The Night Before the Storm! (6)

"Blue Dragon Lady, are you plotting against Riptide City?" Levi thought. He did not want to participate in this power struggle in Riptide City, so his first thought was to reject it.

Then he looked at the agreement. Levi thought that the terms were okay.

The Dragon Tea Party was a mutual support organization led by the Blue Dragon Lady. The connections between the two organizations were not very close.

The tea party was held once a month. The participants would exchange cultivation insights, information, potion materials, and so on during the tea party.

It was similar to Lord Fool's Tarot Club.

There was a monthly meeting. He could go or not, but he usually had to go to the annual meeting every year.

The venue of the tea party was located in a private secret realm of the Blue Dragon Lady.

After reading the agreement, Levi was a little tempted. He needed more clues about transcendent creatures and knowledge about wizards.

It was indeed very difficult for a person to create a car behind closed doors even with the proficiency panel. Some objective problems could not be resolved.

However, he was still worried that he would be involved in a power struggle

And become someone else's chess piece.

"Since they didn't ask for a time, I'll answer later," Levi thought.

In the blink of an eye, a year had passed.

Holy Brilliance Calendar Year 1054, Month of Germinal.

The eighteenth year of the Great Expedition.

In the Myriad Machine Plane, the Deep Blue Sage had already developed a method to restrain the mechanical virus of the Father of Plagues, stopping the spread of the mechanical plague.

There was no doubt about the research and learning ability of a Legendary Wizard.

This greatly angered the Father of Plagues.

The mechanical plague that he had painstakingly researched was cracked so quickly.

As the saying goes, the higher the Tao, the higher the demon.

After the battle with Deep Blue Sage, there was no winner.

Father Pestilence quickly began to study a new version of Mechanical Plague

2.0.

Just like the battle between the human immune system and the virus, the two sides fought in the Myriad Machine Plane.

In the Endless Sea.

After so many rounds of games.

The big shot behind the Black Sun Adam and the Hundred Beast Berserk Witch was still unwilling to show himself.

Rumors of wizards who had obtained Miracle Fruits and had miracle abilities kept circulating in the Endless Sea.

This kind of wizard was called “Miracle Wizard” by the older wizards.

Miracle Wizards tended to fuse spells and bloodlines. Their growth speed was higher than that of traditional wizards. However, the upper limit of a Miracle Wizard’s strength was firmly limited by the quality of the Miracle Fruit they consumed.

This was no different from transcendent creatures.

Not all wizards could consume the Miracle Fruit. There were already many wizards who had their brains blown up after consuming the Miracle Fruit.

However, everyone was still scrambling for the Miracle Fruit.

So what if there were side effects?

At the same time, everyone discovered that after the Miracle Wizard died, the Miracle Fruit would emerge and gather again.

The miracle ability would not disappear.

This made the wizards even crazier.

Since they could get the Miracle Fruit by killing others, they considered it fair game.

In the current chaotic era, the bloody massacre over the Miracle Fruit was happening everywhere.

Dark wizards and righteous wizards could all turn against each other because of the Miracle Fruit.

Riptide City.

No. 80 Middle Riptide.

Levi read the news from the outside world among the wizards.

He sighed in his heart. "A chaotic world is also a world of great competition. The more this is the case, the more patient I have to be. I have to seize all the time and work hard to cultivate experience."

After a year of cultivation.

Levi's spiritual power had reached 80 points, and his spell power had reached the upper limit of 2,400 points.

And Levi was sixty-four years old.

In four years, his mental strength had increased by a total of 10 points.

For other Second-Circle Wizards with ordinary aptitudes, this might take decades or even a hundred years to polish.

It couldn't be helped. Levi's current cultivation conditions were too generous.

Four elemental affinity talents, abundant meditation supplementary potions, and the proficiency panel.

It would be strange if he wasn't happy.

"The last 20 points will take at least seven to eight years. From the looks of it, it's still a little difficult to advance to the third -circle before the age of 70. I can only say that I've advanced to the third-circle before the age of 75."

Levi sighed.

"It can't be helped. I've mainly been using this time to make up for the level of the breathing technique."

Levi's goal now was to cultivate all the five-dimensional breathing techniques except Perception to level 13 before he reached the third-circle.

Then, the existing breathing techniques would be combed and integrated.

Firstly, it was the four parts of the strength dimension that were strengthened by the breathing technique, then assembled into one breathing technique.

Levi did not know if this idea was feasible. He could only try it after these breathing techniques reached level 13.

In the end, Levi's goal was to merge all the breathing techniques into an ultimate biological breathing technique.

In that case, he would only need to cultivate a breathing technique with all his might in the future.

Of course, it was still too early for ultimate creatures, but it was imperative to integrate strength.

In addition to the breathing technique, Levi's spell cultivation had also improved greatly.

Levi—

Thunderbird: Level 6 (31,256/40,000) Glacial Finger: Level 6 (12,567/40,000)

Sword Blade Storm: Level 5 (24,678/30,000)

"The power of the level 6 Glacial Finger is comparable to the attack power of an S-grade. After the maximum of level 7 , it will definitely have the attack power of a Grade C third-circle spell."

"Now, my spell attacks, the Five Fireballs Technique, the Thunderbird, the Glacial Finger, and the Sword Blade Storm are all top-notch killer moves. Any one of them is something that ordinary Second-Circle Wizards can't withstand."

Sword Blade Storm was a spell that Levi learned afterwards. This spell was extremely cool, and when used, ten thousand swords would return to the origin. It was suitable for showing off.

This would make up for the fact that Levi was ugly in his monster form.

Levi put away the proficiency panel.

Over the past year, he had been mostly concluding and thinking.

The Dragon Tea Party did not urge Levi to make a decision, so he was not in a hurry.

Just like that, in Riptide City.

Levi spent another two years in peace.

In the past two years, many things had happened in Riptide City. Some of these things were done by demons, some by wizards, or wizards who used the name of demons to do some illegal things.

During this period, Levi also encountered some unexpected calamities. However, relying on his strength, he survived without any mishaps.

Riptide City was becoming more and more chaotic.

Many wizards in Upper Riptide had mysteriously disappeared when the sun rose the next day.

In this oppressive and tense atmosphere, like the long night before a storm.

Thanks to Bo Gang's bloodline, Levi successfully cultivated the King Kong Breathing Technique to level 13.

Of course, after confirming that Bo Gang did not have a tracking mark on him, this silent Mountain Giant Bo Gang also joined Greenfield Immortal House's camp.

In addition to the King Kong Breathing Technique, Levi's Black Whale, Jade Dragon, Dragon Demon, Silver Mountain Dragon, Death Ember, and Mountain Ape Breathing Technique had all reached level 12 in the past two years.

Levi's overall strength had jumped to another level..
