

Wizard 646

Chapter 646: Nightmare! (2)

In the future, if there was a new breathing technique, it would also add bricks and tiles to the five-dimensional breathing technique to check for gaps.

The main body would not change much.

When the Perception-type breathing technique caught up, he would find a suitable opportunity to assimilate the six-dimensional breathing techniques into one and give birth to the ultimate biological breathing technique. Levi's path as a knight would be considered a preliminary success.

Judging from the current trend, the closest ultimate creature was the Dragon Clan.

It was even possible that the six dimensions of Levi's future represented six different powerful Dragon Clans.

"That's good too. I don't have to make myself look ugly. The dragons are quite good-looking."

Levi took out the Rowling Crystal.

[Unknown Dragon Clan Bloodline 12%, Red Lotus Dragon Bloodline 11%,

Unknown Dragon Clan Bloodline 10%... Human Bloodline 96%]

"Now it's an Unknown Dragon Clan..."

"The rate at which human bloodlines are declining seems to be slower than before. This is a good thing."

Levi put away the crystal.

He was already 70 years old. It was estimated that he could reach the limit of a second-circle senior at around 75 years old. Then, he would begin the gasification of his spiritual force.

When the initial gasification was successful, he would be a Third-Circle Wizard.

At that time, he could solidify the spell on his gasification spiritual power and turn it into his own innate spell.

It was said that after the third-circle, the main criterion for determining a wizard's strength was no longer how many spells he had mastered, but the quantity and quality of innate spells.

Talent spells were almost instantaneous and consumed very little energy. This made spells an instinct for wizards, and casting spells was as easy as eating and drinking.

The quantity and quality of innate spells that could be solidified depended on the degree of gasification.

Normal third-circle wizards could only solidify one innate spell at most.

As for third -circle senior wizards, they could only solidify three innate spells at most.

Al Hidd seemed to have just advanced to a third-circle senior wizard, and his spiritual force had reached the standard.

However, he had only mastered one innate spell. His strength could only be considered average among the third-circle seniors.

If he could master three different types of innate spells that specialized in attack, defense, control, and so on, forming a perfect combination and cycle, his strength would soar.

Therefore, the gap between Third-Circle Wizards was quite big.

"Now, the only ones that need to attack are the Black Whale Breathing Technique and the Maya Breathing Technique. With these two speeds, I can immediately fuse the breathing technique."

Levi had been actively searching for potion formulas from the School of Spiritualism that could help the Spiritual Beast's bloodline advance.

This way, Leviathan would be able to break through to the second-circle quickly. Only then would the secret medicine be able to support the cultivation of the Black Whale Breathing Technique.

However, he had yet to find any sorcerers from the School of Spiritualism.

"Let's take it slow. I'll study the gasification method first and start preparing to advance to the third - circle. The most important thing now is to advance to the third-circle."

Levi took out a memory slate.

The secret technique used by the Golden Lion Jostar Family to vaporize spiritual force was recorded in it.

Levi fell into deep thought after reading the contents of the secret technique.

The method recorded in this book was called the Earth and Fire Gasification Technique.

This kind of gasification secret technique required a treasure rich in earth elemental power. Then, one would find a land of underground fire and cultivate there for years. They would rely on the earth element and the high pressure brought by the underground fire to constantly temper their spiritual force.

In the end, relying on this external environment and the help of the third-circle breakthrough potion, the illusory spiritual force turned into countless spiritual particles.

"Land of underground fire? My Black Fire Island is good enough. It's a treasure rich in earth elements. When I went to the Shadow Realm to get the Stone Heart for the Tower Master earlier, I left one behind. I haven't sold it yet. I didn't expect to use it here."

Although the Stone Heart was only the heart of a first-circle Rock Troll, the earth elemental power inside was extremely pure.

Other than the earth element spirit, there should be no treasure more suitable than the Rock Troll's Stone Heart.

"Furthermore, with my strong body and high fire element resistance, it's not a problem for me to directly jump into ordinary magma underground fire to cultivate. I think the efficiency of gasification will also be higher than that of ordinary wizards."

"In that case, the only thing left to advance to a Third-Circle Wizard is the Lake Naga."

Levi muttered to himself.

In the following days, he cultivated quietly and did not care about the world.

In this chaotic era of war, he enjoyed a rare peaceful life.

The path of the four fur clan knights was also advancing in an orderly manner.

After Algerta advanced to a top-notch grand knight, it was difficult for her to make any progress.

This meant she had reached a bottleneck by relying on the Frost Wolf Blood in her body.

Next, she needed Frost Wolf Knight Advancement Medicines to continue breaking through.

However, Levi had yet to develop this potion.

Over at the Golden Lion Castle, Emperor Mu began to enter seclusion to prepare to break through the bloodline shackles.

As for the Ashen World, Levi had long put it aside.

Since the last time he entered, he had never entered again.

He would only occasionally summon Owens with iron coins to understand some common sense in the Ashen World.

Although Levi did not want to take the initiative to enter, he felt that if this ability was used well, it could be used to save his life.

That's right. By entering the Ashen World, he could avoid the pursuit and killing of powerful enemies.

It was better to know in advance and be prepared.

As for the Fallen Crystal Owens mentioned, Levi was not interested at all..
