

Wizard 645

Chapter 645: Nightmare! (1)

Within Levi's heart.

The blood-colored dragon's expression was ferocious. Sometimes, it would dissipate into a ball of mist, and at other times, it would condense into a physical body, giving off a surreal feeling.

Blood-colored scales surrounded his body as blood qi gushed out.

"Scarlet Dragon. Looks like it's led by the Jade Dragon Breathing Technique. This is for the best. I just need to absorb the advantages of the Blood Beast. The

Blood River Will is too strange. It's better not to have anything to do with it."

Levi looked at the Scarlet Poison Body. It had completely fused the legendary organs born from the Jade Dragon Breathing Technique with Levi's body while retaining the various functions of the Blood Fog Body.

Levi could still dissipate into a ball of blood fog, and the damage reduction effect on both physical and magical immunity still existed.

Compared to the Blood Fog Body, the scarlet poisonous body had two changes.

Firstly, Levi was no longer scattered into a certain number of Blood Demon Bats when he was attacked. Instead, he was a Blood Flying Dragon.

Secondly, the blood fog had an additional toxic effect compared to before. The toxicity depended on the type of poison Levi's secret medicine used.

In other words, after Levi transformed into a blood fog, even if he could not cast spells and relied on the blood fog to enter the enemy's body, he could still release poison to poison the enemy.

The poison sac and Levi's body fused into one. Levi had completely become a poisonous man. Without deliberate control, he would continue to emit poisonous gas and radiation. It was very terrifying.

Levi took out an ordinary transcendent creature, the black-horned sheep, from Alice's ring.

This transcendent creature existed as food for Gustav and the others. It reproduced faster and its meat was delicious.

With a thought, Levi turned into a ball of scarlet and sticky poisonous fog.

The poisonous fog quickly enveloped the panicked black-horned sheep in front of him.

The poisonous fog that filled the entire training room entered the black-horned sheep's body.

In a moment, the black-horned sheep died under the effects of all kinds of mixed toxins, turning into a pool of blood. Even its bones melted into it.

"How terrifying. It feels like a villain's skill..."

Levi felt the power of the poisonous fog body.

This method of entering someone's body to attack was unique.

However, there was also a certain risk. He was afraid that some wizards would master some strange spells and completely seal themselves somewhere in his body. That would be like catching a turtle in a jar.

In addition, the Scarlet Dragon breathing technique also turned the previous Blood Contract into a new one.

[Scarlet Contract: With the scarlet blood in your body, forcefully contract your defeated opponent as your scarlet servant. The scarlet servant has absolute loyalty to you. You can control their death with a thought. The number of scarlet servants contracted depends on the concentration of scarlet blood in your body. The current number of scarlet servants contractable is 2. 1 has been used.]

"It actually increased the number of contracts... Any defeated opponent can become my scarlet servant. This is a little abnormal."

Without a doubt, the Scarlet Contract was a much higher-level skill than the Blood Contract.

"In addition to Schinn, I can add new contract slots again, and there's no restriction on race.

"In that case, it will be easy for me to encounter powerful transcendent creatures that are not easy to tame in the future."

The most terrifying thing was that the number of scarlet contracts could grow. This meant that Levi could contract many Scarlet Servants in the future.

"Too strong. As expected, the poor rely on mutation."

In addition, the Scarlet Dragon breathing technique had an additional Special

Effect.

[Scarlet Escape: Burn all the Scarlet Power and part of your life force. Increase your maximum speed by three times to avoid powerful enemies. The stronger your endurance, the longer the Scarlet Escape will last. After the Scarlet Escape, you will fall into a weakened state for a period of time.]

"Good lord, another world's Blood Igniting Escape Technique?"

The Scarlet Power was still alright. Even if this thing was burned up, the Scarlet Seed could slowly be born in the future.

Origin life force was not an ordinary thing. It could not be recovered by relying on one's strong physique.

Origin life force was life force. To a certain extent, it represented longevity.

This meant that Levi would need to consume his lifespan to use the Scarlet Escape.

"Just like Resurrection, it's a life-saving skill at critical moments. I can't use it daily unless I'm like those longevity species."

Levi was now a Second-Circle Wizard and a Blood Knight.

He felt that his lifespan should not be inferior to that of a Third-Circle Wizard, which was 500 years.

It seemed very long, but as it became more and more difficult to advance in the future, 500 years was not enough at all.

After all, he had already used it for seventy years.

"But when it's time to use it, you can't hesitate. There are always ways to make up for lifespan. There's only one life."

Levi warned himself.

"Golden Snake Breathing Technique, Death Ember Breathing Technique, Scarlet Dragon breathing technique.

"My defensive, speed, and physique breathing techniques have formed."

The three attribute dimensions represented three completely different powerful Dragon Clans.

He still lacked the strength, endurance, and perception dimensions.

Levi's next step was to merge the four great breathing techniques of the Strength (Rune Language) dimension into one breathing technique, fusing the Silver Mountain Dragon and the Maya Breathing Technique into one.

In that case, other than the most difficult type of perception to collect, the final breathing technique of the five dimensions could be completely formed..
