Chapter 644: New Change in the Interface! Scarlet Dragon Breathing Technique! (6)

Owens curiously sized up the outside world in the wizard tower. In the end, he reluctantly turned into ashes and left.

"I'll have another trump card in the future. Owens' strength is comparable to my normal knight cultivation. If he unleashes his full strength, he might have the combat strength of a third-circle."

"Next, I'll continue cultivating and advance to the third-circle as soon as possible. "

The next day.

Levi went to the Golden Lion Castle and made his request.

That was to hope that he could replicate the gasification knowledge of the Golden Lion Family's spiritual force.

The Jostar Family had to pay their debts. Old Golden Lion kept his promise and agreed to Levi's request.

However, they asked Levi not to pass it on to anyone else, and the two parties

Signed a connuennialty agreement.

Just like that, Levi obtained priceless knowledge. If he went to buy it, he would need at least 100,000 Aether Stones.

However, he had silently saved the Golden Lion Jostar Family. It was just that the Old Golden Lion didn't know about it, so Levi had no qualms about taking this knowledge.

After obtaining the knowledge of the gasification of spiritual force, he also had the formula for the Lake Fairy Potion. Levi was only two conditions away from advancing to the third-circle. His spiritual force had to reach 100 points and the scales of the Lake Naga.

He had also asked the Golden Lion Jostar Family to help him investigate the traces of the Lake Naga.

As soon as they had a clue, they would inform Levi immediately.

As such, Levi could cultivate in Lion King City in peace.

Although the Al Hidd Family tried their best to hide it, the news of Lehman's death still spread not long after.

After Golden Lion Senior and Clan Leader Wham confirmed that the news was true, they decisively sent troops to the Al Hidd Family to annihilate all the remaining survivors.

At this point, the three aristocratic families of the Yellow Earth Continent became two aristocratic families.

The two families had completely divided up the Al Hidd Family's assets.

Levi did not participate in the subsequent revelry.

At the same time.

In Riptide City, the conflict between Blue Dragon Lady and Thunder Spear was still ongoing.

Many Third-Circle Wizards had died in such an undeserved disaster, let alone low-level wizards.

This was also a good thing for Levi.

The military had no time to care about him for the time being, so he could grow quickly.

He felt that the reason why he could escape unpunished for so long was most likely related to Huffman.

Levi would never forget Huffman's kindness.

Two years passed in a flash.

Holy Brilliance Calendar Year 1059, Month of Beginning.

The 23rd year of the Great Expedition.

Unknowingly, the Five Sector Expedition had already lasted for decades.

However, the outcome of the battle was far from decided.

This allowed Levi to witness the cruelty and durability of the Civil War.

It was the same for the civil war between the Endless Sea and the other wizards in the Realm of the Unbelievers.

Chaos.

It was the only main theme of this era.

However, without the Al Hidd Family, the Yellow Earth Continent was finally quiet for a period of time.

At least, other than some small-scale dark wizard organizations, there were no large dark wizard organizations above the third-circle level.

In short, the strength of the righteous wizards was still far superior to that of the dark wizards.

However, due to the influence of the Great Expedition and the unexpected dark and righteous war this time, the righteous wizard was a little passive.

There was another very important reason, which was that dark wizards did not have any scruples and did not have a bottom line, so it was easier for them to use it.

Over the years, some mortal settlements in the Wizard World had been massacred by black wizards who cultivated evil spells several times.

Lehman's death gave the righteous wizards in Area 7 a chance to catch their breath. After recuperating, under the command of the officials, they began to support the righteous wizards in the other districts.

69-year-old Levi lived in seclusion and silently cultivated.

In two years, his spiritual power had reached 91 points, and his spell power had reached 2,700 points. He was getting closer and closer to the upper limit of a Second-Circle Wizard.

As for the clues of the Lake Naga, he had yet to find them. Fortunately, Levi still had a few years left, so he was not in a hurry.

All the spells he had mastered had already been cultivated to the limit, and he had begun to actively research new original spells.

He wanted to synthesize a few more spells similar to Glacial Finger and finally fuse them into an S-grade third-circle spell that belonged to him.

Levi worked hard to collect them on the path of knights.

In Alice's ring, his extraordinary bloodline library was quite large.

Gustav's blood and the Three-horned Dragon King's horn were used for the Golden Snake Breathing Technique, while the Dragon Finch was used to cultivate the Red Lotus Breathing Technique.

The Ice Ape and the Mountain Giant cultivated the King Kong Breathing Technique. The Wind Thunder Winged Dragon cultivated the Silver Mountain Dragon breathing technique and the Jade Dragon Breathing Technique.

What the black whale needed was still Leviathan's blood. Cultivation would be relatively slow.

As for the others, such as the Death Ember Breathing Technique, because of the lack of the Undying Bird bloodline, they also fell into a slow state after level 12.

However, overall, Levi's cultivation speed of the Knight Breathing Technique was still not slow.

Another year passed.

In Levi's subsequent cultivation of the breathing technique, due to the powerful blood of the Wind Thunder Winged Dragon, the Silver Mountain Dragon breathing technique had reached level 13.

After the Silver Mountain Dragon Thirteen level, Levi's endurance was even longer.

Furthermore, the amount of electricity produced by his Silver Tendon was even more intense. With every move he made, electric currents ran amok around Levi's body, making him look like a low-level Thunder Spear.

Levi—

Silver Mountain Dragon Breathing Technique: Level 13 (1/400,000). Special Effect: Mountain Dragon Spine (Level 1), Lightning Remnants.

The Mountain Dragon Spine was the advanced form of the Silver Dragon Spine. It was said that the spine of the Silver Mountain Dragon was like a mountain range, endless and containing an endless stream of power.

As for the Lightning Remnants, it was probably because the Silver Mountain Dragon belonged to the Dragon Clan which had an affinity with lightning attributes. Therefore, such a Special Effect was born after its advancement.

This meant that other than Earth, Fire, Wind, and Water, Levi also had the frost and thunder element affinity.

All the mainstream elements of the six major sects were gathered!

However, due to the lack of high-level transcendent eagle-type bloodlines, the Maya Breathing Technique, which was also an endurance-type technique, was still only level 12. It was still quite a distance away from level 13.

Levi calmed down and continued to cultivate. The outside world was in chaos, so he placed it behind him.

A year later.

Levi was seventy years old.

After the Silver Mountain Dragon Breathing Technique, the Jade Dragon Breathing Technique also stepped into level 13, becoming Levi's sixth breathing technique to step into level 13.

It had to be said that the secret medicine refined from the bloodline of a third-circle transcendent creature was far more effective than a low-level first-circle or second-circle secret medicine.

At the same time, Levi discovered that on the proficiency panel, behind the Blood Beast Breathing Technique, there was a Fusion option.

Levi—

Blood Beast Breathing Technique: Level 13 (25,799/400,000, usable)... Jade Dragon Breathing Technique: Level 13 (1/400,000, can be fused)

"There's a change in the proficiency panel. I don't need it to be maximum to fuse it now?"

"I don't care anymore. Fuse!"

Levi's Blood Beast Seed and the Jade Dragon Seed began the fusion battle. Three days later, Levi felt the blood-colored dragon in his heart. His face lit up.

"There are no more Blood Beasts." He opened the proficiency panel.

Levi—

Scarlet Dragon Breathing Technique: Level 13 (25,799/400,000). Special Effects: Scarlet Poison Mist (Level 1), Scarlet Contract, Thousand Faces, Boiling Blood, Scarlet Escape.
