

## Wizard 635

Chapter 635: Alice's Dream-traversing Ring! Seals Knight!

(3)

As for the annual Aether Stone consumption, it was still within Levi's manageable range at the moment.

Waiting until he gained a more advanced knowledge inheritance of arrays, he might be able to restore Alice's ring.

After the transaction was completed, Newt and the Rose Witch left together.

Watching their departing figures, Levi felt a sense of desolation within. "Fortunately, I have these lovely little companions to accompany me."

After carefully using his spiritual force to inspect the space inside Alice's ring and confirming there were no issues, Levi introduced an ordinary transcendent creature into it. He let it live inside for a while. If it remained unharmed, it would indicate that the Wizard Tool was indeed usable.

Subsequently, Levi left the ancient forest.

"From now on, this place is no longer forbidden."

In the 1056th year of the Holy Brilliance Calendar, during the Month of the Northern Wind, Levi had been away from Riptide City for almost half a year.

So far, there had been no military personnel coming to find him.

Therefore, Levi had no plans to return temporarily.

When the situation stabilized, and he firmly entered the Third-Circle Wizard stage, perhaps then he could consider going back.

The turmoil in Riptide City continued.

The entire city was now divided into two factions: the Blue Dragon faction and the Thunder faction.

Since Levi left last time, the Thunder faction had launched several attacks against the Blue Dragon faction, but they were all repelled by the Blue Dragon Lady.

The Dragon Tea Party, a clandestine organization cultivated by the Blue Dragon Lady, played a crucial role. She replaced the city's upper echelon with wizards she trusted from the Dragon Tea Party.

On the other hand, the Thunder Spear, with the support of their family, recruited another group of people.

However, there was no information about Huffman and the others in the intelligence Levi obtained.

He could only silently hope that everything was well.

In troubled times, staying alive was a victory.

In Lion King City, Levi rented a mansion for a long term and set up his array.

In the past six months, he diligently cultivated.

Advancing steadily toward the stability of the eighth level in Aether Meditation

His spiritual force was also gradually growing. With the expansion of spiritual force, Levi clearly felt that his mind seemed to be increasingly swollen.

"No wonder they say that from the Third -Circle onwards, one needs to continuously compress the expanding spiritual force within the body. If not compressed, the improvement of spiritual force will hit a bottleneck. Only by raising the quality of spiritual force can the quantity be further increased." Of course, Levi's current 86 points of spiritual force were still a bit away from that step.

"Spiritual force gasification, how to transform the elusive spiritual force?"

Indeed, it's a difficult problem. Alas, this is the disadvantage of not being part of an organization. If I were in some powerful organization, there would definitely be knowledge on how to gasify spiritual force.

The Golden Lion Jostar Family should have this knowledge. Levi planned to trade with Old Golden Lion after some time.

The method of spiritual force gasification did not have a unified standard. Therefore, different wizard organizations might have different methods of gasification.

Relying solely on Lake Fairy Potion, it was still not enough for a successful gasification.

Levi needed to increase the success rate from other aspects.

He wanted to advance to the Third-Circle in one go without any failure!

In addition to the improvement in spiritual force, Levi's Strength Rune had also reached level 4 through cultivation.

Levi, Strength Rune: Level 4 (1/20000), Special Effect: Horned Bull Constellation Power (Level 4)

The Level 4 Horned Bull Constellation Power could amplify strength by thirty percent, which slightly surprised Levi. He remembered that before reaching level 3, each level increased the amplification by five percent. However, from level 3 to level 4, it directly jumped from twenty to thirty percent.

"It seems like level 4 is a turning point, and from now on, it will be a ten percent increase per level."

Although the improvement in the Strength Rune was relatively small, there was no upper limit, and it seemed that it could be cultivated indefinitely. Moreover, there were no side effects. Consequently, continuous cultivation would bring substantial improvements in strength.

"With a 30% amplification from the Strength Rune, 100% from the Red Lotus Blood, 200% from the Giant Whale Form, 100% from King Kong's Wrath, 10% from the Favored By The Night form, and around 100% from the Nine Swords Asura... If everything is in an ideal state, with all forms activated, I can achieve a 540% amplification of strength."

However, most of the time, Levi didn't need to activate all forms.

"With a punch from me, most Third-Circle Wizards might die," Levi mumbled to himself.

He caressed the fourth ring on his right hand, Alice's Ring.

Currently, Levi's progress as a Ten-Ringed Knight had reached four out of ten.

Trembling Ring, Sea Demon Ring, Ring of the Wind Spirit, Alice's Ring.

Within the small world inside Alice's Ring, Gustav and Leviathan roamed in the lake, Raja circled in the sky, trailing the power of wind and thunder. Mountain Giant Bogang slept silently in a small valley.

This gave Levi the illusion of being a creator.

"How large would the Wizard Demiplane of a Legendary Wizard be?" he longed in his heart.

According to legends, gods had their own divine realms, where angels resided. The concept was similar to this storage item containing a small world.

During this period, Levi categorized all the transcendent creatures he possessed.

In the future, Alice's Ring would become his secret bloodline repository.

The Greenfield Immortal House became the nurturing ground for young Saint Scorpions and Red-Faced Sea Ghost Spiders..
