

Wizard 647

Chapter 647: Nightmare! (3)

He was already very satisfied with his current cultivation speed.

With his personality, he couldn't use an unknown and potentially risky thing like the Fallen Crystal.

Holy Brilliance Calendar Year 1061, Month of Grass.

The Great Expedition lasted 25 years.

Riptide City.

10 Tanton Street, Blue Dragon Lady Residence.

The conflict between the Giant Dragon Sect and the Thunder Sect lasted for several years. They had invested countless manpower and resources.

Although Blue Dragon Lady had stabilized her position and even severely injured the Thunder Spear,

However, there were terrorist attacks in the city from time to time. In Riptide City, everyone was in danger.

After several years of war, Huffman looked even more aged than before.

There were many hideous scars on his face. He deliberately left these scars so that he would always remember the mistakes he made back then because he was greedy for small gains.

Due to the war, many pharmacists had suffered casualties. Huffman had no choice but to work overtime personally to invest in the refinement of various potions.

Among the pharmacists under his command, Levi had taken leave to go home and had yet to return. Now that there was chaos outside, he might be exhausted.

Grimm and Tommen disappeared without a trace. It seemed that they were also in danger.

Living was the only dream of many wizards in this era.

In a certain sea area in Area 6, near the former location of the Hundred-Eyed Demon Territory.

At the bottom of the deep sea, there was a hidden ancient wizard relic.

As the hidden array outside the relic rippled, a wizard left expressionlessly.

He was holding a Wizard Tool in his hand. If Levi was here, he would be able to tell that this Wizard Tool was a protective Wizard Tool given to him by Tommen's family.

From the looks of it, Tommen and Grimm still died in this ancient wizard relic in the end, and they died at the hands of their teammates who were exploring together.

"Interesting. In their memories, they seem to have a deep impression of a wizard called Levi."

The wizard muttered to himself and left the bottom of the sea.

In Lion King City.

Levi, who was in his cultivation state, suddenly opened his eyes. There was confusion in his eyes.

He looked at the slightly trembling fur. Spider Sensing was giving him a weak warning.

This weak warning happened from time to time, and Levi could not be sure what it was for.

After thinking hard but to no avail, Levi entered the Intuition state and used Perception on his surroundings.

In the end, he found nothing.

"Maybe it's something small. I might have been too cautious," Levi muttered to herself.

"However, I should temporarily leave Lion King City for a period of time. I've stayed here long enough."

At the thought of this, Levi immediately packed his things.

"Algerta, all of you enter Alice's ring," Levi said.

"Master, are we moving again?" Algerta, who had just finished training and was panting heavily, asked as he wiped his sweat.

Levi nodded.

In this chaotic world, one could not stay in one place for too long.

Otherwise, there would always be some indelible traces left behind, allowing some enemies with ulterior motives to discover him.

A place like Lion King City might attract other dark wizard forces and get involved in the dispute again.

Therefore, he wanted to travel around the Yellow Earth Continent and find clues about the Lake Naga.

After finding the Lake Naga, he would leave the Yellow Earth Continent and head to the Black Fire Island. He would enter seclusion and prepare his gasification spiritual force to break through to become a Third-Circle Wizard.

The fur clans had nothing to say. It did not matter if they stayed in Alice's ring for the rest of their lives.

Golden Lion Castle.

Levi came to say goodbye.

"Sir Levi, it's so chaotic outside. You might as well stay in my Lion King City." Old Golden Lion smiled.

After killing the Al Hidd Family, he heaved a sigh of relief. Now, his spirit was much better than before.

"Forget it. I want to travel the continent and broaden my horizons," Levi said.

"Sigh, then I won't ask you to stay." Lyon sighed. If Levi settled down in Lion King City, it would lessen the pressure on him.

However, he knew that with the Jostar Family's foundation, they would not be able to attract a wizard like Levi.

In Dinos's room.

"Sir Levi, this is the information on the places where Lake Naga might appear. With our family's ability, this is all we can find out." Dinos handed a slate to Levi.

"Thank you for your help, Jostar Family!" Levi said solemnly.

"Speaking of which, is Emperor Mu still in seclusion?"

Dinos nodded. "Teacher said that this seclusion will take at least a year to three years..."

"Does this guy need so much time? I remember that I broke through easily at that time. Oh, I forgot, I'm a cheater."

After cheating for so long, Levi could no longer experience the suffering of low-level wizards.

He deeply reflected on his slightly arrogant mentality recently.

Levi, you can't be a little proud and complacent just because you killed a few trash Third -Circle Wizards.

"In that case, I won't disturb him anymore. I hope that the Jostar Family will prosper. I also hope that Dinos can break through to a higher realm as soon as possible and work hard to catch up to your teacher," Levi said.

"Thank you! The reputation of the lionheart knight will resound throughout this sea one day! The Jostar Family will keep their word!"

At this moment, Jostar was filled with determination.

With a teacher like Emperor Mu and an unfathomable senior like Levi, he was full of confidence in the future of the knight path..
