

## Wizard 649

### Chapter 649: Nightmare! (5)

The spiritual power in his mind was no longer roiling and surging. Instead, it was as quiet as the Mirror Lake in front of him.

"My heart is like a mirror. Previously, I was still a little impetuous. I was wrapped in this era and blindly rushed forward. I lived like a robot. As time passed, I would sooner or later lose my human will and become insensitive."

He did not know if any of the other wizards in this world had a similar situation as him.

In short, he felt that this method should also help in the gasification of his spiritual force.

Levi yawned and got up from the table.

"What's the matter? Why is it so noisy? Can't you let the old man sleep?" Levi stretched and came to the door to look at the wave ice sculpture.

This, of course, was Levi's masterpiece.

During his travels, Levi created his own second-ring spell using cantrips and First-Ring Spells.

"Glacier Descent.

Compared to Glacial Finger, which was a single-target penetrative attack spell, Glacier Descent was a large-scale frost spell that could kill a large number of enemies through area-of-effect ice control. It was naturally not a problem to freeze the huge waves outside.

On the lake outside, two wizards were fighting. They did not care about the mortals who were almost killed by the aftershock of the battle.

Until they realized that the huge waves on the shore of the lake had turned into ice sculptures that shone brightly under the sunlight and emitted cold air.

Only then did they know that there was actually a hidden expert in that inconspicuous mortal tavern.

With the mental strength of Second-Circle Wizards, they did not sense the mental strength fluctuation of that expert at all.

What did this mean? That expert's realm was far higher than theirs. He restrained his spiritual force fluctuation, which was why they could not sense it.

They quickly left the tavern at the same time.

They suspected that there was a third-circle or even a Fourth-Circle Wizard in the tavern. The ice wall just now was just a warning.

Not long after, the Mist City returned to silence.

The mortals in the tavern did not know that they had survived a calamity because of Levi.

All of this, to Levi, was a trivial interlude.

He was almost done experiencing life in Mist City, so he came to Mirror Lake. During this period of time, he would often use his Intuition state to investigate

In the end, he realized that other than some ordinary fish and some first-circle creatures, there was nothing similar to Naga in the Mirror Lake.

However, since there were rumors of the Banshee of the Lake singing in this place, Levi felt that it was not groundless, so he waited patiently.

Ever since he left Lion King City, the sense of danger that made Levi's heart palpitate had indeed faded a little.

Lion King City would definitely be in chaos in the future.

As one of the most important places in the Yellow Earth Continent, it was definitely a place that the dark wizards had to fight for.

By leaving Lion King City in advance, he could avoid some possible calamities.

"I might as well find a place in this quiet Mirror Lake to make a cave abode and live in seclusion for a period of time. On the one hand, I can cultivate mortalization, and on the other hand, I can carefully search for traces of the so-called Banshee of the Lake."

Levi's heart skipped a beat.

He was like a fish, searching for a suitable place to cultivate in seclusion in the Mirror Lake.

Seven days later.

Levi arrived at the center of Mirror Lake. There was a bottomless trench here.

Even with Levi's current Intuition range, he could not detect the bottom,

Moreover, there seemed to be a power in this valley that could block Levi's perception.

"This Mirror Lake is just an inland lake. How can there be such a trench?" Levi muttered to himself.

This was the first time he had discovered this place.

The Spider Sensing did not have any abnormal reaction. Levi spat out his snake tongue and decided in his heart.

"The Banshee of the Lake might be under this trench. The entire Mirror Lake has been scanned by my Intuition. Other than here, there can't be a Banshee of the Lake anywhere else."

With this in mind, Levi equipped himself with Crimson Copper Armor, Earth Spirit Escape, King Kong Rock Body, Ashen Entanglement, and other defensive skills. Dark golden scales appeared on his body.

Levi, who was fully armed, prepared to go down and take a look. Now that he had the Scarlet Poison Body and the Scarlet Escape, his life-saving ability had been greatly improved. His life should not be in danger.

As Levi continued to go deeper, the light gradually faded. He mentally calculated the depth of his dive.

300 meters, 3,000 meters, 30,000 meters...

"I haven't reached the bottom yet. This place is deeper than some large trenches. No wonder my Perception can't reach the bottom."

There were no powerful creatures in the entire trench.

However, the more this was the case, the more cautious Levi became. Exploring this bottomless trench alone indeed required courage.

After an unknown period of time, Levi arrived at an empty sea.

"The magnetism and elemental power nearby are a little chaotic. It's a little like the ancient ruins mentioned in Jonas' Treasure Hunting Log."

Although Levi did not learn the handwritten letter he had obtained from Joann, he had studied it.

He had confirmed that there was an ancient ruin at the bottom of the Mirror Lake.

"Ancient ruins..."

Levi was conflicted. He wanted to go, but he did not dare to.

After all, he was not short of cultivation resources now.

A place like the ancient ruins depended on luck. It might be dangerous or very safe.

In short, anything was possible.

However, from the looks of it, there was a high chance that the Lake Naga was in the ancient ruins. If he did not go, it would not sit well with him..
